# LADIES, BEAR THIS IN MIND REGARDING STEEL RANGES

You Naturally Wish to Buy the MOST ECONOMICAL RANGE—BEST BAKING RANGE—MOST DURABLE RANGE

You have all these qualities combined in the "STEWART," with one other point added—and that is, it is the closest-priced range on the market today, quality and cost of production considered.

## GIVE ATTENTION TO ITS GOOD POINTS

THIS range combines more good features which add not only to the convenience but to the durability and general satisfaction, than can be found in any other range selling at the same price. Economical in operation, perfect working, materials the best and of the latest design, we recommend it as the best value in a moderate priced range.

BODY of range and closet of Wellsville polished range steel in natural finish, which requires no blacking. Bottom edge of body reinforced with a special wrought angle iron.

FLUES are lined with asbestos board to retain heat. Back flue has cast boot to prevent rusting out.

OVEN construction is our specialty. Our steel ovens, made on the one seam principle, are absolutely tight and

rigid and will remain so. We have demonstrated this by severe tests. The flue arrangement is such that it heats the oven evenly, so that the shell is as valuable as the oven bottom for baking. This is not true of most ranges. Oven top is protected by cast plate, next to firebox.

FIREBOX is of the latest model, arranged to produce perfect combustion, which means fuel economy. Linings are of gray iron, sectional and extra thick where weight is required. Grate is of the latest duplex pattern and cannot clog. By lifting out end linings and reversing grate, a wood firebox 22 inches long is secured. All parts of firebox can be reached by poker through our patent cleaning attachment.

RESERVOIR is the standard pattern, with cast iron, porcelain lined water-tank set in an outer gas-tight cast

box. The heat is controlled by a double damper and can be shut off at will. It is a quick and powerful water heater. A trouble free water dripping and seeping floor, our 100 lb. trap reservoir bottom prevents that. All ovens are 18 1/2 inches deep and 13 inches high.

OTHER FEATURES—Large top surface, with extension shelf in square pattern non-breakable covers and centers, one nested ring cover, large pouch feed door, wide swing wood floor, oven door spring-balanced, spring on outside, double system of check and draft dampers and large ash pan.

ALL HIGH CLOSET castings are nickel plated and closets are extra large.

NICKEL PLATING is the very best. All surfaces are polished. No dead nickel to turn yellow.
