

CHEERING CUP BREWED IN CEYLON

Great Center of Tea Culture—Plant Makes Its Raisers Rich—Dime a Day Is High Wage—How the Leaf Is Picked and Cured.

Leaving Ceylon with its spicy and pleasing prospects, its tea leaves and its discontents, Mr. Haskin will tomorrow set out on the road to Mandalay. He will describe the Shwe Dagon at Rangoon, the oldest shrine in the world, and the happy people who abide around and about it—happy not so much by reason of what they have, but almost altogether because they don't want anything and are glad of it.

By Frederic J. Haskin. Washington, July 27.—A fungus growth which appeared on the leaves of Ceylon coffee plants 40 years ago, and within a decade almost killed a great industry, caused Ceylon to become famous as a producer of tea. British planters, fleeing disaster, made experiments in the early seventies, and the result was that before many years the sloped great tea estates replaced the coffee plantations. Today "Ceylon tea" is familiar to the markets of the world, and many merchants of the younger generation are unaware of the youth of the industry.

In the straits of Colombo one sees packages of tea bound for the waterfront in strange looking carts drawn by white humped bullocks. These carts, with their characters for decorative effect and for the cure of rheumatism, it is not until he begins to ascend the mountains toward the quondam capital of the Kandyan kings that the visitor sees tea trees growing and picking that make the tea of commerce. The tea industry is picturesque. From the time the tea tree sprouts above the soil until the dried leaf reaches the lighter that takes it to a cargo boat in the harbor, it exists in an environment all its own.

Tea Grows in the Hills. As the higher hills are reached the rice fields disappear. The regions in which tea reigns supreme are mountainous and occupy approximately one-seventh of the area of the island. Although Ceylon is only a few degrees from the equator the tea country boasts cool nights throughout the year. As the altitude increases the climate becomes more temperate, and at Nuwara Elyia, 6200 feet above sea level, the mean temperature is 57 degrees Fahrenheit.

Tea planters who reside in the highlands and spend most of their time in Colombo upon business or to enjoy social contact with members of an European colony larger than can be found in the country, are prosperous overlords. It is no wonder that the great southern planter in the United States in ante-bellum days. They watch the fluctuations of the American stock market, and complain of hard times, their whiskey and soda, but they live like princes and are addressed as "Master" by the armies of Ceylonese and Indian coolies, they employ.

The Day's Work of the Laborer. At 6 o'clock in the morning all of the employees, many of whom are women and children, are assembled near the tea factory by the blast of a horn. Divided into gangs and assigned to taskmasters or "rangues," those who work in the fields are sent to their tasks. Under the supervision of a "conductor," corresponding to an overseer, the taskmasters are kept on the alert. When the day's work is in progress the owner, or superintendent, returns for his chota hazari, or "litter," and he visits the factory, and later in the forenoon he inspects the fields. At 11 o'clock the laborer is given breakfast, and his afternoon is usually given up to attending to his correspondence, or to his work in the field. The "time" of each is marked in the check book they go to the "lines" which are the "lines" of the old-fashioned southern plantations.

Exports Paid 3 1-3 Cents a Day. During the first two years of its life the tea tree undergoes rigorous pruning. The trees of the first crop are between 3000 and 4000 trees to the acre the pruners are an important factor in plantation. When the trees are ready for plucking the pickers, mostly women and children, invade the plantations. The pickers are selected the delicate leaves at and near the top of the shoots, and for this delicate work they are paid 3 1-3 cents in Ceylon coinage, the equivalent of 3 1-3 cents in American money. This is a high pay in Ceylon, but not so high as in the United States, where a woman picker, under parental direction, the parents are careful to see that the child's earnings are at the rate of 3 or 4 cents a day for each urchin. Sucklings are taken to the fields by their mothers, and when they get large enough to endanger their lives by crawling about where the tea bushes are, the mothers chide them for their "cumbly" and "lumpy" ways. A child who is found in the bushes cannot be employed by tea-pickers.

Where a Dime a Day Is Worth. Because of the chance for high wages, and the opportunity to save money and return home to become landowners, families of the southern Indian go over to Ceylon in great numbers to earn a few cents a day more than the wages of a woman picker in the United States. A child who is found in the bushes cannot be employed by tea-pickers. THE STRANGER WITHIN OUR GATES

"It doesn't seem possible that there is so much undeveloped territory in the United States. Why, to a resident of Vermont who has never been away from the New England states the vastness of the great west is really appalling."—Carl D. Hyde, Rathdrum, Vt.

Ray F. Stewart, Wapiti, Arizona: "With irrigation we can raise oranges and lemons as easily as does California, that is in certain portions of the state. Of course, up in the White hills I don't suppose we could raise 'em, neither can we get water for irrigation purposes here, but the state will eventually make California sit up and take notice. See if it doesn't."

"Chico will be the leading city of northern California, all right," said A. D. Beeson at the Imperial. "It is already the best city and is growing faster than any of them."

"The sugar beet is making the southern part of Idaho and northern Utah," said Hiram A. Snow, Snowville, Idaho, at the St. Charles today. "I remember when the people in that section were almost destitute. Now but few of them are considered in poor circumstances."

W. R. Sanders, Challis, Texas: "There cannot help but be plenty of prosperity for years to come in the United States. Things never looked better for the farmer and the future—the distant future—looks exceedingly bright. The southern planter is very prosperous this season."

"There seems to be good in everything if you look at things in the right light," said Victor Brown, Bay Center, Wis. "The automobile did not altogether take the place of the horse, but furnished employment for thousands of men. All the labor-saving devices help to save labor on the job for which it was intended, but it makes labor in other ways. I'm not much of an anarchist because I am not a pessimist."

PROFITS FROM GOOD HEALTH

Are Always in Excess of Other Investments of Whatever Character, Considered From Any Standpoint.

In the Saturday Evening Post of July 7th Mr. Isaac Marcossion, speaking of trust methods of retailers, describes how every applicant for a position as clerk in the institution under discussion must undergo a thorough medical examination. The reason given for this is that every sound man is worth building up in business, while the weak or diseased man is not. A man who is ill or weak cannot be perpetually cheerful, and a good clerk or successful business man must be. Besides it takes time to impart

business methods to beginners and if their health is such as to contract colds or debility from slight exposure, it is a question of only a short time till the individual will have to go to bed or lay-off from work at the expense of all the time and efforts to develop his usefulness.

Insurance companies, railroad companies, and, in fact, all institutions assuming risk or employing men are rapidly adopting this line of reasoning. One of the most frequent causes of rejection by the U. S. Government and large institutions like railroads, is

NOT A DOLLAR NEED BE PAID UNLESS CURED.

Varicose Veins of Men

but I will guarantee under a forfeit of any reasonable amount that after my treatment for this condition, any patient who has previously been rejected on this account will be promptly accepted. This has actually happened in nu-

merous instances, because my method of curing this ailment is known to be permanent and complete. Announcements in the daily press and the comment of specialists all over the country concerning my cures for

Blood Poison

has taken a wide range, and many unsuccessful attempts have been made to duplicate the treatment, but the original secret is still mine and can be obtained from no other source. The

"Talks on Blood Poison" that you frequently see advertised by competitors was first copyrighted by me through Attorney A. J. O'Brien in my little booklet, "Private Diseases of Men," ten years ago and

appears in my latest book of 950 pages that adorns the desk of many specialists of the country. In the treatment of nerve strain

Vital Weakness of Men

and the long train of distressing complications, such as loss of memory, despondency, gloomy forebodings, specks before the eyes, bad dreams, as well as the prevalent forms of INFECTIOUS DISEASES, RUPTURE, FISTULA, PILES and all pelvic ailments of men are handled by me with consummate skill and success acquired through years of research

and experience. To the individual seeking relief from any of these disorders it is simply a question of whether he desires service from a recognized authority or from some one of less experience and ability. If you will come to me I can demonstrate to you how I am taking broken down wrecks of humanity from every walk of life and making them as vigorous and

healthy as their fellows. I don't care what has caused your trouble or who has failed to cure you, I will cure you completely and permanently or not charge you a cent for my services. My little booklet contains valuable points that you ought to know, and if you can't call, write for it. I will mail it under plain cover free from public observation.

Consultation and Examination Free

Our fees for cures are lower than the general family physician or surgeon and our services far superior. Medicines furnished

from our laboratory for the convenience and privacy of our patients; from \$1.50 to \$6.50 a course. If you cannot call, write for our

free self-examination blank. Many cases are cured at home. HOURS—9 a. m. to 8 p. m., and Sundays from 10 to 12.

St. Louis Medical Co. 230 1/2 Yamhill Street Portland, Or.

MY SPECIALTY MEN'S DISEASES

There is no ailment peculiar to men that I cannot cure. For twenty-five years I have devoted my entire time and energy to the treatment of men's diseases.

My methods have been perfected by actual experience, with a thorough theoretical knowledge as a basis. I am the only physician thoroughly and permanently curing those functional derangements due to inflammation of the prostate gland, which depress the entire nervous system, and my success in overcoming such cases has placed me foremost among specialists treating men's diseases, and has brought me the largest practice of its kind in the west.

Every afflicted man is invited to write me a description of his case. Such is my knowledge of men's diseases and so perfect are my methods of treatment, that I am able to effect cures in all ordinary cases without resorting to the knife. All correspondence strictly confidential. Those visiting Portland may feel free to call at my office for personal consultation.

YOU CAN PAY WHEN CURED

The vast multitude of men who have taken my treatment have not been disappointed. They know that I do not promise more than I perform. To them I have actually illustrated in the cure of their own cases the truth of what I claim, namely, that my treatment is as certain to cure as it is that my patient engages my services and follows my directions. My success is due not alone to education, experience, skill and scientific equipment, but to the fact that I limit my study and practice strictly to diseases and weaknesses of men. To make mistakes alone I have earnestly and exclusively devoted 25 years of my life and on them all my faculties are concentrated.

Contracted Disorders
Every case of contracted disease I treat is thoroughly cured; my patients have no relapses. When I pronounce a case cured there is not a particle of infection or inflammation remaining, and if you fear the harsh methods that the disease will return in its original form or work its way into the general system. No contracted disorder is so trivial as to warrant uncertain methods of treatment, and I especially solicit those cases that other doctors have been unable to cure. I have the largest practice because I invariably fulfill my promise. My Colored Chart showing the male anatomy and affording an interesting study in men's diseases free at office.

Varicose Veins
Without using knife, heat or caustic, without pain and without detention from business, I cure Varicose Veins in one week. If you have sought a cure elsewhere and been disappointed, or if you fear the harsh methods that most physicians employ in treating this disease, come to me and I will cure you soundly and permanently by a gentle and painless method. Don't delay. Varicose Veins has its dangers and brings its disastrous results. If you will call I will be pleased to explain my method of curing.

OBSTRUCTIONS—My treatment is absolutely painless, and perfect results can be depended upon in every instance. I do not cut or dilate whatever.

An Electric Wonder Cures When All Drugs Fail

There is no need of rubbing your stomach with drugs, trying to conquer a pain or overcome some chronic ailment. No need of doctor and drug bills, for here is a remedy that helps nature cure.

You know that electricity is life—the mysterious force that digests your food and converts it into blood and bone tissue and muscle, and supplies the brain with power to think. It is electricity that keeps your heart going, your blood circulating and the various organs performing their functions like so many machines.

If you are sick or weak; if you have rheumatism, (umbago, nervous debility, loss of power, or stomach, liver, kidney or bowel trouble, it means that some part of your body machinery needs electric energy. Electro-Vigor will restore it.

Electro-Vigor is a scientific appliance for saturating the body with electricity while you sleep. It is not like electric belts, faradic batteries and other shocking machines you may have seen or used. Electro-Vigor does not shock or burn. The current is powerful in its action, but is soothing and pleasant to the nerves. For hours at a time, Electro-Vigor sends the glowing electric fires coursing through the nerves and vitals, renewing their energy and giving to every weak organ the power to do its work as nature intended.

Let me prove to you that Electro-Vigor does all I claim for it. What better evidence could you ask for than the testimony of honest men and women whom it has cured?

Lyons, Or.—"Electro-Vigor has strengthened my weak nerves, and I am no longer troubled with pain and stiffness for Electro-Vigor has limbered me up and I want to take this opportunity to thank you for your careful attention to my case. Yours truly, W. GARDNER."

GET IT FREE
Cut out this coupon and mail it to me for my free 100-page book about my treatment. This book is beautifully illustrated with pictures of well built, robust men and women, showing how Electro-Vigor is explaining many things you should know regarding the cause and cure of disease. I'll send the book, closely sealed, absolutely free.

CREAMERY REOPENS IN COLUMBIA COUNTY
(Special Dispatch to The Journal).
Mist, Or., July 27.—The creamery belonging to the Nehalem Valley Cream Association of this place will open for business August 2, with Fred Mann, formerly of a Portland creamery, and E. F. Messing of this city as managers. The creamery, which was closed November when the former manager was succeeded with several hundred dollars, having the association in bad shape financially. The creamery is proposed power canal at Triangle Lake, 35 miles west of Eugene. The suits are against the Creamery Company, a road company and Thomas H. Watkins.

CONDEMN LAND FOR POWER CANAL
(Special Dispatch to The Journal).
Eugene, Or., July 27.—The Pacific Electric Power Company, headed by W. S. Spencer, a millionaire copper miner and manufacturer of Cincinnati, has begun suit in the circuit court here to condemn a belt of water for the company's proposed power canal at Triangle Lake, 35 miles west of Eugene. The suits are against the Creamery Company, a road company and Thomas H. Watkins.
