

AFOOD AND TRAVELER'S BACK THROUGH UNEXPLORED REGIONS

Doctor A. Hamilton, of Boston, Tells Results of Remarkable Trip Through South American Republic Whose Vast Territory Has Been Closed to Travelers.

Of late years our knowledge of foreign countries has been greatly increased through the descriptions that have been given by the many travelers who annually leave the United States for a tour abroad. Singularly enough, one of the countries on this continent—the republic of Colombia, on the northern coast of South America—has until now, remained a practically unknown chapter in the itinerary of the American tourist. Historically, Colombia has been intimately connected with the United States through the controversy over the Panama canal, as well as through the growth of various industries and interests. The primitive conditions existing in Colombia, however, regarding transportation have kept it an almost sealed book to the American traveler. The famous explorer, Dr. A. Hamilton Rice of Boston, has now made an exhaustive study of the Colombian republic, piercing its hitherto inaccessible regions, discovering its wealth of ethnological and historical facts. The results of his exploration are here given to the readers of the Sunday Times of New York.

When Dr. A. Hamilton Rice of Boston, the famous explorer, cartographer, and ethnologist, sailed from New York on June 25, he carried with him an account of his recent explorations of that wild and rugged country of Colombia, a region more inaccessible than that visited by Stanley, so by this time the Royal Geographical society, of which he is a member, is in possession of a report which, in cartographical, geographical, and ethnological importance, is second to none.

It was in December, 1906, that Dr. Rice started on a trip which took him into a practically unexplored and rugged country which more than 200,000 square miles of well-known, inaccessible territory, almost unfamiliar to the foot of the white man, covering a mountain range, satisfied in having accomplished the object of his journey.

Overland to Bogota. Upon reaching Caracas in December, Dr. Rice was met by a party of guides and porters to Bogota. "Bogota," he writes, "was really the starting point of my travels." He remained here for nearly a month, gathering up the necessary papers and permits, and then started on his journey. He traveled through the upper provinces, crossing a great range of mountains, and then descended to the lower provinces, where he spent several months. He then returned to Bogota, where he remained for a few days before starting on his return journey to New York.

Dr. Rice's trip was a remarkable one, for he was the first white man to travel through the upper provinces of Colombia. He discovered many new plants and animals, and he also discovered many new tribes of Indians. He was accompanied by a party of guides and porters, and he traveled through some of the most beautiful scenery in the world.
