

On Uncle Sam's Two Huge New Warships the Man Will Be Behind World's Biggest Guns - Their Power and Its Cost.

.

A plea for a special court to try divorce cases, analogous to the juvenile court, is rapidly taking its place an American jurisprudence, is contained in an interesting article by Frederic J. Haskin, which will appear in the next issue of The Journal. The statistics of divorce are appalling. whether viewed from the standpoint of church tradition or from that of charitable regard for those whose personal woes in marriage bonds constitute a total possibly heavier than the inconvenience of society at large due to the derangements of human affairs through divorce. A New York sociologist has come forward with a plan to ease the

ward with a plan to ease the burdens of both society and the burdens of the set burdens of the set burdens of the set burdens of the set both and the total net cost of a single shot well on to \$700. One of these shells would plerce nearly five feet of world ordinary comprehension. The basen of the set building in the set below of the set below by the explosition of 3000 pounds of high grade power. It will represent a destructive force a third present than the classing the guns in the fleet with which Dewey ended forever the Castilian rule in the brilliphines. That time a single gun is fired it the building is fleet in a single second. The second the below of the set of the set below of the second. The present and for the set of the set of

But even this is not the total of them it is about ready for permanent retirement. This means \$650 per mean is 650 per mean if retiremendous total of \$1160 per shot.
 Fouriseen Inch Gun Is the Thing.

Fourteen Inch Gun Is the Thing.

Pourteen Inch Gun Is the Thing. But this is not the end of the possi-bility of gun powder aboard ship. The ravy department is already advocating the 14 inch gun, and it seems but the question of a little time until we shall have a battleship mounting a battery of such guns. During the Spanish-American war the 18 inch gun was tried out, and today we have 32 of them on some of the earlier battleships. But is, mediately afterward there was a re-turn to the 12 inch type at home and abroad. Recent developments in the

buildings are decorated with the na-tional colors. Flags and portraits of the martyr president also are to be seen on private residences throughout the

than the Vermont. Measured by gun power, taking the 10, 11, 12 and 13 inch gons as the ba-sis, the United States is far in the lead for second place in naval strength, and the building of the two proposed 26,000 ton battleships will put her further in the lead. With the authorizations made last winter and the proposed authoriza-tions of this winter, the United States will show an aggregate of 180 12 and 13 inch guns, or nearly one third more than the next nearest rival. **Protecting Mayal Security** schools.

Japan and Russia are the only two

Troop A, the famous "black horse troop" of Cleveland, is to be William H. Taft's personal escort inauguration day. This crack military organization composed of the bluest blood of Cleve-land aristocracy, performed a similar service for McKinley when he was in-

make the 14 inch gun desirable for the new battleships. American gunners are the best in the world, and the greater their advantage over the enemy. The other teason is that the life of a 14 inch gun would be proportionately longer than that of a 12 inch one. The erosion that of a 12 inch one. The erosion caused by the virtual melting out of the bore by fervent heat, would be issened, and at the same time the effective range of the gun increased.
Add One Third for Everything.
The approximate increase in every item would be in the neighborhood of one third. On this basis a 14 inch gun would literally eat into the pockets of the taxpayers. One of these guns would

CHICAGO OPENS

Five Days to Be Filled an operation on a patient suffering from With Celebrations, Culminating Friday.

Chicago, Feb. 8 .- Chicago, the scene of Lincoln's first nomination for the of Lincoln's first nomination for the presidency, the metropolis of his home state and intimately connected with many events of his public career, en-tered today upon a week's celebration of the centennial anniversary of his birth. In compliance with a request from Mayor Busse many business houses as well as all schools and public buildings are decorated with the na-

various clubs, social settlements and churches have arranged for exercises during the first two days of the week. Wednesday and Thursday there will be Lincoln memorial meetings in all the EDNA CLARK AT

The celebration will reach a climax The celebration will reach a climax Friday with four great mass meetings held simultaneously. The prominent speakers at these meetings will include President Woodrow Wilson of Princeton university. Rabbi Emil G. Hirsch of Chicago. President Edwin Earl Sparks of Pennsylvania State college, and John A. MacDonald, editor of the Toronto

French Surgeon Loses Eye, Risking Life Itself-Legion of Honor.

Paris, Feb. 8.—President Failieres, on AERIAL STUNTS OF GREEDY hand has conferred on M. Louis Bazy a medical student, the Cross of the Legion of Honor, for a splendid act of self-sacrifice. M. Bazy, who is the son of a prominent French surgeon, was as sisting his chief in a Paris hospital in

purulent pleurisy. A drop of pus splashed and entered the young surgeon's eye. He knew that the matter was virulent polson, and that dangerous infection must inevitably ensue unless include treatment more available

infection must inevitably ensue unless instant treatment were applied. But he knew also that if the operation in which he was assisting were inter-rupted for a moment it would be at the risk of the patient's life, no other sur-geon being at hand to take his place. He therefore said nothing, and contin-ued his duties until the operation was successfully performed. Only then did he have his eye treated, but it was too late, and violeut in-

Only then did be have his eye treated, but it was too late, and violent in-fection set in. Acute inflammation foilowed, lasting six months, and causing great pain. At length the eye had to be removed. President Fallieres, hearing of the incident, immediately decided that the young surgeon should be deco-rated, without consulting his ministers.

turn to the failed and the short of the facts through their secret abroad. Recent developments in the construction of water tight compart-ments and improvements in armor have tended to make bigger guns necessary. The time has passed when a 12 inch shell can do all the damage desired maintained about the designs of the England is making some new guns probable that America will first have the 14 inch gun. There are two other reasons which the shell can do all the reasons which

By Boiling Grease—Skin All Came off One Side of Face and Head— Tried an Ointment which Made It All Fester-Wee Sufferer Seemed Disfigured for Life.

CURED WITHOUT A

"About a year and eight months ago my baby, aged ten months, was sitting on the mat beside the fender and we were preparing the breakfast when the frying-pan full of boiling grease was upset and it went all over one side of the baby's face and head. One of the family ran and wiped the scald with a towel and you may think what a mess she made, pulling the entire skin off. We took her to a chemist who told us to get a doctor, which w did. He tended her a week and gave me some stuff like lard to put on. But it all festered and I thought the baby was disfigured for life. A woman close beside me told me to try Cuticura Ointment. I used about three boxes and it was wonderful how it healed. In about five weeks it was better and there wasn't a mark to tell where the there wasn't a mark to tell where the scald had been. People used to ask me if that was the baby that was scalded and they would hardly believe me when I told them she was and what cured her face. Her skin is just like velvet and I have never been without Cuticura since. Cuticura cured three other children of ringworm besides, so I have good cause to thank it for what it has done. Mrs. Hare, 1, Henry St., South Shields, Dur-ham, England, March 22, 1908."

CUTICURA

World's Favourite Emollient.

A single anointing with Cuticura Oint-ment, preceded by a hot bath with Cuti-cura Scap and followed in the severer cases by a dose of Cuticura Pills, is often sufficient to afford immediate relief in the most distressing forms of torturing, disfiguring, itching, burning and scaly humours, eczemas, rathes and irritations, permit rest and sleep and point to a speedy cure in the majority of cases, when all else fails.

agents. agents. The new battleships will be more carefully protected below the water line than any others ever built. The increasing range of torpedoes as well as their increased effectiveness, makes this absolutely essential. But recently an American naval officer designed a new torpedo gun. It is nothing less than a small cannon placed on a White-head torpedo. This is started, under 500 pounds pressure, toward a battle-ship. When it touches the hull of the ship the cannon fires its small but

Putting on a Steel Jacket.

Fester — Wee Sufferer Seemed figured for Life.
ED WITHOUT A MARK BY CUTICURA
Warst Carata and eight months ago by, aged ten months, was sitting mat beside the fender and we were ing the breakfast when the frying and beside the scald with a towel and a pressure of 20 tons to the square inch, and it is admitted that it possesses many advantages over the steel jacketed guns will still be in evidence. A 12 inch wire wound gun can withstand a pressure of 20 tons to the square inch, and it is admitted that it possesses many advantages over the steel jacketed guns will still remain the American standard.
It is interesting to note the process to put it is a disfigured for life. A light what a meas she made, the entire skin off. We took her emist who told us to get a doctor, w did. He tended her a week we me some stim like lard to put ut it all festered and I thought by was disfigured for life. A close beside me told me to try

Masts Can't Be Shot Down. The new battleships will be equipped with lattice work masts, similar to those on the North Dakota, which were adopted as a result of the experiments on the monitor Florida. Although the United States was the first to try this idea. France is now going to follow suit, with similar experiments on the battleship Jena, which was sunk in an accident and afterward raised. It is expected the French experiments will decide a number of mooted questions of naval construction. They will also settle many things about gun prac-tice that are now debatable proposi-tions. Masts Can't Be Shot Down.

tions. Some idea of the bigness of the proposed new ships may be gathered by comparison with the Dreadnaught. They will have a displacement nearly one third larger than that vessel. They will be able to fire 12 12 inch guns on a broadside where the Dreadnaught can muster only algebt. To short they dil which do not to the first first and a broadside where the Dreadnaught can muster only eight. In short, they will outclass the Dreadnaught—a vessel which startled the whole naval world two years ago—as badly as the Con-necticut outclasses the lowa. There has been much controversy about the broadside question. The American navy proceeds on the theory that a naval battle will show the two fleets fight-ing on parallel lines, and that the broadside will determine the question. Foreign navies are not so certain about it, and are willing to sacrifice some broadside firing. **England's Two Power Program.** The authorization of the two new

The authorization of the two new battleships will give England another rather severe joit. That country is com-mitted to a policy of keeping a navy 10 per cent stronger than the combined
