BALLINGER'S TOUR INCLUDES KITTITAS

Secretary of Interior Will Visit Cascade Project—Ontario July 23.

Secretary H. A. Ballinger.

Ontario, Or., July 21.—Secretary of the Interior H. A. Ballinger will arrive in Ontario at 10 o'clock Friday afternoon, July 23, on the east bound train, instead of Saturday, the day first set for his visit. Four cars have been chartered to bring the delegations from Vale, Willow Creek and Bully Creek to this city. Weiser and Payette will send large delegations on the regular trains.

Ellensburg, Wash., July 21.—Richard A. Ballinger, secretary of the Interior, who is in the west inspecting proposed irrigation projects in Washington and Oregon, will be in Ellensburg about August 1, to look over the Kittitas project. The scheme will take water from the lakes in the Cascade mountains and develop 200,000 horsepower, which will be partly used to electrify the northern Pacific and Milwaukee railroads and then to water 55,000 acres of land in the Kittitas valley.

Government engineers under the direction of H. M. Baldwin, builder of the Boston sea wall, are in the valley locating the ditch lines. Mr. Ballinger will be the guest of Representative J. C. Hulse, while in the valley and will spend several days in the mountains looking over the reservoir sites, and in the valley viewing the lands which will come under the proposed ditch.

CROWDS THROUGH BIG CARNIVAL

Tonight at 7 o'clock the biggest free attraction ever pulled off in this city to entertain the public will occur at the midsummer carnival under the auspices of the Catholic Young Men's club at their grounds, Stanton street and Williams avenue, Upper Albina. Two contestants are entered for this event, Captain Carlos Wilder and Professor Charles DeNons, acrobats of marked ability.

The ascension of two mammoth gas bags will take place at the Midway on the show grounds sharp at the scheduled hour.

Last night a large crowd was present

stopping on his return at Sisson and possibly at Klamath Falls. He will be accompanied by Mrs. Benson.

This will be the first vacation of any kind that the governor has taken for more than a year. The governor will visit relatives in San Francisco and at his own home in San Jose. Upon his return he will inspect the central California fish hatcheries at Sisson and if time permits will go to Klamath Falls for a short visit with his brother, Judge Henry L. Benson.

doing justice to the many opportunities presented them for amusement. Don Fulano, the educated horse, enjoyed the heaviest patronage of any of the Midway attractions. This little animal shows remarkable intelligence and many are the rounds of applause handed out to him by an admiring audience, during his performance of many difficult stunts.

Tomorrow evening the Woodmen of the World will visit the show grounds in numbers as will members of the Cathedral parish from the west side of the river. The management has thrown open the main entrance gate, free of charge, for afternoon performances for the balance of the week. Any railway car line in the city will transfer to "U" car line to the show grounds at Stanton street.

Miss Isetta Jewel and her party returned last night from a 500 mile automobile trip along the coast. The party left a month ago and while the others visited the fair at Seattle Miss Jewel sailed for Alaska, visited Sitka, Alaska, and Sitka. On her return to Victoria, B. C., she was met by the party in the car and thence they went to Vancouver and home again. With Miss Jewel were her mother, her younger sister, Miss Hazel Jewel, and Mrs. J. W. Baakey.

Become Part Owner in the Famous Lowsdale Orchards

This famous fruit property has been divided into individual parts, purchasable now in multiples of \$100, either for cash in full or upon the periodical payment plan.

These profit-sharing bonds are as definite an ownership as a deed would be to a fruit tract of your own, proportioned upon the amount of your investment.

Bonds may be recorded, transferred, used as collateral security; and they increase in value as the profits from the orchard and the value of the land increases.

Participation in the profits from an orchard 18 years old is a far more desirable investment than to attempt to buy and develop a tract of your own and wait years for profit.

Over 300 acres of the total 649 now in bearing. The balance to be cleared and set to fruit as soon as possible, largely increasing profits and land values.

A complete set of literature, describing the orchard and the details of the bond offering, will be forwarded to any address free upon request.

THE GRAND

WEEK OF JULY 19, '30

BREWER AND MAMMON	McDevitt & Kelly; Jure Sanford; Five Juggling

A Sure Sign of Prosperity

is seen in the hosts of eastern people coming into Portland on every train—and they don't take the next train out either. 2500 of them come to stay with us every month.

What are we going to do with them?
We're going to sell them building lots, build their homes and set them at work! You don't believe it? You're a pessimist. You don't belong in Portland where we get up every morning, take a long breath of God's free air, and thank our lucky stars for having guided us out to this great country where great things are really done. Take a hitch in your belt and right about face! Now you're straight—you've only been headed in the wrong direction—that's all. Now you're in shape to get the right perspective on our Westmoreland proposition. But there—we're talking shop now, and we didn't mean to. But before we sign our names we want to tell you behind our hand that it's a mighty good thing—Westmoreland is. We know it. You're going to, or you're going to be sorry.

PORTLAND, OREGON

Automobile Telephone Light—R. H. Hallock, special tax agent of the O. R. & N. and Southern Pacific lines in Oregon is the inventor of a little device for use on automobile telephones and through which it is possible, by turning on the light to get any number, first from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device from the telephone book and then on the dial without fishing around in the dark for the usual electric or gas fixtures or without breaking off the head of a dozen matches. He received his patent yesterday. The light is placed behind the dial of the phone and fits into the opening of a little device
