Graduating Class Revolts Against Alleged Favoritism and Board Is Mandamused to Issue Diploma to C. W. Gore.

(Special Dispatch to The Journal.) Medford, Or., June 12.—To force the board of education of this city to issue a diploma to Clarence W. Gore, member of the high school graduating class of 1969, mandamus proceedings were today begun before Judge Hanna in the circuit court, Attorney Porter J. Neff repre-senting Gore, who with two other stu-ents claims to have been unfairly dealt

senting Gore, who with two other stu-dents claims to have been unfairly dealt with at commencement. Gore and two other students failed to appear at the formal graduating exercises, and the board of education refused to deliver the diploma to which each was entitled. The absence of the students was in-tended as a protest against alleged fa-voritism and discrimination by one of the instructors toward Carl Glasgow, a member of the class, who was said by George Merritt, his instructor, to have "flunked." Glasgow had expressed ex-ception to cartain conduct on the part of Merritt toward certain girls, mem-bers of the graduating class, also. **Principal's Besignation Equested**.

Principal's Resignation Requested.

The actions of Instructor Merritt were so grievous, it is stated, that Miss Warner, principal of the high school informed Superintendent Smith of the dity schools, that she could not overlook them, whereupon she was quietly asked for her resignation. Things were get-ting warm in educational circles when Merritt tendered his resignation at the suggestion of the board. Added to the suggestion of the board. Added to the complications came the organized effort on the part of the graduating class to rebuke the actions of the faculty, or at least a member of it. In pot allowing Glasgow to pass the examination and take his diploma with the class. - Petitions asking the board of educa-tion to reinstate Miss Warner are being stimute by nearly all the students of the

tion to reinstate Miss Warner are being signed by nearly all the students of the high school, and citizens are loudly de-nouncing the arbitrary methods employed in the controversy. Perhaps no case parallel to this has been recorded in the history of Oregon, particularly the ac-tion in court, and it will be watched with interest. The school trouble has aroused mublic feeling generally and ٠ ٠ used public feeling generally, and mises to be fought out bitterly. .

(United Press Lessed Wire) New York, June 12. - Without an unce of iron or steel in her con-

ounce of iron or steel in her con-struction excepting in her auxiliary en-gines, the queerest suiling vessel of modern years was launched at a Brook-lyn building yard today and now lies in the Tebo yacht basin, waiting for the stepping of her masts and the comple-lion of her equipment. The odd ves-sel is the non-magnetic yacht Carnegie and she is built especially for a mag-netic survey of the earth wilden will mean continuous cruising for the next. ean continuous cruising for the next

years. The Carnegle, as she lies waiting for er equipment, looks about as big as lifeboat on one of the great ocean ners. When her masts and spars are a place she will have a length over il of 201 feet. The Carnegie is built throughout of

(Hearst News by Longest Leased Wire.) Washington, June 12.--William S. Rossiter, chilef clerk of the census bu-reau, has handed in his resignation to take effect when the successor to the former director of the census, S. N. D. North, takes effect. It is denied that Rossiter's resignation is due to a feeling of loyalty to his former chief, who was practically forced out. The Carnegie is built throughout of the staunchest and firmest timber ob-tainable. All of her woodwork con-forms to the requirements of the Amer-ican Bureau of Shipping. The Carnegie's work is to be the cor-rection of certain errors which are known to exist in the charts which show the variation of the compass. These charts were made from data obtained by vessels which had iron in their con-struction and which were magnetic. The work will be done under the di-rection of Dr. L. Bauer, director of the department of terrestrial magnetism in the Carnegie institute at Washington. An observatory with revolving domes 1 is a feature of the vessel. It is built on the main deck amidships and gives a the vessel the appearance of a miniature monitor. out. The resignation of Chief Clerk Ros-

out. The resignation of Chief Clerk Ros-siter greatly embarranses the adminis-tration in the taking of the census. Next to former Director North, Ros-siter is the best posted man in the country on census matters. He has had 11 years' experience in the office, and it was hoped that he would be a valuable aid to E. Dana Durand, who has been appointed to succeed Director North. With Rossiter gone, two inexperienced men, Mr. Durand and Warren R. Choate, of the bureau of corporations, who is slated to succeed Rossiter, will have to undertake the hig job without having had any previous experience. The census taking should be under way within a very short time. Mean-while the appointment of Durand is held up in the senate while Senator La Fol-lette completes an investigation of the census office which he is making. No concealment is made of the fact that the situation is becoming serious. REAL HEN PARTY THIS WINDY CITY SOCIAL FUNCTION (United Press Leased Wire.)

The answer is, get a Gas Stove or Range that is Up to Date. The trouble with most Gas Ranges is that they do not burn all the gas that passes through the burner. The gas is partly burned and partly decomposed. The result is that one-fourth more gas is used than is necessary, and the decomposed gas that escapes into the room causes in-jury to the health of the housekeeper, who thinks that the fault is in the qual-ity of the gas. You can save your who thinks that the fault is in the qual-liv of the gas. You can save your health and save your money, if you will try one of our DIRECT ACTION GAS RANGES. These we sell on trial, and if they are not exactly as repre-sented, money refunded.

(United Press Lessed Wire.) Chicago, June 12.—A national depart-ment of public works, with the develop-ment of the country s waterways as its chief care, is proposed by the advocates of the Lakes-to-Guif Deep Water asso-clation, following the refusal of army engineers to approve their plans. The suggestion orliginated with Freedlent W. K. Kavanaugh of the association, who believes the movement he heads abould not depend upon the war depart. * Prizes were offered for the best limerick in praise of the hen, for the best recipe for who could best tell how she would kill a chicken if she had to. The prizes were prints of chickens for the men and feather pillows and egg china for the who believes the movement he heads should not depend upon the war depart-ment, but on men more in toneh with the commercial needs of the country.

The army engineers recently presentof an adverse report on the associa-flon's project to deepen the Chicago river and canal and the upper Missis-slppi so as to afford a 14-foot channel from Lake Michigan to the Guif of Mexico

Speaking of his new idea today Presi-

Speaking of his new idea today Presi-dent Kavanaugh said: The head of such a department should be a cabinet officer, a civilian and with civil engineers and not army engineers under him.
