WEATHER REPORT

A large high pressure area with its crest over western Montana controls the weather in the Rocky mountain and Pacific states, and no rain has fallen in that section within the last 24 hours. A small disturbance is central over the upper Mississippi valley which has caused light rain in the eastern portion of the Dakotas, Minnesota, Iowa, Illinois, the upper lake region, and the middle Atlantic states. There is also evidence of a disturbance, probably central north of Alberta, but its extent and magnitude cannot be determined from the data at hand. The barometer is relatively low over southern California. Nearly normal temperature prevails on the Pacific slope. It is cooler than usual in Texas, and warmer than usual in the lake region and in the middle Atlantic and New England states.

WEATHER REPORT

The indications are for fair weather in this district tonight and Tuesday.
