Powers' Ajax Steel Range, \$36 Value

SPECIAL
\$27.75

By Far the Best Range on the Market for the Price

THE AJAX STEEL RANGE is a model of simplicity. The walls are made double, and heavy asbestos is used as an inter-lining to prevent heat radiation. These walls are covered with blue planished steel that will not rust, chip, peel or turn when heated. THE AJAX STEEL RANGE is made to suit the housewife, and every new improvement has been thought out, and each new feature is practical. THE AJAX STEEL RANGE has every new feature, every improvement of the 1908 style. It has a six-hole top, a sixteen-inch oven, large size warming closet and is beautifully nickel trimmed.

Guaranteed for Ten Years

The Celebrated JEWEL Steel Range

A Small Payment Down and \$1.00 a Week

A Liberal Allowance Made on Your Old Stove as Part Payment

No scrap iron used to reduce the cost of castings which enter into the construction of Jewel Stoves and Ranges. They are made from the highest grade of pure gray iron, tested, analyzed and capable of resisting a breaking strain of 2,000 pounds to the square inch. Jewel Stoves outlast all others and give greater satisfaction. Castings do not warp, crack or burn out, and remain in perfect condition after years of use. Every Jewel Range bears the outward evidence of Jewel quality in the clean-cut, easily polished castings and superb finish. Over 3,000,000 in use.

Guaranteed for Fifteen Years

Superior Workmanship and Construction

BODY—Made from heavy grade blue planished steel, double and interlined with asbestos where exposed to the direct action of the fire.
CASTINGS—Made from Kemi-Test metal, the smoothest, toughest and longest-lasting iron ever placed in stoves.
RIVETING—All rivets are driven cold by hand.
FIRE BOX—Extra large and lined with sectional easily removed heavy heat-resisting linings.
GRATE—Our famous JEWEL duplex, made without tracks or frames to warp and crack; can be quickly removed without disturbing the fire box linings; when reversed forms a perfect wood fire bottom.
POUCH FEED AND GRATE DOOR—The entire left end of the range in front of the fire box is cast iron. The pouch feed door lifts for feeding coal, and the grate door, when dropped, exposes entire front of grate for cleaning the fire.
OVENS—Made square, full size, with Dean's patented non-buckling oven bottom. Top protected by special cast plate. Oven thermometer furnished.

Noted for Its Quick and Perfect Baking

Good baking and cooking are dependent on the Range—get a Range that "always works, never balks"; that bakes on oven rack and oven bottom; that gives quality and satisfactory results from less fuel. Large, high, square ovens; are full size and are fitted with JEWEL patent two-piece oven bottom which cannot warp. For more than 40 years they have led in every feature that contributes to fuel-saving and cooking quality.

JEWEL Stoves include many original and exclusive ideas and are made in the most complete line of sizes ever offered to the American housewife.

JEWEL Stoves embody the many features of practical excellence you expect in the product of the world's largest stove plant.

The oven walls are lined with asbestos, concentrating the heat around the oven, economizing heat and making JEWELS quick and perfect bakers.

Easy to operate; a model of simplicity and the handsomest and most durable range on the market. They have maintained supremacy in the face of world-wide competition for more than 40 years. You run no risk when you buy a JEWEL.
