True happiness is of a retired nature, and an enemy to pomp and noise; it arises, in the first place, from the enjoyment of one's self; and in the next, from the friendship and conversation of a few select companions. False happiness loves to be in a crowd, and to draw the eyes of the world upon her. She does not receive any satisfaction from the applause which she gives herself, but from the admiration which she raises in others .--- Addison.

#### Fads and Fashions.

TTEW YORK, May 22. - Subtle changes are noticeable in the latest patterns that came from Paris during the present week. There can be no doubt that the

skirts are becoming fuiler, although the increase in fulness is but slight. The latest fashion rumor, however, is that early Victorian styles are to be made much of. After the slender lines of the present style the gay colors and ruffles that go with the promised style will seem rather odd. Such gowns will call for a large amount of material, and 20 yards or more will again become the usual length of material required for a

There is a certain rich luster to slik ashmere that is not obtainable in other materials. This accounts for its popu-larity, and no doubt will make it one of the foremost fabrics of the coming

ason. The continued vogue of the princess gown materially affects the prominence of the coat and skirt suit in the ward-

# Wonders of Science

(Contributed to The Journal by Walt Mason, the famous Kansas poet. His prose poems will be a regular feature of this column in The Daily Journal.)

On the plains of Grandoldtexas they will build a mighty lower, where the heavens may be studied by a learned astronomer, who will carnestly endeavor to keep cases on the stars, and will special effort to communicate with Mars. I have known so many wonders since my journey was begun, that I wouldn't be astonished if this latest trick were done. I have lived to see the "wireless" make the sons of man rejoice; I have heard a weird contrivance reproduce the human voice; I have gazed at ships that travel at the bottom of the sea, and another shin that journeyed far above the highest tree. I have seen the latest triumphs in the way of women's hats, and when neople speak of marvels, I can only answer "Rats!" So it will not much surprise me if we bridge the void unknown, and are talking with the Martians, pretty soon, by telephone; and the first thing that they'll ask us, when the wires are working right.
