Efforts to save the "Arch of Welome" at the union depot for some future usefulness are being taken by the Portland lodge of Elks, the Rose Festival association and the Peninsula Rose association. The matter in all its phase goes before the next meeting of the executive board through letters of appeal

The Elks. for instance, desire that the arch shall remain as it is until the day when the three or four special trainloads of "Antiered Brothers" not only from Portland, but from the entire northwest, shall have been mobilized here early in July for the trip down to Los Angeles, where the next grand lodge convention is to be held. The local Elks lodge is willing to decorate the arch in the official colors and emblems of the order for the period during which eastern delegations to the Los Angeles convention will see it.

The Peninsula Rose association is anxious to have the arch remain intact so that it may garland the huge structure with roses plucked from the gardens of the districts which this association represents. Just as happened last year, the Peninsula people desire to take full charge of establishing floral booths at the depot and to arrange all other details which shall afford a suitable welcome for the thousands of strangers who will be in the city during the week of the festival.

In addition to this the Rose Festival association has notified the city executive board that it is willing to defray the expense of making the necessary repairs to the base and other portions of the arch which have not been completed under the contract, and which have been injured by the elements and other forces since the structure was erected.

Opinion has been rendered by City At-

orner forces since the atructure was erected.

Opinion has been rendered by City Attorney Kayanaugh that it would be strictly legal for the city to pay for the arch at full contract price, provided it were completed according to the terms of the agreement entered into with the architects. There has been much controversy over the fate of the arch, and the bill for the work already done upon it has been held up.

The arch was planned to be finished for the Rose Festival last June, but trouble the contractor had with his men and the subsequent abandonment of the contract altogether left the work unfinished.

A Good Year's Work.

The New York Life Insurance company publishes its annual report in unusual form in another column. The "Plain Talk with Policy-holders," which precedes the usual ba'ance sheet, is interesting in itself, and shows the figures of the latter in their true significance. Nearly \$50,000,000 were paid policy-holders during the year in death claims, annuities, dividends, matured endowments and for deferred dividend policies, and contracts surendered. The company's accumulated funds now exceed \$550,000,000. As President Kingsley says: "Our assets are large because our liabilities are large because we are doing a large work of the kind I have described."

## SOAP LAKE, WASHINGTON

And With These Are Other Elements - Nature Has Combined Them in a Salt That Supplies a Hungry Need of the Human Body

From time immemorial human beings and animals, prompted by cravings of their own bodies and guided by instinct, have visited mineral springs and lakes to drink and bathe in the health-restoring waters. Some of these have been more efficacious and curative than others. None has attained greater fame than Carlsbad, from the days of Rome the resort of health-seeking Europe-the miracle-working waters that have renewed life and vitality to the greatest characters of history, as well as to the

The fame of Carlsbad is now about to be eclipsed. There is a marvelous body of water in Douglas county, Washington, a lake toward which for centuries and ages have been worn by furry paws of animals and moccasined feet of red men paths so deep and smooth that they attest eloquently though mutely the unnumbered throngs which threaded them through vast periods of time. The properties of this lake have only recently become known to white men.

### WIND BLOWS A LATHER

When the wind blows across this lake a lather is whipped on the surface and is swept onto the shore. For ages this lather has crystallized into salt-a soap-like salt of intense curative properties. These salts have been gathered and placed on the market, since which time thousands and thousands have used and been benefited by

Their effect on the human system is like sprinkling water on a dry lawn. The Soap Lake Salts supply a human need. Applied externally and internally, they soothe the surface, blend with the blood, dissolve and neutralize poisons and satisfy a starvation that can be sated by no other known element or substance. No chemist has succeeded in compounding anything possessing the same qualities or properties. The salts afford relief and effect positive cures of troubles which have their foundation in the blood, or in irritation of skin surfaces-either the inside skin (the mucous membrane) or the outside cuticle. For blood diseases, such as rheumatism, scrofula, blood poison, blood impurity of any kind, the Soap Lake Salts afford a quick and harmless specific. They can be taken in unlimited quantities-drunk as freely as water. For skin diseases, such as eczema, itch, poison oak, pimples, inflammation of the stomach, ulcers, etc., they give instant relief from acute symptoms and gradually restore a healthy, normal, wholesome condition.

Every person should learn all about Soap Lake, Washington, as ere long the cures effected by its salts will make it the most famous body of water in the world. Ask for Soap Lake Remedies.
