ACORN STOVES AND RANGES
 OLDEST AND BEST—FIVE GENERATIONS SATISFIED WITH
Acorn Steel Ranges!
 America's Best Bakers

Seventy-eight years ago the first Acorn (STOVE) was planted in America. From that single Acorn has sprung a vast forest—the greatest range in the world—which today is feasting a million families. The Acorn Stove and Range is the oldest and best American make. Five generations testify to its merits. The Acorn has stood every test, while hundreds of others have passed into oblivion. Many cheap ranges are made of scrap iron, which is dead and brittle; Acorns are made of the very best new, live material and will last a lifetime.

Acorn Ranges Not Only Bake Well
 They do more—they bake EXCELLENTLY—and there's a vast difference: all the difference between a loaf which you say, with a shrug of the shoulders, is "done" and the one which you enthusiastically describe as "perfectly baked."

The Superior Baking Qualities of Acorn Ranges—America's Best Bakers—THAT is the Foundation of Acorn Success!

To use every possible unit of heat, to carry the smoke out freely with an ordinary chimney, to distribute the heat evenly over all the oven surfaces, the Acorn sheet flue is carefully proportioned to the oven and to the fire-box. Heavy asbestos board lines the flues, and by preventing waste of heat through the walls of the range, concentrates the strength of the fire on the oven, so that, besides baking excellently,

Acorn Ranges Bake Quickly!

Every Acorn Rivet
 Driven cold by hand; every joint tight; every rivet fast. Acorns are the most durable ranges made; strength is never sacrificed to ornamentation. Cone-head rivets, two inches apart, make tight seams. The rivet work on back of range is just as perfect as on the front. The Acorn cast flue back cannot burn out; the damper is outside the range, where it cannot warp.

For Durability Acorns Stand First!
 In three years there are 1,095 days. An Acorn Range saving 5 cents' worth of fuel a day
Will Pay for Itself in Three Years!

The Art Acorn Gas Range
 Is made for the thrifty, who wish a stove economical in the use of fuel, that will do a superior quality of cooking, baking, broiling or toasting, and that will last a life time.

It has the Acorn safety oven lighter and safety spring door catches, making it absolutely explosion proof.

It may cost a little more but it is worth it, as it will soon save the difference.

One family threw out a practically new gas range because of big gas bills and put in an Acorn, which cut the monthly bill 25 per cent.

Our Best Bargain in Heating Stoves

Stearns & Foster Mattress Sixty (60) Nights Free Trial

Did you ever hear of such an offer? Sleep on it 60 nights, romp on it with the children, put it to any test you will. At the end of 60 days, we will take it back again and return your money immediately, if your satisfaction is not complete. Just notify us that the mattress has been a disappointment and without question, quibble or argument, the mattress will be taken away and your money returned at once.

FREE MATTRESSES ARE MADE OF PUREST SPRINGY COTTON AND BY THE WONDERFUL WEB PROCESS.

Special machinery crosses and re-crosses the filmy cotton fibers into a continuous web. Forty of these buoyant webs laid one upon another make a layer, and nine of these layers make a Stearns & Foster Mattress. To make such a mattress except by their special machinery would be absolutely impossible. Did you notice their two-page ad in the Saturday Evening Post, October 31?
