TIN CAN CLUBS

Their Mission Is to Supply the Demand for New Forests.

B. H. Green of Monterey, Cal., has sent out a circular giving information regarding the Tin Can clubs through whose beneficent activities he expects to see the country supplied with needed forests.

The attempts to cultivate tree claims in the Dakotas many years ago were rather discouraging, says the National Magazine, but Mr. Green insists that he has been successful in planting tree seeds, nuts and cuttings in refuse tin cans, and can now show an oak tree 10 feet high only eight years of age and also a redwood tree, grown from seed, which is now fully 30 feet high and only 12 years of age.

Mr. Green insists that a tomato can with a fair sized hole punched in the bottom and filled with good earth is just the thing needed to start a tree in and that if the earth is never allowed to become dry the growth of the young tree will be amazing. Later the little trees are transplanted without removing from the cans, for the rust eats away the can sufficiently to allow the roots to free themselves as they need more room.
