The New Transfer Patterns

(PATENTS PENDING)

DIRECTIONS

Lay the design you wish to transfer face downward, on any flat surface, and dampen the back with water until the outlines of the design show clearly through the paper. A wet cloth will serve the purpose of dampening, but a small sponge is better. Spread the material on which you wish to transfer the design on the table or on any smooth, hard surface; lay the dampened design, still face downward, on the material, cover it with a dry sheet of thick paper or several folds of a newspaper, and rub with a slight pressure, using a handkerchief or dry cloth, until the design is entirely transferred. During the rubbing you may readily see whether enough pressure is being applied by lifting a corner or end of the design and noting how it is taking.

The whole process is very simple and, after a trial or two, you should be able to make a perfect transfer to any kind of goods. Do not wet the transfer sheet too much. Do not wet the material, and do not rub the face of the design with wet or damp fingers.

Several transfers may be made from the same design, it being only necessary to redampen the back of the design sheet for each additional transfer. The design may be readily removed from the material by washing the material in warm water and a little soap. The ink with which the transfers are printed is absolutely harmless, and will not injure the finest fabric.

DESCRIPTIONS

Two very attractive designs for towel ends, bureau scarfs, side board or table covers, are given this week, as well as two sets of scallops which may be used with various pieces.

As shown in the pages the towel designs are repeated from the points indicated. The needle work here is solid stitch with slight padding and the design should be worked on linen, though other material may well be used. The scallop edges will be very effective on the edges of the pieces which are decorated with the other designs.

Since any of the patterns given in these section may be transferred at any time, the sections should be preserved.
