

WHEAT MARKETS TODAY

COUG BUTTER QUOTATION HERE

All but Two City Creameries Quoting 30c a Pound—Market Badly Mixed.

Front street markets lower. Some quoting butter at 30c a pound, but others at 29c. Chickens not so firm. Hogs are showing drop. Cattle are showing drop. Watermelons glutting market. Grape sales are better. Veal weaker for dressed. Dressed hogs are firmer. Wheat market is firmer. Little export flour trade. Hoppling starts slowly. Hay market dull. Oats and barley firm.

Some Quoting Butter Lower.
There is a mixed tone in the local butter market today with prices in the same condition. All but two creameries are among the largest in the state and they are holding out for 30c a pound for more butter than they have cream to make. According to one of the holders up to 10% of the stock here is still in the very best shape despite the lower prices in the east and in California. This year's butter is the best of the past week his company has been unable to fill all the orders received as promptly as could be wished, and there is therefore a reason why the lower value should be quoted. The other creamery holding out for 30c a pound is the one which has been in the market for some time and its butter is still willing to pay the higher figure. In any event this market is not a market of butter here no greater than demand.

Outside Butter in Pressing However.
Despite this condition of affairs as regards the city market of butter, outside the city is in a different position, and this caused some of the holders to become scared and they cut their prices as preliminary to the recent rise. California butter can be landed here at a price close to 30c a pound, and this is a price which is being brought in at a fraction less. Thus it will be noted that the price of local stock is from 5 to 7% less than the price of outside goods. It is not a very unusual condition in the Portland market for this frequently there is a price difference between local and outside butter in this city.

One of the features of the present offering is the fact that the Coos Bay is sending a large per cent of her make in this direction because of the materially higher prices in Portland. Practically all the Coos Bay make goes to California markets, but the makers there are in such a position that they can ship either way when market conditions justify.

Egg Market is Stiffer.
There is a stiffer tone in the local egg market, and in some instances the higher value than that quoted. The strength of the market is quite pronounced and therefore it begins to look as if there will be a general rise in values soon.

Cheese market is holding rather firm with the outward movement quite heavy and holders showing no disposition to press their goods upon the market.

Chickens Not so Firm.
While front street merchants are still asking 13c for hens and 15c for spring chicks, the market is disposed to show signs of a drag, and therefore buyers are not willing to allow stocks to accumulate. For this reason buyers have the field almost to themselves.

Watermelon Market Showing Dullness.
Dressed and market showing dullness as well as signs of weakness, and prices are easier. Dressed hogs, however, are firm at 27c.
