

U. OF O. FACULTY HAS NINE NEW MEMBERS

Increasing Attendance Calls for an Enlarged Teaching Staff—All First Day Registration Records Are Broken—Nearly 100 More Than Last Year

(Special Dispatch to The Journal.)
University of Oregon, Eugene, Sept. 22.—Yesterday's registration broke the record for the first day, 253 students registering. This is nearly 100 more than there were on the first day of last year, and indications are that the total will be far above last year's. Registrar Tiffany expects over 200 freshmen this year, and says that prospects are very promising for an exceptionally good year.

The faculty of the university has been increased this year by the addition of nine members. Last year it was impossible to do this, owing to lack of funds, and as a result many of the professors were compelled to take more classes than they could properly handle.

RECEPTION TO NEW STUDENTS AT THE LEWISTON NORMAL

(Special Dispatch to The Journal.)
Lewiston, Idaho, Sept. 22.—The formal opening of the Idaho state normal school at Lewiston will be held Friday evening, September 25, when the president and faculty will receive the entering students in Lewis hall, the handsome new dormitory for young women. The school year opens auspiciously, with an enrollment greater by 50 than that of 1907.

The faculty, comprising an enthusiastic corps of young college-trained instructors, is augmented this year by three new members. Dr. Hugo Koehler has been secured as instructor in the German department, and will take charge of the elementary classes. This will relieve Professor Straub, who took part of the freshman class last year. Dr. Koehler was born in Germany, and received his early education there. Later he came to this country and after graduating at the Syracuse university, he returned to the University of Wisconsin for two years and at Seattle high school last year.

Miss Mary H. Perkins will take Miss Slater's place in the English department. Miss Perkins is a graduate of Bates college and took her A. M. degree at Radcliffe.

Professor F. L. Barker will assume the head of the mining department, vacated by Professor Terrill. He has taken the degrees of B. S. and E. M. in the latter at the Colorado School of Mines. He has had practical experience, and is known as one of the best experts in the middle west.

The other new instructors are Assistant Professor L. R. Alderman, in the department of education; James Currie, in the department of chemistry; Samuel Elliott, in the department of psychology; Associate Professor Flink, in the department of civil engineering; and Miss Moselle Hair, in the literature department.

Professor Terrill has accepted the head of the department of mining at the University of Idaho, and Miss Slater resigned in order to take a much needed rest.

The university will also have a new librarian, Miss Camilla Leach has resigned, and her place will be taken by M. H. Douglas. Mr. Douglas received his training at the library school of the University of Wisconsin, and was librarian at Iowa college, where he built up a splendid library. He will also be assisted this year by Mrs. Ella M. Pennell, who will act as assistant dean of the women, and perhaps teach in the English department.

These changes will make the faculty much stronger, and will relieve the congestion of last year.

Harold A. Halliwell, who will instruct in the department of political science, was born in Germany, and received his early education there. Later he came to this country and after graduating at the Syracuse university, he returned to the University of Wisconsin for two years and at Seattle high school last year.

Miss Mary H. Perkins will take Miss Slater's place in the English department. Miss Perkins is a graduate of Bates college and took her A. M. degree at Radcliffe.

INDEX SYSTEM

(Continued from Page One)
The interview today explained that he took the statement down at Archbold's dictation and that Archbold went over it and corrected it. He will report to the head of the Standard Oil company that it would not be changed or edited and that it would not be prefaced with any conjecture or conclusion.

The interview was given shortly after 10 o'clock yesterday morning at the Standard Oil offices at 25 Broadway.

One feature of the statement which has caused much comment is this paragraph: "Some alleged lawmaker with enough sense to draw an ordinance duly submits it to his fellow-lawmakers; the press takes it up and that law is about to become a fixed affair, notwithstanding the fact that it is a gross injustice that will work a serious injury to everyone. What has been the habit of the press in the past? It has taken the law as it has been given, and matters have gone along in this way until some politician gets hungry. That condition has existed in this country for years. Every business man knows it. I do not know any lawyer who has not been held up. They know it. The press knows it. They do not mention the present complicated situation in the presidential campaign, centering around the alleged activities of the Standard Oil company in the making of laws and the conduct of cases in court, in the 'street' today the matter is discussed and the attitude of the Standard Oil company is made known to the public."

W. C. HASKELL SAYS HE IS NOT THE MAN MONNETT ACCUSED

(United Press Leased Wire.)
Washington, Sept. 22.—What may be the starting of an investigation by President Roosevelt of the Hearst charges against Charles N. Haskell, governor of Oklahoma and treasurer of the Democratic national committee, was today denied by W. C. Haskell, formerly United States marshal in Ohio, called on the president.

Haskell was with the president at the White House today and he talked with the president for a half hour. Haskell was met by Governor C. N. Haskell at the man probably meant by Monnett in connection with his charge that "Haskell had been implicated in an attempt to stop the Standard Oil prosecution by bribery."

W. C. Haskell today told President Roosevelt that he had never been connected with the Standard Oil in any capacity and that he knew nothing about the Monnett charges. It was stated that Haskell might make a statement later.

Governor George Curry of New Mexico and many other officials called on the president today. Roosevelt's first morning at his desk in the White House since he returned from Oyster Bay was a busy one.

T. R. MAY TAKE STUMP FOR TAFT; HUGHES ITINERARY

(United Press Leased Wire.)
Chicago, Sept. 22.—Frank H. Hitchcock, Republican national chairman, today intimated that President Roosevelt may make a brief campaign, including delivering several addresses and making rear-platform speeches from his train.

Hitchcock explained that there were many demands for the president, but that he did not know what Roosevelt would decide to do in the matter. The intimation was clear, however, that there was a strong prospect that Roosevelt would be heard on the stump before the election day. There is a feeling of considerable pleasure among the Taft leaders at this prospect, as they believe the appearance of Roosevelt in the field will be of the greatest possible advantage to the Taft campaign.

The tour of Governor Roosevelt, officially announced today, will speak at Indianapolis, September 28, and will then go to Detroit, Cleveland and Baltimore. He then will return to Illinois and will visit Wisconsin, Minnesota, Iowa, Nebraska and Kansas, closing the tour at Chicago about October 19.

BIG FOUR MAGNATE WOULD STEP OUT WERE HE HASKELL

(United Press Leased Wire.)
New York, Sept. 22.—Melville E. Ingalls, chairman of the board of directors of the Big Four railroad, who is supporting Bryan strongly in the present campaign, today said: "If I were in the place of Governor Haskell I would want to resign as treasurer of the national committee. The statement was made in connection with the charges made by Hearst that Haskell had served as an agent of the Standard Oil company."

TEXAS OILER TAKES BLAME FOR BAILEY

(United Press Leased Wire.)
Beaumont, Texas, Sept. 22.—Feeling is somewhat bitter against Thomas F. Hagen, presidential candidate of the Independence party, owing to an attack by him on Senator Bailey, made yesterday. Hagen passed through this city and was asked to state specifically whom he was fighting. He did so, stating that he was fighting both Democrat and Republicans.

He continued with an attack on the Standard Oil and Senator Bailey. The attack was interrupted several times. Judge J. H. Hardy, who was secretary of state at the time the Waterbury oil company was allowed to reenter the state, took exception to a statement of Hagen that Senator Bailey was responsible for the readmission of the company. He stated that he alone was responsible, and that Bailey had been fully exonerated.

Care of the Bathroom.

To insure perfect safety from disease germs every part of the bathroom must be well looked after and a daily cleaning and weekly scrubbing are necessary to keep it in a sanitary condition. The tub should be cleaned each time after it is used. For this purpose keep in the bathroom a bottle of a solution made by dissolving two tablespoonfuls of Gold Dust washing powder in half a gallon of water. Once a week thoroughly scrub and scald the tub, basin, floor and all the fixtures with hot suds made from the washing powder. Use a small broom or brush to remove the dirt from the waste pipes. Clean the nickel and brass fixtures in the bathroom by rubbing with equal parts of washing and Gold Dust washing powder.

DRYAN CALLS MONNETT AS WITNESS

(United Press Leased Wire.)
Columbus, Ohio, Sept. 22.—Columbus is the storm center of the presidential campaign today. In response to a telephone message from Bryan at Detroit at midnight, Frank H. Monnett, former attorney-general of Ohio, who made charges against Governor Haskell of Oklahoma, is here today to lay his story before the Democratic nominee.

Bryan and the Democratic leaders were in conference all afternoon. Monnett in a statement made public this morning refused to exonerate Governor Haskell and he also refused to charge him directly. He suggested that the matter be brought before the courts and Haskell's guilt or innocence proved legally.

"I cannot exonerate Governor Haskell of the charge that he was implicated in collecting the \$500,000 bribery fund raised by the Standard Oil to bribe me to stop proceedings against the company," said Monnett this afternoon, "neither can I condemn him. All I know is hearsay evidence. I have the utmost confidence in Governor Haskell and he also refused to charge him directly. He suggested that the matter be brought before the courts and Haskell's guilt or innocence proved legally."

"For Governor Haskell's benefit, I may state that he always declared innocence and insisted that he could prove that he had no connection with the bribery fund. "I insist that the courts are open and that he should show just what was done and who was guilty. Squire gave me Haskell's name on January 25, 1909, as one of the men implicated. "The declaration that I went to Oklahoma and exonerated Governor Haskell is the last static election in the United States. Governor Haskell asked me over the long distance telephone to come and tell the facts in the case to stop the Standard Oil prosecution by bribery."

Monnett declared that he was sent to Oklahoma later by the Ohio state central committee to stop proceedings against the Standard Oil in any capacity and that he knew nothing about the Monnett charges. It was stated that Haskell might make a statement later.

Torturing Animals To Assist Science

Is a Cruel Method to Follow, but It Has Saved Many Human Lives.
Prof. Pawlow, of Russia, was engaged for many years in experimental work, trying to learn the workings of digestion, especially the digestive glands.

He, with able assistants, operated upon dogs, cats, guinea pigs and other animals. His methods were seemingly painful, but he gave to science a work which won the Nobel prize and made for him an undying fame.

Science penetrated the secrets of nature. Prof. Pawlow saw animals digest food. He analyzed juices from every part of the digestive canal and stomach under all conditions of digestion. He spent years of ceaseless study amid the howling and dying beasts, but he won, and science today looks upon him as a great man.

"To do a great right do a little wrong" Shakespeare said, and Prof. Pawlow obeyed this trite saying. Stuart's Dyspepsia Tablets are prepared by the most scientific process. They act upon the stomach, bowels, and meet the demand of 20th century chemistry.

They give man the means to correct his ailments of stomach and digestive organs. They enrich the blood, give nature the juices and fluids she lacks, stop the formation of noxious gases and the fermentation of food. They neutralize powerful acids and alkalies, which irritate and devour the stomach. They prevent and relieve bowel and intestinal trouble and soothe the nerves.

They should be used after every meal, whether one has dyspepsia and stomach trouble or the stomach be naturally healthy. By their use one may eat at all times with pleasure, freedom and they help the system digest or throw off such food. They are thoroughly meritorious in their treatment of indigestion and constipation. Every drug store has them for sale, price 50c per package. If you would like to test their merits free, send us your name and address and we will send you a trial package by mail without cost. Address P. A. Stuart Co., 150 Stuart Bldg., Marshall, Mich.

GIRL'S FATHER

(Continued from Page One.)
purpose. So far an investigation could determine the Tierney family is not now living in Chicago nor could trace of their present residence be found.

Hopes which the parents had built up that if Pearl had become deranged who they would be able to locate her, were dashed when they could not trace of her. The parents had built up hopes which they had spent her summer vacation were blasted last night by the receipt of a letter in response to a telegram, stating that Pearl was not there and that they could furnish no information in regard to her.

Whole City Interested.
Scores of inquiries reached the Haviland home yesterday afternoon, during the evening and till late at night, following the publication in the columns of The Journal yesterday of the baffling mystery of Pearl Haviland's disappearance.

Men and women in all parts of the city conveyed to the anxious and sorrowful parents information which they thought would prove available. Some told of having seen young girls on the street about the time of Pearl's disappearance, whom they believed might be the missing one, others offered sympathetic advice to the mother and father, the latter eager and willing to grasp the smallest straw.

But out of the dozens of phone calls, one shed light upon the mystery of the girl's whereabouts, nor did any of the descriptions, once they were drawn out, tally with the features and characteristics of Pearl Haviland.

The management of the new corporation which took over the business of McAllen & McDonnell has decided to close out the entire stock. This is in line with the progressive methods of the new corporation—it being the intention to modernize the store and bring the business up to the highest standard of a first-class exclusive dry goods store. In order to close out all present stocks as soon as possible prices will be cut to a minimum. All the new suits, coats, skirts, waists, dress goods, etc., bought for fall will be included in this sale. Complete stocks of men's goods, table linens, lace curtains, blankets, comforters, hosiery, corsets, muslin underwear, umbrellas, gloves, purses, lace, embroideries, etc.

It is said that most of the tobacco used in the so-called Russian, Turkish and Egyptian cigarettes is grown within a radius of 100 miles of either Louisville, Ky., or Raleigh, N. C.

ENGINEER RESCUED BY BRAVE FIREMAN

(United Press Leased Wire.)
San Quentin, Cal., Sept. 22.—The engine, baggage car and one coach containing six passengers went through a trestle near San Quentin station and Engineer Sam Lewis was saved from drowning only by heroic efforts on the part of his fireman, Victor Brooks, who fished out his chief from the partly submerged cab after he had been under water two minutes. Two passengers were hurt, Harry Briggs, whose foot was crushed, was taken to the San Rafael hospital, and Harry Carter, a newboy, was rescued after he had tried to break through a window in the half-submerged coach. A new crew was in charge of the engine and ran upon the trestle, which had been condemned, by mistake.

THE ULTIMATUM

New Corporation Decides to Make Many Medical Changes—Will Close Out All Present Stocks at Once Regardless of Cost.
The management of the new corporation which took over the business of McAllen & McDonnell has decided to close out the entire stock. This is in line with the progressive methods of the new corporation—it being the intention to modernize the store and bring the business up to the highest standard of a first-class exclusive dry goods store. In order to close out all present stocks as soon as possible prices will be cut to a minimum. All the new suits, coats, skirts, waists, dress goods, etc., bought for fall will be included in this sale.
