

PUT A ROSE ON YOUR COAT WITHOUT DELAY

Festival President Also Suggests That the Loyal Householders of Portland Begin at Once to Clean Up Their Yards in Preparation of Carnival.

Rose Festival Arch Under Course of Construction at Entrance to the Union Depot.

This morning President C. A. Whitmore, in response to the numerous suggestions made, issued an official call urging upon the people of Portland so far as possible to wear a rose bud in lapel or bodice from this time on until the festival is over. President Whitmore says that this will do more to awaken public interest and put the residents and visitors in the real festival spirit than any other one thing. The roses are coming out in profusion and a few more days will fill the rose gardens of the city with a multitude of blooms. In addition to this request President Whitmore urges all property owners to begin the work of cleaning up their lawns and yards between now and the first of next week, in case they have not already taken this step toward putting the Rose City in proper garb for the week's demonstration.

House Cleaning Needed.
A great many people have already done their "house cleaning" work, but in many sections of the city the streets, curbs, walks and lawns could be put in much more pleasing order than they now are. "I would very much like to see both men and women wear a rosebud every day from now on," said President Whitmore, this morning. "Last year a good many people observed this 'little form' but everybody that saw got the idea of a bud or bloom should show his or her patriotism in this way, for the reason that the second annual festival is to be on a much more elaborate, imposing and interesting scale. "I should also like to call attention to the fact that many residents have not taken any steps to clean up their yards and this should be done without loss of time. "It is still ample time for the work of decorating homes and business places, but within the next day or two the merchants and business men should get busy with this preliminary work. Some have done a little work so far, but let everybody hop on the bandwagon, so we can show the throngs of visitors what a patriotic town this is. Entries are coming rapidly for all the large parades, and the horse and carriage parade committee is confident of about 600 and perhaps 700 decorated saddle horses and vehicles in the line-of-march. The driving club and the hunt club are working hard to enlist the support of private owners of pleasure vehicles and fine riding horses, and the parade committee is rounding up fraternal organizations, improvement clubs and other bodies, and many of them are entering floral feature floats in this parade. Two lodges of the A. O. U. W., the Independence and the Fidelity, have applied for two of the big B. & O. F. trucks for decoration in the competition for the \$100 cash prize. Only four of the wagons now remain, but it is expected they will be snapped up in a day or so. **All Kinds of Boats.** "If the entries of water craft, big and little, keep coming in for the next few days the way they have for the past three or four days we will have to push the banks of the old Willamette back several hundred feet to make room for them all," said Chairman McAllister of the water carnival committee today. "The motor boat division will be dandy and there will be nothing quite so picturesque as the 100 or more little canoes in their division. We have nearly 90 canoes listed already, and the number of launches and large boats is being increased by entries not only from local people, but from all points up and down the Columbia, and many near-by towns on the Willamette. One of the features of the marine pageant will be the boatload of advertising-men, who will be here for the annual convention. The committee has secured accommodations for 100 guests for the water carnival parade, and they will be accompanied by a band of 20 pieces. There are about 2,000 laborers in the federal service at the port of New York and they receive an average of \$2.50 a day.

PAINS IN BACK It's Your Kidneys. Warner's Safe Cure Absolutely and Permanently Cures All Diseases of the Kidneys, Liver, Bladder, Blood Urinary Organs, Rheumatism and Diabetes

WARNER'S SAFE CURE

is the only possible remedy for all forms of kidney disease. There is health in every bottle. We recommend to the readers of The Journal the frank, straightforward letter from Dr. W. H. May, Philadelphia, Pa., whose experience is worth reading. His letter carries conviction to the most skeptical mind of the wonderful curative properties of Warner's Safe Cure, for all kidney and bladder diseases. "The sample bottle you sent me had an immediate good effect, so I purchased some of the large bottles, and am now taking it and will continue to take it until I am perfectly cured. I used to urinate about 8 times a day, particularly at night. Now I urinate normally (no pain), and on testing my urine found it to be perfectly normal. I therefore highly recommend it in all cases of urinary troubles, and will allow you to use my name publicly, if you desire to do so. Dr. W. H. May, 105 N. 19th St., Philadelphia, Pa. This was quick action, but not quicker than it should be. If the kidneys are unable to do their work properly the liver becomes affected, then the bladder, the blood and the stomach. The blood is thinned, the urine is muddy, containing brick-dust sediment and is voided in 24 hours; the liver is torpid and the pains in the back severe. **TEST YOUR KIDNEYS.** Put some morning urine in a glass or bottle, let it stand 24 hours. If there is a reddish sediment in the bottom of the glass, or if the urine is cloudy or milky, or if you see particles or germs floating about in it, your kidneys are diseased and you should get a bottle of Warner's Safe Cure at once. **FREE TRIAL BOTTLE.** If after making this test you have any doubts as to the development of the disease in your system, send a sample of your urine putting your name and address on the package, to our Medical Department, and our doctors will analyze it and send you a report, with advice, and medical booklet free. When the kidneys are diseased the uric acid is not carried off and this causes Gout, Lumbago, Rheumatism of the Joints, Rheumatism of the Muscles, Rheumatism of the Heart, Rheumatism everywhere. Warner's Safe Cure drives out the uric acid. In kidney disease the bowels are often constipated and the liver torpid. Warner's Safe Cure quickly relieves this condition, and no ill after effect is experienced. **WARNER'S SAFE CURE** is put up in two sizes and is sold by all druggists, or direct, at 50 CENTS and \$1.00 A BOTTLE. Refuse substitutes containing harmful drugs which injure the system. **TRIAL BOTTLE FREE.** To convince every sufferer from disease of the kidneys, liver, bladder and blood that WARNER'S SAFE CURE will cure them. A trial bottle will be sent FREE OF CHARGE, postpaid, to any one who will write WARNER'S SAFE CURE CO., Rochester, N. Y., and mention having seen this liberal offer in The Journal. The genuineness of this offer is fully guaranteed by the publisher.

The Story of a Medicine.
Its name—'Golden Medical Discovery'—was suggested by one of its most important and valuable ingredients—Golden Seal root. Nearly forty years ago Dr. Pierce discovered that he could, by the use of pure, triple-refined glycerine, aided by a certain degree of constantly maintained heat and with the aid of apparatus and appliances designed for that purpose, extract from our most valuable native medicinal roots their curative properties much better than by the use of alcohol, so generally employed. So the now world-famed 'Golden Medical Discovery' is for the cure of weak stomach, indigestion, or dyspepsia, torpid liver, or biliousness and kindred derangements was first made, as it ever since has been, without a particle of alcohol in its make-up. A glance at the full list of its ingredients, printed on every bottle-wrapper, will show that it is made from the most valuable medicinal roots found growing in our American forests. All these ingredients have received the strongest endorsement from the leading medical experts of the United States, and the following are a few of the eminent physicians who recommend them as the very best remedies for the diseases for which 'Golden Medical Discovery' is advised. A little book of these endorsements has been compiled by Dr. R. V. Pierce, of Buffalo, N. Y., and will be mailed free to any one asking same by postal card, or letter addressed to the Doctor as above. From these endorsements, copied from standard medical books of all the different schools of practice, it will be found that the ingredients composing the 'Golden Medical Discovery' are advised not only for the cure of the above mentioned diseases, but also for the cure of all catarrhal, bronchial and throat affections, accompanied with catarrhal discharges, hoarseness, sore throat, lingering, or hang-on-coughs, and all those wasting affections which, if not promptly and properly treated, are liable to result in consumption. Take Dr. Pierce's Discovery in time and persevere in its use until you give it a fair trial and it is not likely to disappoint. Too much must not be expected of it. It will not cure consumption in its advanced stages. No medicine will. It will cure the affections that lead up to consumption if taken in time.

DIG MICHIGAN NOW IN WATER

Gun Battleship Launched at Camden Before Distinguished Gathering.

(United Press Special Wire.)
Camden, N. J., May 26.—The battleship Michigan, the first of all the big gun battleships of the United States navy, was launched today at the yards of the New York Shipbuilding company in the presence of a distinguished gathering of officials from Washington and the state of Michigan.

As the ship left the ways Miss Carol Barnes Newberry, daughter of Assistant Secretary of the Navy Newberry, raised the beribboned bottle of champagne and dashed it against the receding wall of steel exclaiming, "I christen thee Michigan." The river about the shipbuilding plant was filled with boats, and as the new defender of the flag took the water a great salute was given her by all the craft, and by the whistles of the nearby manufacturing establishments. The band played "The Star Spangled Banner," and the assembled crowd, including the party of nearly 100 citizens of Michigan, cheered itself hoarse. After the launching the invited guests, including the governor and the naval officials from Washington, were served with a delightful collation. The affair was an informal one and informal toasts were proposed and responded to with eloquence and wit.

Description of Battleship.
The Michigan, which is already half finished, will be in appearance, in armament, distinctly different from any of the battleships now flying the American flag. Her most noteworthy feature will be her four turret out-works, each of which will protrude a pair of 12 inch guns of the latest and most powerful type. These turrets, which can be used in a broadside, either to the port or starboard, will be mounted on the axial line of the ship, one pair aft and the other pair forward of the superstructure. The turrets are placed one ahead of the other, it being necessary to shorten the superstructure, with the result that the two funnels and two long pole masts will be very close to each other. Forward the freeboard of the new ship will be the same as that of the Connecticut, the flag ship of the Atlantic fleet, but aft of the superstructure, for the purpose of saving weight, a reduction of about eight feet below that of the Connecticut has been effected. The elevation of the turrets is such that the rear turret, both in the forward and aft positions, can be fired directly over the top of the one in front. Another peculiarity will be the arrangement of the ship's masts, the forward mast being on the starboard and the after on the port side of the Michigan.

Her Armor Protection.
The hull of the Michigan will be protected by a waterline belt of armor varying in thickness from eight to 12 inches in some sections, from 13 to 10 inches in others, and from 11 to nine inches in other sections. Above the armored belt will be a casemate protection, which will be eight inches thick at the top and 10 inches at the bottom, which in extent and thickness has never before been approached in any American battleship. At the after end of the belt armor will be an athwartship armor bulkhead the same thickness extending clear across the ship. An athwartship casemate armor bulkhead will also be fitted between the shell plating and the barbette, the berth and main decks, which will be eight inches thick. The armor that will protect the barbette will vary in thickness from eight to 10 inches, depending on whether or not it is flanked by the side armor of the battleship. In the case of each of the four turrets the side armor will vary from 12 inches to eight inches, while the plates on top will be 10 1/2 inches thick.

Engines of 16,000 Horse-Power.
The engines of the new battleship are to have a combined indicated horse-power of 16,000, each engine to be in a separate water-tight compartment. The 12 water-tube boilers, which are to be fitted with superheaters, will be in three water-tight compartments, and the coal bunkers will have a maximum capacity of about 2,000 tons. All the main compartments below the gun deck will be provided with forced ventilation. The turrets will be electrically controlled, while the most complete arrangements for obviating the dangers of turret explosions and other accidents which have caused so many disasters in the navy, will be used to protect the men who will handle the great guns on the Michigan.

When completed the Michigan will displace 16,000 tons, and will carry in addition to her battery of eight 12 inch guns, 22 three inch guns and 16 small rapid fire guns. She will also be fitted with two 21 inch torpedo tubes. On her trial trip, according to the conditions of the contract, she will be required to maintain a speed of at least 13 1/2 knots an hour.

A. H. Stephens, superintendent eighth division railroad mail service, is in the city today on official business, and leaves for California tonight.

"Nemo" Corsets Fitted by ONLY "Nemo" Expert Corsetiere in Portland

Dr. Jaeger's Underwear We are Portland Agents. Known Everywhere as the Best. June Delinicator—June Butterick Patterns, 10c and 15c—None Higher. **Lipman, Wolfe & Co.** Good Merchandise Only—Quality Considered Our Prices Are Always the Lowest. Picture Framing The Largest Assortment of Mouldings at Lowest prices.

Store Will Be Closed Saturday, Memorial Day—Open Friday Night Until 9:30

Four SALE VALUES Unprecedented in Our Wash Goods Department

Lipman-Wolfe quality merchandise at such price as can be obtained nowhere else in Portland. It is another striking example of the tremendous price-making power of this great store.

10,000 Yds. of 50c Embroidered Madras Per Yard 19c
