

SHERMAN UNDER FIRE OF DECENT ELEMENT

Democratic Committee Finds That Republican Nominee for Vice-President Once Befriended Gamblers and Helped Harriman's Hush Fund

(United Press Leased Wire.)
Chicago, Oct. 10.—Bryan headquarters gave out officially today the record of James S. Sherman, Republican nominee for the vice-presidency, from the time he changed his politics from Democratic to Republican up to the present time.

The charges state that Mr. Sherman is not a proper person to elevate to the second highest office in the land. Beginning with his term of office as mayor of his native town of Utica, N. Y., the exposure alleges that Sherman was elected by gamblers and permitted gambling all through his administration. The same "gang," it is alleged, sent him to congress and kept him there despite his bad record and his effort to put through the salary grab in the Fifty-eighth congress. Also it is charged that now Mr. Sherman is the head of the Utica ice trust.

In being the head of that trust he is therefore the oppressor of the poor. It is charged, not only by raising the price, but by refusing to sell to them at all unless they are regular monthly purchasers.

And it is still further brought against him that he helped to raise the \$260,000 hush fund of H. Harriman accumulated for the Republicans four years ago, and which was the subject of an epistolary controversy between him and the president.

Sherman's Ice Trust Record.
The exposure has this to say of Sherman's career as mayor of Utica:

and as the head of the Utica ice trust: "Through a political deal with the Democratic boss, a man named Dishler, was elected. He became known at once as the tool of the Wheeler-Dishler 'gang.' According to the daily papers of Utica at that time, the city was thrown wide open and vice and gambling were flaunted in the faces of citizens who made an effort to enforce the law. According to these papers, files of which are accessible, liquor licenses were violated, cock fights prevailed and Utica became known as a town where gamblers and law breakers held sway.

Gambling Games.
"Gambling dens were kept open at all hours and on Sunday, according to these newspapers, in violation of the law, but to the great profit of the promoters. Keno was the popular game at the Wheeler-Dishler establishment and the press estimated its profits at \$50,000 a year under the Sherman regime. Public meetings were held at which Sherman's removal was demanded of the governor.

"The poor of Utica know James S. Sherman better for what he has done to deprive them of the money for what he has accomplished in their behalf as a member of congress. Mr. Sherman is the president of the ice trust of that city. They obtained the exclusive right to the only pure ice supply within the vicinity of the city. Then by buying out a rival concern they established a monopoly and immediately advanced the price of ice."

BRYAN MAKES MANY FRIENDS

Flying Trip Through Missouri Proves Democratic Candidate Is Popular.

(United Press Leased Wire.)
St. Louis, Mo., Oct. 10.—William J. Bryan today made a flying trip across the state from Hannibal to St. Joseph and was greeted by great enthusiasm. Twenty-five speeches were made on Mr. Bryan's trip. Everywhere he expressed absolute confidence in his election and in each speech impressed upon his hearers that his trip through Missouri was not because of a fear of losing his electoral vote, but for the purpose of greeting the people he had learned to rely on to support his policies.

"I never go around Missouri. I always go through it if I can and I know in advance what Missouri will do at the election," he said in his first speech at Monroe City, where 1,500 people awaited him, though his train arrived at the breakfast hour. "Thousands greeted Bryan at Paris. He was introduced by Senator McAllister. The Paris audience was composed mostly of farmers and stock raisers and Mr. Bryan tickled them with reference to an article in a morning paper which announced to them that a Pennsylvania manufacturer of cream separators had given notice to his employees that the factory would close in the way of an extended period of time if the Democratic nominee is elected.

"I never knew before that the election of a Democratic president would make cows quit giving milk. Yet we have the authoritative announcement that the cows will dry up four years if I am elected," he said. At Moberly, Mr. Bryan spoke 45 minutes. He ridiculed Taft promises without restraint and declared they were empty and meant nothing and promised the people on behalf of the Democratic party to give them what the desire in the way of tariff revision if the ticket is successful.

Those Smart Snappy Fabrics

IF YOU'RE seeking something in the line of garments—a little more nobby—a little more individual—than the average tailor shows—you'll find it at Nicolli's. We want you to know and feel—that it's not merely our business—but also our pleasure—to show and discuss the nobby fall and winter fabrics with you.

If you want to be absolutely sure of the style of your garments, of the fitting—of the proper trimming—of the general workmanship—see that Nicolli's name is in your coat. It is a guarantee for full and complete satisfaction.

**TROUSERS \$6 TO \$12
SUITS \$25 TO \$50**

Satisfaction guaranteed in all cases. Garments to order in a day if required. Full dress and tuxedo suits a specialty.

BIG SPECIAL OFFER

\$1.00 BOTTLE "MICRO" and \$1.00 MICRO HAIR BRUSH FOR \$1.25

PRICE \$1.00

Micro destroys the dandruff germ. Absolutely kills it—then it dissolves the dried up serum or scalp fat and leaves the hair and scalp healthy, clean and vigorous.

The Micro Hair Brush is made for us by a special process and is recommended for us with "Micro." The hair should be brushed for at least 10 minutes each day with the Micro Brush, first having sprinkled a little Micro on the bristles. This week we will sell a bottle of "Micro" and a Micro Hair Brush for **\$1.25**

Micro Hair Brush PRICE \$1.00

NEWBERG NEXT MEETING PLACE

Presbyterian Synod Decides Next Place of Meeting. Good Reports.

(Special Dispatch to The Journal.)
Ashland, Or., Oct. 10.—The third session of the Presbyterian synod today was marked by a large attendance. Reports of important committees and able addresses on topics of prime interest to workers of church were delivered. The synod listened with deep interest to E. J. Connor, a full blood Nez Perce Indian, who told of a wonderful revival among Indians of the Pendleton presbytery.

The report on foreign mission, by Rev. W. Seeman shows that the Presbyterian church supports 95 missionaries and has an enrollment of 85,000 foreign communicants and maintains over 1,100 schools in foreign lands, with an enrollment of 4,000 students.

The synod went on record in favor of a closer Sabbath observance, and favored granting day rest to workmen in a week to workmen who are obliged to work on Sunday. It condemned severely baseball and other kindred sports on Sabbath and decided to hold the next synod at Newberg.

Resolutions were adopted calling upon members to make their own residences distinctly evangelistic and expressing high appreciation of the hospitality of the churches which helped one of the most agreeable sessions thus far held.

GREATER THAN A DREADNAUGHT

Biggest Ship Ever Built in America Marks Construction Record.

(Hearst News by Longest Leased Wire.)
Washington, Oct. 10.—The navy department has been notified by President Bowen of the Fore River Shipbuilding company that the battleship North Dakota will be ready for launching November 10. All time records for American battleship building have been broken by the North Dakota, the keel for which was laid December 18 last, the date of the sailing of the Atlantic fleet on its globe-encircling trip. President Roosevelt and Secretary Metcalf have been personally requested by Agent Bowen to attend the launching to celebrate the great construction feat and to fittingly commemorate the introduction to American waters of the "greater than dreadnaught" type of battleships that are to form the fleets of the future.

President Roosevelt made the request for rush work on the North Dakota at the time the contract was awarded to the Fore River company. Admiral Bowles told the president at the time of the sailing of the Atlantic fleet that he would have the North Dakota in the water before the return of the fleet to the Atlantic. He did better than he thought.

Governor Burke of North Dakota has been invited to attend the launching, with his staff, in a full wardrobe.

The North Dakota will be the largest ship of any kind ever launched in American waters. She is 510 feet in length, has a beam of nearly 90 feet, a displacement of 20,000 tons, and is to have a speed of 20 knots.

The Delaware, her sister ship, which is being constructed by the Newport News Shipbuilding company, will be launched in the early spring.

KNELL SOUNDS FOR NEAR BEER

Josephine County Judge Rules Against Alcoholic "Temperance Drinks."

(Special Dispatch to The Journal.)
Grants Pass, Oct. 10.—The first of several cases of illegal selling of liquor was tried today in the Josephine county court, resulting in conviction. The jury was out only a few minutes, returning with a verdict of guilty. R. A. Davis, proprietor of the Josephine hotel bar was the defendant. Sentence will be pronounced by Judge Hanna Monday.

An interesting feature of the case was that Davis claimed to have sold only near beer. Expert testimony of a chemist, Earl Ingles, proved that the near beer contained almost four per cent alcohol. The beer was brewed by the Roseburg brewery, and as quantities of it are being shipped here it is likely that action will be taken against the establishments.

Davis was defended by Attorney Robert Smith, this city. Senator Harry Norton had charge of the prosecution, and will direct all cases on the docket for the state. Joseph McKinney, proprietor of the Palace hotel will be tried next. Private Prosecutor J. O. Bachelier of the secret service, who prosecuted Davis in behalf of the temperance people will also prosecute McKinney, having on several occasions, it is so alleged, obtained liquor at the Palace. Miles and Carter, their partners, proprietors of the Layton hotel, will also be tried.

The conviction of Davis will no doubt result in stopping the sale of near beer and all alcoholic "temperance" drinks in Josephine county, as the analysis of the chemist, admitted in court, proved conclusively that such drinks contain alcohol. Judge Hanna's instructions to the jury are precedent in this jurisdiction, where that an appreciable percentage of alcohol makes a drink intoxicating, therefore it is prohibitive under the law. Drink establishments occupying places formerly saloons must therefore close their doors, as their business has consisted mainly of selling near beer.

The trials are the result of a long suit here, conducted by a special detective Bachelier for the temperance people.

STAGE HELD UP BY ONE BANDIT

Eleven Men and One Woman Are Made to "Dig Up" All Their Cash.

(Special Dispatch to The Journal.)
Missoula, Mont., Oct. 10.—The Bonner stage, which makes daily trips between this city and the town of Bonner, was held up about 8 o'clock tonight at a point about half a mile east of here, by a lone highwayman. There were 12 passengers on the coach, 11 men and one woman, all of whom were en route to Missoula.

The total amount secured by the robber will aggregate not more than \$50. Morris Bedell was the driver of the stage coach. He was joggling along at a lively pace, when he was halted by a man standing in the middle of the road, with a nickel-plated revolver in his hand. The man had a black handkerchief over the lower portion of his face.

Bedell drew up his team and the robber ordered him to dismount. Bedell obeyed the command, and then the occupants of the coach were ordered to get out. The highwayman kept his gun leveled on the passengers as they hurried from the coach, and then, ranging the party in a semi-circle, he commanded each to "dig up" their cash, emphasizing the fact that he did not want any jewelry.

The police have little hopes of effecting a capture, as only a meagre description of the highwayman was obtained.

CLOTHES BACK IN ONE HOUR

Detectives Kay and Mallett came into the police station last night with two men and a two-bushel sack of clothing. The sack belonged to the men; the clothing belonged to Dr. Charles A. Francis and had been stolen from his residence at 23 North Ninth street about an hour before.

The doctor immediately upon noticing his loss, notified the police, and within an hour the detectives arrested James Volts and H. Watts. They had the clothes with them and had been trying to sell a suit of clothes.

The thieves, who confess their crime, evidently meant to lay a full wardrobe for the winter. They had several suits of clothes, negligee shirts, white shirts with collars to match, underclothing, socks, handkerchiefs and everything useful. They had even gone so far as to take off their own travel worn togs. But in the police station they were made to strip off to the skin and climb back into their own clothes. They were booked for vagrancy, but a more serious charge will be placed against them later.

MAY PICKET AND BOYCOTT

Court Strengthens Injunction but Loosens Other Bonds.

(United Press Leased Wire.)
Chicago, Oct. 10.—A decision in which the United States circuit court of appeals held that a lower tribunal went too far in prohibiting peaceful picketing in connection with the iron molders' strike with the plants of the Allis-Chalmers company several years ago, was handed down today.

The federal court injunction issued against the Iron Molders' Local, No. 126, of Milwaukee was upheld in many particulars, but was considerably modified and a number of its paragraphs vacated.

The decision was reached by Judges Grosscup, Baker and Seaman. Judge Baker wrote the opinion and a concurring opinion of Judge Grosscup is attached to it.

In denying the injunction of the lower court relative to picketing, the appellate court embodied in the fifth paragraph of the provision the following words: "In a threatening or intimidating manner the complainant's places of business or the homes or boarding houses or residences of the said company's employes."

The decision is construed by the union to mean that peaceful picketing may be lawfully used. The sustaining of the ruling of the lower court in every particular except in the respect that they "cannot use means other than peaceful and without intimidation" is regarded by lawyers as strengthening the general rule of injunctions, but labor leaders think the upper court has given approval to peaceable boycotts and picketing.

The decision will not change the effect of any strike, since the trouble at that plant had ended long before the case reached the court.

The manufacture of chip hats and platts is a very ancient one and characteristic of the province of Modena, Italy, having been introduced at Cardet at the beginning of the sixteenth century by Hoodo Biondo, its inventor. The chip is made from a special species from a willow tree grown on the banks of the Po.
