LATEST MARKET NEWS

Is Tired of Tasteless. California Fruit.

Cantaloupe caters—this means everybody—are anxiously waiting for next week to happen. For next week the long-heralded home-grown musk melons are to begin arriving on the local markets. And then we won't have to leave the breakfast table with a "punkin' taste in our mouths. Cantaloupes this year have been unusually poor, owing to the dry weather and the fact that they are picked for transportation from California while they are green. The little melon needs plenty of sunshine while it is growing and when it is plucked before ripening the fruit loses its naturally fine flavor. The price will also go down with the advent of the Oregonic rop and this will not lessen the appreciation of the consumers.

WHEAT.

not lessen the appreciation of the consumers.

Watermelous are still scarce, although scattered cars are received every week. There will be few matermelous from the Oregon gardens this year but the alien fruit is of very good quality and the public is satisfied.

The poultry market is strong this week as receipts have been more than ordinarily light and the supply is short. Eggs have gone up from one to two cents, too, dealers having reduced the beavy surplus acquired during the sum-

heavy surplus acquired during the summer.
Provisions and fruits remain stationary. Seemingly the supply of staples and vegetables is quite plentiful and prices are reasonable.

Grain, Flour and May. ## WHEAT — Buying price new — Track

We pay you 4 per cent to save

You Owe It

To yourself and should be paid as conscientiously as you have paid all your other debts. If you are a wage-earner or a business man you owe yourself and family protection, comfort and care in case of sickness or distress. Our SAVINGS DEPARTMENT solves the problem by accepting small amounts weekly or monthly as you like.

Try this plan—start an account with a dollar the first week, two dollars the second, three dollars the third and four dollars the fourth week—and you have ten dollars saved. Start with a dollar again, and so on; and at the end of the year you have \$130 to your credit. Part of the debt you owe yourself will have been paid. Try it. Call at our Savings Department this week.

Two per cent allowed on checking accounts.

IN LETHARGIC STAT

An effort to get wheat at 90 cents on the board of trade market this merning failed. Ninety-four cents asked at the opening brought no response and at the close offers to sell at 92 ½c were made but not considered. Nothing neved. There was absolutely nothing doing in the barley market.

Obts jumped 6½ cents from the opening but this high bid had no effect in bringing out any grain.

PORTLAND BUARD OF TRADE REWheat, 31 cars, 2,317 sacks.

San Francisco, Aug. 11,-Barley, De-cember \$1.85 bid; \$1.30 % asked. Others

AT LAST

If ever in the past I have earned consideration for truths told and warnings flown, I now demand your best thought and closest heed for the statements that follow. This is the second of three advertisements displayed today in like space in the great newspapers of the world, and to be repeated tomorrow in like space in the same publications. I have never written, shall never write, anything of

graver import to you and to myself. It would be frivolous for me to come forward at this juncture with any ordinary proposition.

The instrument by whose agency I propose to reverse the condition of servitude to which the system has reduced the American people is an extraordinary instrument. But before its potency can be grasped there must be a thorough understanding of the facts

and manner of the situation at hand. Each year the American people produce billions of dollars over and above what labor and capital are used up in the process of production. These billions should be the property of the people who produce them, but the working of a financial trick each year puts this tremendous profit all in the hands of a few men, the Rockefellers, the Harrimans, the Morgans-Smalls system. In the hands of these few men these diverted billions become the greatest rower in all the land, a power so absolute that it

Controls the ballot box,

Creates Presidents. Harnesses the Senate and Congress,

To the American People:

Directs legislation, Manipulates courts,

Dictates to labor,

Regulates the prices of necessities and luxuries and makes the American people as so many dumb beasts of burden. The reason why it is possible for the few to take from the many their savings and use them, for a barness that they may drive the people to earn more, just as the slaver drives his human property, is because there has come into existence during the past 50 years a power greater than that of the people, the power of manipulated dollars.

This power today is in the hands of a few men-the system-who wield it remorselessly against the people. My purpose is to put this power into the hands of the people to use unsparingly for the destruction of the system.

The instrument through which this will be brought about is no mysterious, complicated mechanism, but a simple device, easy to understand, ready to wield and certain in result, a device which will do for the people exactly what the system's machinery has per-formed for the benefit of the few, now the 100-time millionaires, who a brief while ago, before they became possessed of their wonder-power, were just ordinary, every-day Americans.

Fifty years ago there were but few American stocks and honds in existence, they represented the ownership of a few railroads and industries which really belonged to the people.

The annual earnings of these railroads and industries, over and above the legitimate expenses of conducting them, went to the

At that time there were no 100 and 500-time millionaires-no few men who ran the whole country, no trusts, no system. The prices of necessities and luxuries were made and controlled

by the legitimate demand and supply. There were but few banks and trust companies, and these institutions loaned the people's deposited savings to the people at rates

of interest which were regulated to earn only the expenses of legitimately conducting said banks and trust companies, plus a fair dividend on the capital actually employed in their banking business, The New York and other stock exchanges were but small affairs, conducted for the purpose of enabling the owners of stocks and

bonds of legitimate corporations to sell their holdings to those who might wish to invest in them. Out of this necessary and legitimate condition of affairs was hatched the monster fraud that today es the American

people, thwarts their will and directs their affairs. A few financiers, the founders of the system, contrived a trick device, to-wit: 1st-They created gigantic new trusts to control the railroads, banks, trust companies and industries of the country.

2d-They bought privately conducted enterprises, institutions and industries from their owners, the people, at one price, consolidated them into the trusts and issued to themselves in stocks and bonds of the new trusts new stocks and bonds representing 1,000 times the purchase price. 3d-This they did to such an extent that today there are \$70,000,-

000,000-seventy thousand millions-of such stocks and bonds. 4th-They then established all over the country thousands of banks and trust companies, into which the people thecause they

had no other facilities for doing business) were compelled to deposit their savings for the use of which they have been paid annually 3 to 5 per cent interest. 5th-The Government was tricked into depositing the Govern-

ment's money in their banks and trust companies at a nominal rate of interest, often without interest return at all.

6th-With these vast amounts of money-all the money of the country-in their control, the system started its trick machinery of making and controlling the prices of the \$70,000,000,000 of stocks and bonds on the stock exchanges.

7th-Then they proceeded to manipulate the prices of stocks and bonds, and, through false reports circulated in the press, directly and indirectly controlled by the System, and through daily arrificial Stock Exchange activities and false sales and purchases led the people to believe that the inflated prices thus made were legitimate. and induced the people to invest their savings at this preposterous valuation. After luring the people in they reversed the process. wheat, 7s 4 4-d. December, 2s 4 3-d. September corn, 8s 8-14 by the september corn, 8s 8-14 b Press stories of depression replaced those of prosperity, then Systemscontrolled banks and trust companies called in the money that

entire annual wheat, corn, and cotton crops of the country, the Nation's proudest boast.

The amount the System has been able to make has been limited only by the amount of surplus the people have accumulated during their periods of prosperity between each going and coming panic,

The supremacy of the System over the President, Government and all the institutions of the country was burned into the minds of all last October, when, in spite of President Roosevelt's almost superhuman efforts to bring the dollar lords within the grip of the law, the System deliberately precipitated the most disastrous panic in the history of all the world.

Over one hundred banks and trust companies were wrecked, over 165 men and women committed suicide and over 100 were turned into convicts. Thousands were thrown out of employment; cash payments by banks, trust companies and corporations to labor and depositors were suspended, and the produce of farms was allowed to not because no money could be had to move it.

During this destruction the System, with the cash that it had so cunningly withheld from the people, laid up for themselves, at slaughter prices, billions of dollars' worth of stocks, bonds and property, which the panic-crazed people were compelled to throw over to meet loans they had been led to believe would take care of themselves, and to protect their business, farms and homes.

During this panic the System dropped prices over \$10,000,000,000 For instance, \$300,000,000 Union Pacific, from 196 to 100; \$130,-000,000 St. Paul, 176 to 90; \$155,000,000 Amalgamated, 120 to 40, and so on through the list of hundreds of railroad and industrial stocks.

These enormous losses were made by the people. The sole gainer was the System. The property and securities which were gobbled up during the panic by the Rockefellers, Morgans, Harrimans-the System-already show the System, by the rise in stocks and bonds which has occurred since the October panic, a profit of \$2,000,000,-

Is is not time for the masses-the American people-to cease playing the role of asses to the System?-Yes, asses. They will tell you, these otherwise intelligent people, that the price of stocks and bonds is no affair of theirs, because they never buy or sell any. Let me boil this tremendous question to an A B C point.

A certain western banker had a large amount of the deposited savings of western farmers. This bank loaned its deposits to a New York hank. This New York bank loaned them out to System victims, taking as collateral Union Pacific R. R. stock at 150, Reading R. R. stock at 150, Steel Trust stock at 50, and Tennessee Coal & Iron stock at 100. In the panic the New York bank could not sell its collateral and it busted and the System bought from it Union Pacific at 100, Reading at 70, Steel Trust at 20, and Tennessee Coal & Iron at 80, and the western bank lost a vast sum of the farmers' money, which the farmers will not hear anything about until the next panic, when, because of these secret losses and others of a like nature, the western bank busts.

Now, my intelligent western friends, you who never buy or sell stocks and bonds and, therefore, are not interested in the doings of Wall street, who do you guess got the money you lost?

The Union Pacific R. R. stock, which the System bought at 100, they can sell today at 157; the Reading they bought at 70 they can sell today at 127; the Tennessee Coal & Iron they bought at 80, they can sell at 140; the Steel they bought at 20 is very active today at 47, and to quote from a leading New York daily: "The trustees for the widows and orphans of different estates all over the country are flocking to Wall street with the proceeds of their July dividends and coupons and putting them into Steel at 45, and it looks like a good investment, too, although it would have, perhaps, been wiser

if these trustees had bought at 20. The widows and orphans did not buy at 20. No, they sold at 20 to Morgan and his associates what they had bought from Morgan and his associates at 50, and they are again buying from Morgan and his associates at 47 what they sold to Morgan and his associates at 20, and in the next panic they will again sell at 20, and Morgan and his associates will again buy and be hailed by the people as the panic-stopper, the people's savior. And there you are.

Four years ago, in "Frenzied Finance," I warned the American people of what was coming, and, though they read, understood and were on their guard, down they went before this financial blast

like spears of wheat before the reaping machine. There is no power on earth to prevent these few men, the Sys-

tem, from working this trick in the future, as they have in the past, the people remaining as powerless to help themselves as they are today, for, when any few men in America can possess them-selves at will of the billions of the people's savings, nothing is beyand their power, and all the people can do is what they are doing now, frantically wringing their hands during panic times and thanking the Lord, when panic times are over, it was no worse; while the System builds up another period of prosperity preparatory to another shearing. I repeat, no power on earth can prevent these men, but the power of the people to take the System's game into their own hands to be worked by them upon the system.

The motive power today in America in all the affairs of the people is the capacity of a few men to raise and lower the price of the \$70,000,000,000 of stocks and bonds, for, through their rise and fall, the price of necessities and luxuries and labor and interest are controlled, thereby creating "Prosperity" and "Hard Times." If the few can control the price of the \$70,000,000,000 of stocks and bonds, the people will for all time be robbed of their savings.

If the people can control the prices themselves, they will not only be able to get back the billions of which they have been plundered and turn the 100 and 500-time millionaires, the Rockefellers, Harrimans and Morgans, into ordinary Americans. With the instrument of which I have at last gained possession I propose, after twenty years of active plotting, scheming and maneuvering, to place in the hands of the people the power to control the price of the \$70,000,000,000 of stocks and bonds, that they may bankrupt and destroy the System and come into their own.
