STRAY TOPICS FROM LITTLE OLD NEW YORK

New York, Aug. 29.—It has been frequently remarked that there is more business done over the luncheon table in New York than in the busy office, and this is becoming more and more true with the rapid increase in the number of luncheon clubs that are being formed in the downtown district.

There is a club for nearly every line of business and the name is generally taken from the occupation in which the majority of the members engage. There is a fashionable Railroad club for railroad officials, the Hardware club for hardware men, and so on with such names as the City Lunch club, Lawyers and Publishers' clubs.

Of course, some of the clubs choose other names, such as the City Lunch club, which is situated on the roof of a 25-story building, which makes it one of the most enjoyable places to dine in the city.

At these different clubs men gather about 1 o'clock, and it is often nearly 4 before the last of them departs. They discuss their coffee and cigars they discuss some big business schemes, and the custom is becoming general that the City Lunch club, which is situated on the roof of a 25-story building, which makes it one of the most enjoyable places to dine in the city.

Possibly New Yorkers are a little slower in naming their children after the presidential nominees than people in other cities. The names of William Russell and Admiral Schley, but those who have the price, at 50 cents per promotion if a winner.

There is an attractive young lady in Gotham who models cloak models. It is a good business, too, for there are about 100 fine-looking, pretty-faced girls in New York who make a living by modeling and doffing fluffs and ruffles for the edification of the buyer at big dry goods stores.

The "New Model Factory" is Miss Alice Christal, who runs things in a business-like way. Her real work is to train the young ladies who wish to be cloak models to acquire that grace and temperament necessary to show off an 18 skirt so it will look like a creation of Paquin's when they put it on.

Oscar Hammerstein, the noted impresario, has started in Gotham last year by starting a rival opera house, has just sprung a new one on would-be Melba and Tetrazzini, who would fill his chorus with this winner.

The new method of selecting singers is described as the "painless system" but it caused a lot of worry and discomfort to the applicants who expected to startle the operatic world with their efforts.

hours at a time. In some of the places there is always a crowd in the afternoon, and the question of having room is a pressing one. With the youngsters occupying the seats at all performances for the price of one the box office receipts naturally suffer, the more, whose place is near Prospect and Third avenues, has solved the problem. He bought a time stamp and every ticket purchased is stamped with the time it is sold. Tickets are now taken up at the door. Every one in a while a man goes about and examines the children's tickets. Those who have been in long enough to allow for a whole performance are requested to leave. Protestants don't go, and on more than one occasion a small struggling firm has been carried from the place.

The albino terrapin, one of the most valuable exhibits at the Aquarium and the special pet of L. H. Spencer, in charge of the fresh water fishes, has been taken to the animal and reptile hospital in Bronx Park, and is soon to be operated on for cancer. His case is unique, and it took a consultation of Mr. Spencer, his assistant, Mr. De Noe, and "Fish Jim" to decide that surgery was necessary. They found an extension of the right fore flipper, caused by a calloused joint, and it is feared that "Fish Jim" may lose the flipper, as well as possibly have to have it amputated. The terrapin came from Texas five years ago and is one of the few that are known to exist and according to Mr. Spencer is the first one he ever saw in captivity.

The public schools of New York will cost the city next year \$32,700,000, or more than \$7,000,000 in excess of this year's expenditures. The \$2,000,000 additional needed for 1908 includes the \$3,000,000 with which to raise the salaries of the teachers, as desired upon by the board at its meeting, and the remaining \$1,000,000 to cover the additional expenses caused by the natural growth of the system. Considerably more than 25,000 pupils are added to the school rolls each year, new buildings are being opened, effort is being made to reduce the number of pupils on part time, and new courses of study, including trade schools, are being developed.

Newspaper Statistics. From the Chicago Journal. There are 12,500 newspapers published in the United States; about 1,000 of them are published daily and 120 are managed, edited and published by negroes. In Asia there are 3,000 periodical publications, of which the greater part appear in British India and Japan; the latter country publishes 1,500 newspapers, of which only 200 newspapers, of which 30 are published in Egypt and the rest appear in the various European colonies.

feet. She, however, being a rare type, spared him. "Hiding to his feet, Lord Reginald said: "I have bared to you the most sacred feelings of my inmost heart. May I ask that you will never reveal to a living soul what has passed between us?"

"I am not a gossip, Lord Reginald," the girl said haughtily. "But promise me," he continued, "Give me your solemn promise."

"I promise," she said. "But why, Lord Reginald, are you so persistent?" "Because," he answered, sighing with relief, "I purpose tomorrow to turn my attention to your older sister."

goes to school during the day, like all other little girls, and, unlike many other little girls, is a busy little modiste during those hours when she is not studying. Pretty young for a modiste, isn't it? It isn't professional, that this little maiden lends her services to the needle. Miss Monette has a doll, it is a pretty little doll, too, and it has a wardrobe that would bring the envious blush to the cheek of Mrs. De Sagan, nee Helen Gould.

With all the dresses and all the gowns—gowns understand, are what the term "directoire" clothes, dresses are just dresses—and hats that this doll had when the new craze arrived, its make-believe mother was sorely grieved. She wanted her doll to have a directoire and there weren't any patterns to be had.

Did she grieve long? Not she. It wasn't long before she saw a picture of the directoire (technical pronunciation) in one of the papers and it wasn't quite that long before Miss Dolly had a real, true directoire gown. And now, on any pleasant afternoon at school, you may see, if you are observant, a prim little matron out walking with a prim little directoire gown, and you will have on one of those stunning creations with light-fitting bodice, sheathed skirt and—just keep your eye open and find out for yourself.
