

ROUNDUP OF THE WEEK IN STATES OF PACIFIC SLOPE

ACROSS THE OCEAN NORTHWEST FRUITS FIND WARM WELCOME

\$75,000 HOSTELRY COOS BAYS PRIDE

London's Record Market Price Paid for Washington Apples—Infant Industry Gives Promise of Wonderful Development.

Did You Ever Reflect? That the time is here when the world's markets look to the Pacific northwest for their future supply of apples, peaches, cherries and other of the more hardy fruits?

That Washington and Oregon apples are eagerly selected for the markets of London and Liverpool and other European cities at \$4 per box? That thousands of acres in semi-arid sections, considered worthless a few years since, have proved to be specially adapted for horticulture?

By A. H. Harris. 20.—With Washington and Oregon apples selling on the markets of London and Liverpool at \$4 per box, with fruit growers discouraged and destroying the worthless orchards which have been abandoned for some time past, it is apparent that the world will look to the northwest for its future supply of apples, peaches, cherries and other of the more hardy fruits.

To Hood River, Or., belongs the credit of first exploiting fully the fruit industry of the northwest. It was long known as the finest of strawberries and the most delicious of red apples, but for many years it was not known to the world. Mr. Chandler is one of the two largest stockholders in the hotel company.

Where the Hood River orchardist had previously looked upon his orchard land as a luxury for the wealthy, he soon came to look upon it as a source of revenue, with a future of wonderful possibilities. Then the price of land jumped toward the sky and the orchardist saw opportunities for snug fortunes—and the future of fruit growing in Oregon, that is, eastern Oregon, was assured.

The old idea that fruit had to be grown by natural moisture as manifested in rainfall hundreds of feet deep, is not difficult to remember when it was held that fruit grew in the northwest, and had a tendency to spoil. That fallacy has also gone glimmering. Hood River had something to do with it.

Taking a cue from Hood River, "The Land of the Big Red Apple," soon got the word. The orchardist was practically so, and it had not been considered a favorable section for anything save a peach orchard. The orchardist, with once in a while a state politician. Perhaps in this city more than to any other section in Washington.

Light is being thrown upon the apple business on a strictly high class commercial basis. North Yakima was pioneer about 1880 in the development of apples had been retarded somewhat on account of the division of the industry.

White Salmon, Wash., Feb. 20.—The Coos Bay valley are being thinned out to a great extent. The largest catches have been demanded. Last fall apples were sold at 10 cents a bushel. The orchardist is the center for the greatest fruit business in the state, the place upon which it is conducted no longer is so scientific as that in vogue at Wenatchee.

Men and Women Who Were Makers of Oregon History

Engrossed as most of us are in the daily problems of the present, we have little time, nor inclination, for retrospection, other than that of our own lives.

The Chandler, New Hotel at Marshfield.

(Special Dispatch to The Journal.)—Marshfield, Or., Feb. 20.—One of the most important events on Coos Bay for some months past was the formal opening of the new Chandler hotel at Marshfield last Monday evening. The completion of this modern hostelry crowns the efforts of two years on the part of the hotel company.

The new hotel, cost \$75,000 and is one of the most handsome in Oregon. It was erected by local men formed into a corporation known as the Marshfield Hotel Company. E. D. La Chance and H. J. McKown, who came here from the east, will manage the hotel, having taken a 10 year lease with privilege of another 10 years.

The hotel is named for W. S. Chandler, who formerly lived on Coos Bay and had much to do with the upbuilding of the hotel. Besides two general baths on each floor, there are a number of private baths so arranged that practically any room in the hotel can be connected with a private bath, or two or more rooms thrown into a suite.

There are in all 38 guest rooms; 17 each floor. Besides two general baths on each floor, there are a number of private baths so arranged that practically any room in the hotel can be connected with a private bath, or two or more rooms thrown into a suite.

Along in the early evening the lights of the town, as the daylight reveals, clear that civilization has preceded the railroad, and when the stage pulls up in front of the postoffice, the moving picture of the mountain road, with its substantial town, waiting and hoping to be discovered by some railroad magnate, is a picture that is not to be forgotten.

A. J. Goodbrod.

Idaho and Oregon with the regiment. Mr. Goodbrod was in many battles with the Indians, in which a great number of men and horses were killed.

He was mustered out the second time at Camp Blinds, March 1, 1862, after which he went to staging on the Winnemucca road, finally entering the general merchandise and hotel business at Willow Creek, Nev., and continued this business until 1872, when he came to Oregon to stay but one day, going to Walla Walla. He soon returned from Walla Walla to Pendleton, and in July, 1878, returned to the Grand Ronde valley, where he worked for the stage company.

Weds Louise Shoemaker. In 1882 he lived on a homestead and had his first experience in farming. In the same year he purchased the Centennial hotel, in this city, and had charge of it until 1890, selling it to Henry F. Stuewe.

After purchasing the hotel Mr. Goodbrod, who was a bachelor, became aware of the fact that he needed a wife, and married Miss Louise Shoemaker, whom he had known for years and whose parents lived at Hy's Point, near Cove, Or.

After selling the hotel Mr. Goodbrod served as chief of police of this city for three years, then buying and joining the fruit throughout the valley. During the years he was buying fruit he purchased the old Dan Moore place and built a residence, which he now has a shipper, and still continues growing the choicest fruits of the valley.

Active in Lodge Work. In 1876 Mr. Goodbrod joined the Red Men lodge and a few years later joined the Odd Fellows. He is also a member of the G. A. R. and has served as department commander in Oregon since 1900, and at present is past commander of Post No. 18 of this city.

Mr. Goodbrod owns one of the most beautiful places in the state. He has quite a fruit farm on which all varieties of fruits are grown. When interviewed in a perfect health, he is a man who has had a successful life, and at present is past commander of Post No. 18 of this city.
