HOLD UP FOLLOWS SAFE CRACKING JOB

SLUG AND ROB BURGLARS PULL THEIR VICTIM OFF DOUBLE JOB

Daring Thugs Operate in Sight of Mount Scott Car Station.

E. M. Sherlock, a lawyer, was sandwiched and robbed at Clark's station shortly after he had stepped off a Mount Scott car last night. Two men are believed to have committed the deed, as they were seen heading over the unoccupied body.

"I boarded the car at East Thirty-seventh street," said Mr. Sherlock this morning. "I believe the car left down town about 10:30. When I alighted at Clark's station I had to wait for the car to pass before crossing the track. I remember a man saying, 'What have you got?' I did not answer him, and he repeated the question. Then I said, 'You must be crazy and started to cross the track. That is all I remember.' I had been taken here by Henry Oakes, a neighbor."

Mr. Sherlock, who has offices in the Worcester building, was relieved of \$4 by Sherlock and a shorter man standing over his shoulder. He was dazed and conscious of another man standing a little farther away.

Henry Oakes, an employee of the Willamette Tent & Awning company, accompanied by his wife, was coming out on the same car with Mr. Sherlock. He saw Sherlock leave the car by the step on the opposite side, and as their houses are in the same direction, expected Sherlock to follow them from the car. When the car had started and nothing was to be seen of the lawyer, he hurried back. He saw two men, the tall, thin man described by Sherlock and a shorter man standing over what proved to be Sherlock's unconscious form. As Oakes approached the scene of several desperate characters. Four suspects were picked up early Monday morning, and all were sent to Kelly's Butte for 30 days.

WATCH FOR TAGS ON SALMON FINS

Give Date of Catch, Condition of Fish and Where They Are Caught.

Whoever a tagged salmon is caught the fisherman makes the catch is requested to detach the tag and send it to Henry O'Malley, United States superintendent of fisheries for Oregon, at Oregon City, or to Master Fish Ward H. C. McAllister at Portland, Professor Charles W. Greene at Ilwaco or to the Journal. With each of these tags it is urgently requested that the sender give the date of the catch, the condition of the fish and any other information that may be of use to the bureau from the viewpoint of science, but to every fisherman in the country as well, and it is desirable that the reports by the various fishermen who catch the tagged fish be forwarded as soon as possible in order that more experiments may be made before the end of the season.

To determine the rapidity with which the salmon travel up the river and their rate of deterioration on the way to the spawning grounds is the object of the experiments now being made by Professor Charles W. Greene of the United States bureau of fisheries, who is now in Ilwaco.

The method of the department in trying to find out about the habits and psychology of the salmon is new. Each fish to be studied is tagged with a small aluminum disc on one side of which are the letters "S" and on the other side a serial number. The disc is attached to the caudal fin or tail of the salmon. The fish is then liberated at the Washington trap near the mouth of the Columbia. It is expected that the tagged salmon will be caught at different points all the way up the river.

MAYOR LANE MAY TAKE OFF HIS COAT

Determined That "Welcome" Arch Must Be Removed From Street.

Mayor Lane may have to tear down the arch of welcome. At least he said this morning that if Contractor Gorman does not carry out the order of the city executive board to remove the arch within 30 days, he might be compelled to perform the work himself. This remark was made because it is not certain to just what department of the city government the arch belongs. However, if Gorman does not tear down the arch, it is probable that either the city engineer or the fire department may have to furnish the men to perform the work.

As for the firemen, such work would be a play. Nothing would be greater sport for many of them than to place a ladder against the arch and plaster structure and tear it down under a water to perform the task within several hours' time. In fact several of them said today that for the cigars they would make the arch look like a cyclone within four hours. All they want is permission to perform the work, eight men to aid in the act and four hours to finish the job.

As for the engineers, they would refer to them with something like contempt, and say that the engineers would have to draw up blue prints before they could proceed with the work. The engineers, however, say the work would be done scientifically and with the least labor if they had in charge. And there you are. Mayor Lane won't have to tear the arch down after all.

SENATOR SCHOLFIELD PAINFULLY INJURED

(Special Dispatch to The Journal)
Astoria, Or., Aug. 15.—State Senator Scholfield is suffering from a dislocated knee, the result of a painful fall Sunday. With his father, who is visiting him, he went out on a hunting trip on the Klaskan river back of Knappa. They traveled over some rough country, and in doing so the senator fell and dislocated his knee. He was alone at the time. In falling he slipped over the edge of a precipice, hanging by his leg. He managed to extricate himself and found the lower part of the leg stuck standing out at right angles to the thigh. He forced the bone back in place and reached the top of the mountain. Some yesterday morning.

BLAME SPRINGFIELD RIOTS ON THE WHITES

At the Oregon hotel, "and when in carrying out his duties as a deputy sheriff he ordered to assist the sheriff in upholding the law in protecting George Richardson, the negro, the other whites became enraged and immediately proceeded to destroy the property where Mr. Lopez's outfit place was located."

"This is the first race trouble that Springfield has had in years. And it is most unfortunate for several reasons. In the first place, Springfield bears the distinction of having erected a monument to the memory of Abraham Lincoln which has more bronze in it than any other monument in the world. It cost something like \$1,000,000.

Springfield has a population of about 60,000. Something like 3,000 of these are colored persons. The place where the troops camped when they were called to quell the riots which existed for several days, is within the shadow of the monument erected to the memory of the emancipator of the colored race."

Dr. Habb and party leave tomorrow for Seattle.

USE COLUMBIA WHARF FOR TIME

American-Hawaiian Steamship Line Will Have to Look Elsewhere.

Temporary arrangements have been made to look for these agents in Portland of the American-Hawaiian steamship line which will begin running steamers from here to New York and Atlantic ports, every 30 days, whereby the Columbia wharf will be used for the first time. The wharf will be used for the first time. The wharf will be used for the first time.

TRANSPORT SERVICE TO BE INSPECTED

(United Press Local Wire)
San Francisco, Aug. 18.—For the purpose of making a general inspection of the transport service, Brigadier-General James B. Alesbury, quartermaster-general of the United States army, is expected to arrive here tomorrow.

Many suggestions concerning the improvement of the service have been made to the quartermaster's department at Washington. The question of a new commander of the transport service at this port will also be considered by the general. Colonel John B. Hollinger, the present commander, is being transferred to the Philippines, leaving his place here to be filled by a new officer. A selection for the post has been made.

IDAHO TEACHERS IN JOINT SESSION

(Special Dispatch to The Journal)
Boise, Idaho, Aug. 17.—Extensive preparations are being made for the joint teachers' institute of the counties of Ada, Boise, Canyon, Custer and Washington to be held here this week beginning Monday, September 7. The institute will be largely along professional lines. A corps of prominent instructors will have charge of the institute, among them being Dr. Charles A. Murray of the Northern Idaho Normal school, and Professor Elwood W. Kemp of the Indiana State Normal school.

Filling, Gold, Silver, and Platinum Work. Painless Extractions. Teeth and Plates. Both, Paines, A and Main Street.

WATCH FOR TAGS ON SALMON FINS

me arrested on an insanity charge yesterday as a last resort. Do I look as if I were crazy?"

He certainly did not. Joseph Meyers is a hale, vigorous man, quick in his movements, with a clear eye that looks one straight in the face. His abundant hair is absolutely white, as is his mustache, but if it were not for that, he could hardly be taken for 50 years of age. He is the last man you would ever think of adjudging insane.

"Settlement on Finance."

"All those boys are after," he repeated, "is my money. They think this woman is after it. Does it look like a potany with me as she did yesterday and accept the settlement I made? I gave her a note for \$10,000, payable at my death, without either interest or security? Why, she would have no more claim on my money at my death than you would. And yet she is a poor woman."

But that woman's no fool, let me tell you. When I was arrested yesterday, she went right out and engaged good lawyers to handle the case. Most women would have sat down and cried. That woman's all right."

"I have never done anything I am afraid to have known," I came to this country when I was a little boy with only 5 cents in my pocket. I have lived in Salem for 28 years and everybody knows me. I bought out the best business there and ran it until a year ago, when I sold out to the boys. And I had just as good a store as the biggest store in Portland."

Sued by Oldest Son.

"Do you know that oldest boy of mine sued me several years ago. He was working for me then, and one day he came in with a paper and wanted me to sign it. I just looked at it and laughed. Do you know what he wanted? He wanted me to pay him a salary of \$250 a month and if it were not paid when it became due it was to draw interest. He would have a cent a day for the first of the year, and he wanted me to put the entire control of the business in his hands. You know what I did. So he quit and about two months after that he sued me, claiming that he ought to have partnership in the business. He had as much right to it as you have."

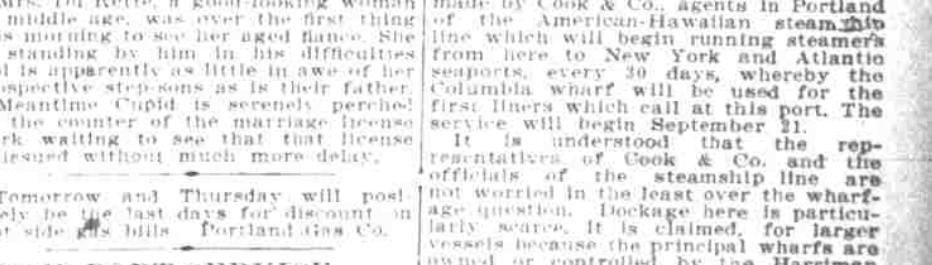

He and Milton, the other boy, told me one time that if it were not for them I would have a cent a day for the first of the year, and he wanted me to put the entire control of the business in his hands. You know what I did. So he quit and about two months after that he sued me, claiming that he ought to have partnership in the business. He had as much right to it as you have."
