OREGON PIGSKIN CHANCES BRIGHT

Team Held Back by Warm Weather and Injuries, but Good Now.

By Robert W. Forbes, Football Coach. Partly due to the very warm weather in the early part of the season and partly to injuries the football team has been held back in its progress for development. Only the most rudimentary parts of the game were indulged in, such as tackling and falling on the ball. With the approach of the alumni game on the seventeenth an attempt was made to develop a defense which would at least check the onslaught of the alumni team which was composed of some eight former All-Northwest players in addition to the other members who were recognized as star players. That the varsity was able to withstand these attacks and that her defense stiffened perceptibly as she neared her own goal line speaks well for the alertness and fighting spirit of the men on the team. On the other hand the offense was most ragged. The runner, if he got yardage, did it with his own effort. There was a looseness to the playing which would cause no end of trouble. Seldom during the afternoon did any offensive playing show real

Robert W. Forbes.

merit. However, considering the fact that very little time had been spent on offense the results were encouraging. Oregon finds herself this year with one of her largest football squads. There is plenty of good freshman material at hand and their victory over Portland High school Saturday, October 17, is deserving of much credit. Of the varsity there are four veterans, Moulton, captain; Clark, Pinkham, Hillis, who are gradually getting into their old form. The new men include such names as Main, Michaels, Latourrette, Chandler, Mains, Hickson and Newton. To mould these men into a scoring machine so that they will lose their individuality to the extent that they can correct some of their preparatory faults is a task for coach and players alike. And how well we can accomplish this task can be judged by our playing in the latter part of the season.

COLD WEATHER ADVICE

To all is to beware of coughs and colds in the chest, as neglected they readily lead to pneumonia, consumption or other pulmonary troubles. Just as soon as the cough appears treat it with Ballard's Horehound Syrup, the standard cure of America. Use as directed—perfectly harmless. A cure and preventive for all diseases of the lungs. Sold by Skidmore Drug Co. Price 25c, 50c and \$1.50 per bottle.

VARSITY ELEVEN IN FIRST MATCH

Meets Willamette University in Eugene This Afternoon—All Are Given Chance.

(Special Dispatch to The Journal.) University of Oregon, Eugene, Oct. 24.—The varsity team is in excellent shape for the game with Willamette this afternoon. On account of the Eugene High-Freshman game yesterday Coach Forbes let them rest, only putting them through light signal practice. Moulton, Clarke and Hurd also practiced kicking. Moulton and Clarke are doing splendid work in this department and are every bit as good as they were last year. Hurd is showing up well as a drop-kicker and is also a good place-kicker. Manager McEwan gave out the new varsity suits yesterday and the team showed up to much better advantage than before. The suits are the same as last year's, dark blue jerseys and socks with narrow yellow stripes. The line-up today will be: Ends, Kfits and Mitchell; tackles, Pinkham and Moulton; guards, Sweek and Gillet; center, Means; quarter, Chandler; halves, McKinley and Main; full, Clarke. This line-up will start the game but other members of the squad will be given a chance during the game. The Willamette team which arrived last evening will line-up as follows: Massey, center; Homan, right guard; Belknap, left guard; May, right tackle; Nelson, left tackle; Winslow, right end; Bellinger, left end; Booth, quarter; Sullivan, left half; Lowe, right half; Cummings, full; substitutes, Blackwell, Hobson, Reeves, Jones, Belknap. Manager Pierce and Coach Kirby accompanied the team. The officials for the game will be Hockenberry and Hug.

EUGENE HIGH HOLDS FRESHMEN TO A ZERO

(Special Dispatch to The Journal.) University of Oregon, Eugene, Oct. 24.—Listless playing on the part of the freshmen yesterday allowed the Eugene High school eleven to hold them down to a scoreless game. Had the regular back field of the freshmen team been in the game the score would have been entirely different but Coach Forbes would not allow any of the freshmen on the varsity squad to play. This kept Main, Michel, McKinley, Chandler, Latourrette and Means from the game and seriously weakened the team. The freshmen had one good chance to score at the end of the first half but time was called as they were making ready for a place kick. As it was, the freshmen were very poor on the field. On the defensive, however, they proved a stonewall, forcing the high school to punt whenever they got the ball. Eugene High has a strong team and should make a hard fight for the interscholastic championship. Preston and Kuykendall of the high school were the stars of the day. Preston getting into almost every play and making some beautiful tackles. The line-up of the two teams was as follows: Freshmen: E. H. S. Baer, L. E. R., Preston, Lewis, R. E. L., Austin, McKinley, Anderson, Leckler, R. T. L., Bailey, Harding, G. R., Koch, Hines, G. L., Fenner, Hawkins, R. H. L., Kuykendall, O'Connell, L. H. R., Knorr, Means, F. J. L., Swigert, Means, F. J. L., Jenkins. FILLS CURED IN 4 TO 14 DAYS. PAIN RELIEF is guaranteed in every case of Croup, Whooping Cough, Sore Throat, Hoarseness, Bronchitis, Asthma, Hay Fever, etc. Price 25c, 50c and \$1.50 per bottle.

FOSTER ATHLETICS ON CLEANEST SCALE

By William Hayward, Physical Director. Athletics of all kinds at the University of Oregon are strongly and cleanly entrenched in the student life. A very large percentage, who are inclined for the heavier sports of football and track, take their hour or two a day in training. All the other men of the freshman and sophomore classes do regular work in the gymnasium.

Each student is given a thorough physical examination; and no one who is not sound and capable of strong physical exertion is allowed to go into any severe game. Exercises are prescribed to develop the weak, and altogether the permanent health of the student is fostered by as much special care and attention as can be found to give him. Individual Health First. Since my connection with the university I have always endeavored to keep the health of the individual men in mind first of all, even at the expense of the teams which they represent, and as a result we never have at the University of Oregon any general breakdowns of the nervous system, such as we see on many athletic teams, on account of too much training when physically unfit to stand severe strains. The following branches of athletics are taken up by the University of Oregon: Football, basketball, tennis, and this year the Canadian game of lacrosse will be played by those who do not take part in other activities. From present indications, this game will become very popular among the students. In the near future class games will be played. Basketball has been dropped until such time as a larger place may be had for practice. The present university gymnasium is deplorably small, and can not begin to accommodate the large number of students who turn out for practice. Football Prospects Dimmed. The outlook for good football team is not nearly so bright as it has been in the past. There are only four of last year's team back, and to develop a championship team with such a nucleus is a tremendous task for any coach. The material which we have to work on is good, but mostly inexperienced. However, Oregon will be represented by a fast, hard-fighting team, and if we are able to stem the tide this year, it will mean that we will have a good team for at least four years to come. Track never shows its strength at this time of year—but from present indications Oregon will have an excellent team for the coming season. The freshman class has a number of athletes who will develop into good point winners. Cross country running will bring good results. Baseball will be fair. The trip to Japan, which is in view for next summer, will be an inducement for many candidates to try for the team. Last year we had a strong second nine, and some of these men will undoubtedly work on the team. Tennis is represented in an intercollegiate contest. She made a very creditable showing against experienced and clever players. Six courts are to be built soon.

William Hayward.

so that all who wish to play may do so. Offers Football Solution. The yearly dispute which arises to settle the northwest championship in football is getting to be an old story. Something should be done to solve the problem. When any one team plays most of the other teams in the Northwest league, it necessarily has a very hard schedule, entirely too much for the short time in which to train. I would suggest that the six teams be divided into divisions, with Whitman, W. S. C. and Idaho playing for the inland championship, and Oregon Agricultural college, Washington, and Oregon playing for supremacy of the western division. The winners of the two divisions could then play for the northwest championship. Such an arrangement would settle disputes without having to play every team in the northwest.

GRADUATE MANAGER FOR OREGON'S TEAMS

University of Oregon, Eugene, Oct. 24.—A new departure in athletic management is the appointment of Manager Ormond Bean of the track team to a similar position with the baseball team. By this means it is hoped that conflicts between the two sports will be eliminated. Although there is some fear that track athletics will be given more prominence under the new regime, Manager Bean has won the reputation of being a good manager and a fair and square man. The ultimate plan is to place all student-body activities under a single graduate manager.

NOTED HIGHBINDER SENTENCED TO HANG (Special Dispatch to The Journal.) Oakland, Cal., Oct. 24.—Wong Lung Chee, convicted of murdering Lee Chung during the highlander war in Oakland in September, 1907, has been sentenced by Judge Ogden to be hanged, January 1. This is the second time the death sentence has been passed on Wong Lung. He was convicted of another murder and given the capital penalty in San Francisco, but the fire of 1906 destroyed the records and so muddled things that Lung escaped with his life. He is declared to be one of the most notorious gun men of the Hop Sing tong. His last victim, Lee Chung, was a member of the Sing Kong tong and his slaying was most cold blooded. Wong Lung walked up to him on the street in broad daylight and shot him down. Wong was arrested on the spot by a policeman who witnessed the shooting.

GLEE AND MANDOLIN SCHEDULE COMPLETE

(Special Dispatch to The Journal.) University of Oregon, Eugene, Oct. 24.—Manager Merie Chesman has completed arrangements for the following schedule of concerts for the annual holiday trip of the glee and mandolin clubs this year: Salem, December 15; Portland, December 18; Hood River, December 17; Pendleton, December 18; Baker City, December 19; La Grande, December 21 and The Dalles, December 22. The season will open in Eugene with a concert Tuesday evening, November 24, and will close with a final concert here, which will probably occur Friday, January 8.

The glee and mandolin clubs this year show new vigor and interest. The student men will probably be Charles Robinson of Oregon City, who did stunts for the Williams college glee club in Astoria last year, and perhaps one or two others who have been trying out.

STUDENT HOUR GIVEN OREGON COLLEGIANS

(Special Dispatch to The Journal.) University of Oregon, Eugene, Oct. 24.—The assembly hour next Wednesday morning will be given over to the student body as a "Student Hour." This will be practically the same as the "College Hour," which was held last spring but will be held in the assembly hall instead of on the campus.

The hour will be devoted to speeches, songs by the glee club and practicing of new ball songs, which were presented in the contest recently held. The winners in this contest will also be announced and prizes awarded. Y. M. C. A. Dedication. (Special Dispatch to The Journal.) South Bend, Ind., Oct. 24.—The new Y. M. C. A. building in this city, recently completed at a cost of \$200,000, was dedicated today with interesting exercises. The building is one of the finest of its kind in the country. It is four stories high and equipped with all the modern conveniences. In addition to the usual reception rooms, gymnasium, lecture hall and swimming tanks, the building contains nearly 100 dormitories for the accommodation of permanent guests.

IMMEDIATE RELIEF

From Coughs, Colds, Sore Throats and Hoarseness, by Using Hyomei.

When you catch cold you want to get rid of it as quickly as you can. You don't want to lie around the house for a week swallowing nauseating drugs. You know when you do this that you are not only making your own life miserable, but are a nuisance to every one about you. Why not avoid all this; why not relieve your cold in five minutes; why not cure it over night? You can do it by using Hyomei, the sure and guaranteed cure for Colds, Coughs, Sore Throat, Catarrh, Bronchitis and Asthma. Hyomei is medicated and antiseptic; you breathe it into the lungs through a small pocket inhaler, and its soothing influences as it passes over the inflamed membrane of the respiratory tract, stops the mucous discharge, allays the inflammation and the cold is cured. A complete Hyomei outfit costs \$1.50, and Woodard, Clarke & Co. will refund your money if it fails to cure. Husband and Wife Cured. I had a bad form of catarrh. My left nostril was closed entirely. There was also a constant dripping of blood from the right. I only used Hyomei a little over two weeks, and am now cured. My husband was also cured of catarrh and lung trouble two years ago by Hyomei.—Mrs. Harry Ober, Alliance, Ohio.

STATE'S UNIVERSITY IS NOW BROADENING

(Special Dispatch to The Journal.) University of Oregon, Eugene, Oct. 24.—Thanks to the conditions of the past year or two, there is hardly a man, woman or child in Oregon that does not know the location of the State University of Oregon, its history, its present standing and its hopes for the future. Backed and supported by all the strength its alumni could muster, the greatest fight in its history has been fought and won, and today the university stands more nearly adequately supported than it ever has before.

It has been a long, hard, upward fight for this newest of Pacific coast state universities—newest for the State University of California was founded in 1868 and the University of Washington in 1862. Begun in 1876, starting with a corps of a half dozen teachers, and offering courses that today would be practically high school work, it has gradually enlarged its forces and raised its standards, until now it ranks second to none in the west in scholarship and high ideals. Its requirements for admission cover the standard requirement of a four-year high school course, or its equivalent, and for graduation the successful completion of four years, or 120 semester hours, of university work. Two years' additional graduate work are given. All Courses Provided. Its organization is into a college of literature, science and the arts, including special courses preparatory to Journalism, law and commerce, a school of rhetoric and college of engineering, a summer school, a correspondence school, a school of mines, a school of law in Portland and a school of medicine in Portland. The college of literature, science and the arts is divided into the departments of biology, chemistry, economics, sociology and political science, rhetoric and American literature, early English literature and literature, modern English literature, German, Greek, romance languages, including French, Spanish and Italian; history, Latin, mathematics, physical education, physics and psychology. The college of engineering is divided into departments of civil, electrical, mechanical, mining and chemical engineering. The university has broadened its activities whenever its resources would permit. The summer school was added during the regular sessions, and offers a September bulletin told in detail of the university departments are represented. The newest addition has been the correspondence-study department, which was added last year, and which brings, free of cost, the resources of the university to the doors of every man and woman in Oregon. The response to the offer has been phenomenal. During the first year several hundred students were enrolled and already this year the number is being quickly increased. The scope of the department is being enlarged and now covers courses in English classics, Shakespeare, history, education, biology, mathematics and mechanical drawing. It is the newest, but by no means the least important department of the university.

Its doors swing freely to rich and poor alike. It is always glad to be of assistance to needy students whenever possible, and to this end it is establishing a student loan fund which it hopes will reach \$5,000 or \$10,000 within a few years. The fund at present amounts to something over \$1,000, but the demand this year for loans has been much above the supply. There is no doubt that the president of the university would be very glad to correspond with any one who wishes to make himself famous by substantially increasing the loan fund. Roster 35 Per Cent Greater. The enrollment this year is nearly 35 per cent greater than last year, and the total has now reached nearly 1,000 students, excluding the correspondence work and including the departments of law and medicine. The freshman class in the colleges of liberal arts and engineering numbers almost 250 students, representing practically every four-year high school in the state. With one or two exceptions, the enrollment this year includes students from every county in Oregon. To those to whom this paper may come, who live outside of Oregon, it may be well to say that the university is located at Eugene, a rapidly growing town of 10,000 people. The campus contains about 80 acres, all lying within the city limits, in the southeastern part of the town. The Willamette river flows past, only a few hundred yards away, and the snow-capped Three Sisters are in plain view. The university buildings are 10 in number, most of which are imposing structures of brick and stone. Streets run past the campus every few minutes, connecting it with the Southern Pacific station, making access to the university extremely easy.

LOWNEY'S Chocolate Bonbons

are the most delicious and the most wholesome of confections and have the largest sale of any in the world.

They are sold in sealed packages, are always of the same superfine quality and always the best.
