

RYAN PLACE

On the West Side, High Elevation, South of Council Crest

No crippled car service nor open bridges, but to the contrary the cars and service are the best on the Pacific coast. The bridges may be improved, as may the car service, but they always must open—REMEMBER THAT.

Acres for the Price of Lots

To think of beautiful high, level tracts, averaging about 200x200, within eighteen minutes of the courthouse, at prices of east side lots!

And why? You will not admit that property on the east side has or will ever have the value of west side property.

Now Think

RYAN PLACE is on the Salem Electric. Present service thirty cars a day, and additional cars being added right along. Five-cent commutation fare, and THE CARS ALWAYS RUN.

You must see this beautiful land to appreciate it. Come out Sunday. There will be some one on the premises to show you the property, or come to our office any day during the week and we will take you out.

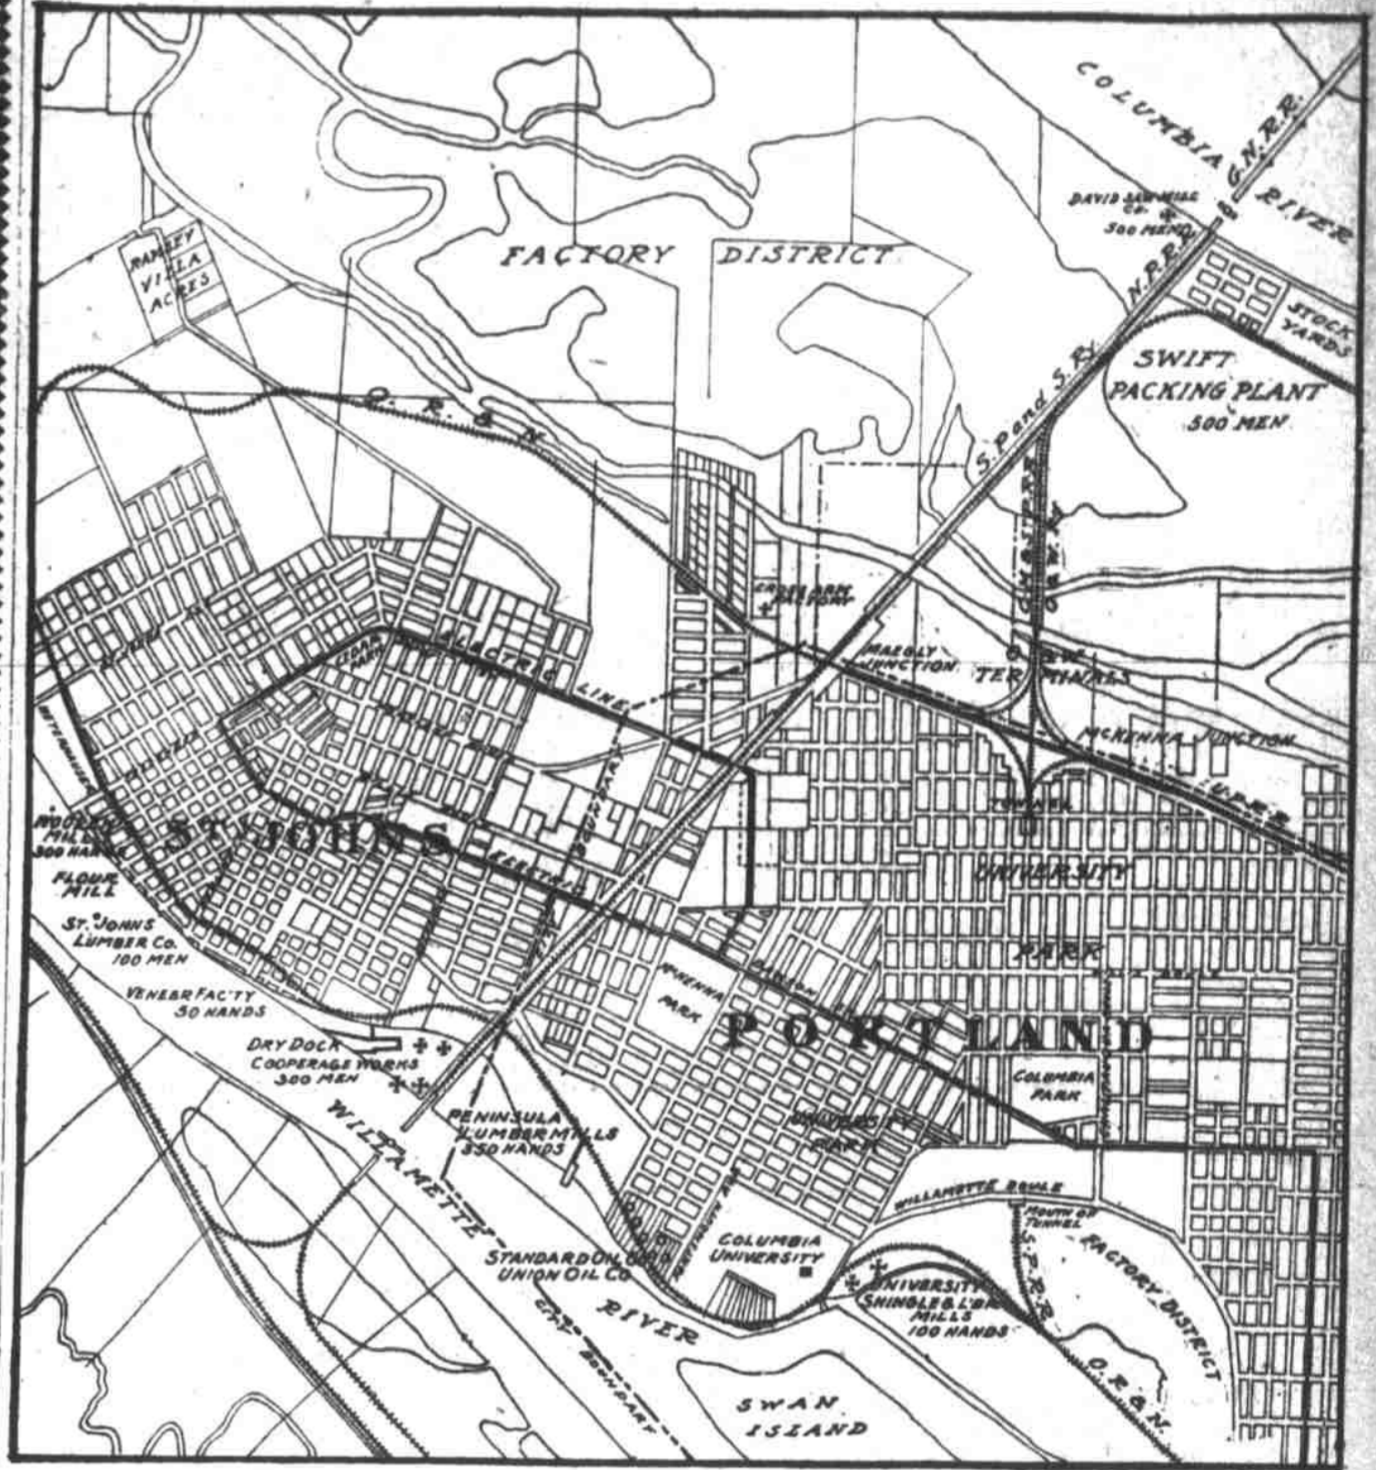

Take the Car at Front and Jefferson Streets and Get Off at RYAN STATION

YOUR COMMON-SENSE WILL DO THE REST

WE HAVE NO PROPERTY FOR SALE

We cleaned up a handsome fortune within the past twenty years by investing in Peninsula real estate, and you can clean up a million dollars within the next twenty years by the same methods. We pay for this space only for the privilege of telling you how to make a fortune. Years of rigid economy have deprived us of all taste for expensive luxuries, therefore we get more pleasure out of our money by spending part of it for advertising space to tell you how to make a fortune than in spending it for anything else. We have acquired the advertising habit and can't break off.

UNIVERSITY PARK

is the business center of the Peninsula. If you will place your money on well selected property in that vicinity it will grow into a fortune within twenty years. WE HAVE NO PROPERTY FOR SALE.
