UNWILLING AVIATOR TAKES A FLIGHT

Carried 800 Feet Along Bridge Over Hudson by Kite That's Not a Kite.

New York, Jan. 23.—A huge "kite" flew away with Charles Johnson on the Queensboro bridge and carried him 800 feet. The flight was not as successful as are Wilbur Wright's, for Johnson, unwilling aviator, fell, and he, and three other workmen were hurt.

The big kite was not built for a kite. It is one of the decorations made for the Queensboro bridge celebration committee; is shield shaped, about 25 feet high and 30 feet wide at the widest—a large sheet of canvas nailed to a light frame.

The shield was being taken from the span over Blackwell's Island to the Manhattan side of the bridge, to be placed in position. A long piece of wood is nailed as a brace to the center of the frame.

Holding the shield edgewise by this piece of wood, Johnson and his three companions were carrying it across the space when a squall wind struck the "kite" full in the back, and it soared, of course.

Only Johnson held on to the brace, and up he went with the kite. Edward Peterson, Michael Hogan and another man seized the long piece of rope that trailed from the brace and tried to pull down the imprudent flying machine. It yanked them, as they clutched the rope, across the ice covered bridge as if they were straws.

Sometimes the kite dipped; sometimes soared higher. Once it arose to an altitude of 40 feet. Johnson swore, but he held on for dear life. His yells could be heard on the river; several tugs set up a loud whistling of steam.

It seemed certain that if the wind fell suddenly the kite would crash down on the roadway or against some of the crossbeams or girders. The wind shifted quickly and hurled the kite flat against the railing of the north promenade.

The three men on the rope vainly tried to pull down the kite. Johnson could hold on no longer and dropped.
