Oak Creek, Or., Aug. 7.—An investigation this afternoon established the fact that Charles Hendrickson, who this morning shot and killed his cousin, Miss Ida Erickson, because she would not marry him, and then shot himself, lay in hiding in the underbrush near the Erickson bome Friday night, waiting for the girl's father and brother to leave the house for the day's work in the harvest field. Lena Erickson, the younger sister, who was at home when the murder was committed, is still prostrated and unable to give her version of the affair.

It developed this afternoon that Hendrickson, after shootling Ida Erickson, wrote a note to Otto Erickson, the girl's brother, before leaving the house to go to the spot some yards distance where he committed suicide. In a note Hemdrickson said he loved "Ida" and could not live without her; that he had decided to end it all and "take her with me." The note is written in Swede. He also wrote that he threw sway \$150 just before shooting himself, but search falled to reveal the money. Hendrickson and the girl were engaged to be married when he left here last winter, but the girl's father had a very poor opinion of him and it is thought he induced his daughter to break the engagement. When Hendrickson went to the Erickson home Friday he handed the girl a postal which she had sent him and demanded that she give back the ring and watch he had given her. This she did. Otto, Erickson would not tell the full contens of the letter, so Sheriff Fenton brought it to town for trainslation. All of Hendrickson was a cousin. Hendrickson placed the buillets with which he killed himself within half an inch of where he shot the girl. Both bullets entered just below the heart and lodged against the shoulder blade.

What Butler's Decision Means. Porter Brothers have opportunity to prove conclusively whether they intend building a railroad into central Oregon.

By dissolving injunction secured by the Deschutes Railroad company, in behalf of Twohy Brothers, contractors, against Porter Brothers, who presumably are representing the Oregon Trunk line, Judge Butler "unties" Porter Brothers' hands.

They may again establish their blockade on Harriman's \$10,000 supply road from Grass Valley to Horseshoe Bend, the key point to the Deschutes railroad route; bring to a standstill the Harricontractors' construction man work; rush in crews and equipment in the interim and acquire valuable rights of way up the Deschutes canyon while the Harriman forces are seeking to again open up their supply road by condemnation suits.

Chicago, Aug. 7.-The crisis in the streetcar strike is believed tonight to have passed. Following conciliatory conferences late today between the Chicago City Railway company and the City Railways company and representatives of their employes, mass meetings of the employes were held in various parts of the city to discuss concessions said to have been offered by the traction company.

The apparent eagerness of the traction officials to avert a strike if possible has impressed the union leaders, and they went to tonight's meetings with avowed intentions of advising a

# **UNDER ARREST**

Alleged He Took Land Acknowledgments After Books Were Closed.

Coeur d'Alene, Idaho, Aug. 7.—A. Grantham, one of the designated notaries to receive applications for land on the Coeur d'Alene Indian reservation, was arrested today for taking acknowledgments after time for same had elapsed. The complaint against him was preferred by James W. Witten, superintendent of drawing.

Judge Witten suspected Grantham's notarial work was not altogether legitimate, and with the view of bringing about his apprehension turned the case over to secret service men stationed here during the registration. The secret

about his apprehension turned the case over to secret service men stationed here during the registration. The secret service man appeared before Grantham this morning at 10 o'clock and represented that he wanted to register as agent for an old soldier by the name of Frank Wikox at Fairfield, Neb, and the scknowledgement, so it is alleged, was taken by Grantham and dated August's. The application, together with the other papers, were then turned over to Judge Witten, and after consultation with Prosecuting Attorney Potts, he preferred a complaint against Grantham. The offense is a misdemeanor under the state laws, and the case will be heard Monday morning at 10 o'clock.

Mr. Grantham when seen with relation to the subject stated that he was innocent, but would not discuss it further than that.

Grantham's ball was fixed at \$100, but up to a late hour this evening he had not been able to furnish the money.

after President Taft reached here to-Beverley, Mass., Aug. 7.—Two hours after President Taft reached here to day he was knocking the ball about on the Myopia golf links. He won his game. The president and Hugo O. Johnstone were pitted against F. Ogden Horstmann and Robert Taft and the final score was 2 up with one to play. The golf game and a motor ride with Mrs. Taft this evening were the only diversions the president indulged in today. In fact, the daily game of golf will be the chief feature of every day but Sunday during the six weeks that will intervene before he departs on the tour of the country in September.

Mr. Taft found Mrs. Taft so greatly improved in health that she was ableto meet him at the depot on his arrival. She and Mrs. Moore, her sister, rode out in the Taft carriage and were waiting when the presidential train pulled in from Boston at 8:34 o'clock this morning.

Rearty Greetings.

Hearty Greetings. With a hearty exclamation of, "Why, Nellie, my dear, this is a great surprise and a bappy one," the president leaped from the platform of his car, gathered his wife in his arms and embraced her in the good old fashioned American way, while the thousands at the depot who stood around, cheered him justily.

## WOMEN LOCKED IN WITH BEAR

Mrs. Titus of Ballard Has Unusual Experience-Bruin Only a Pet.

QUICK WORK BY

GALLANT DIVER

Seattle, Aug. 7.—When Mrs. Bob Oliver, leaning over the rail of the steamer Kennedy, dropped her pocketbook into the bay today she concluded that she had seen the last of it and \$2500 which it contained. At the same time she did not forget to use her woman's privilege and let out a quite audible yell.

Like a flash B. H. Hanson dived into the water, and before he had realized whether it was a child or a man, or only a policeman that had fallen overboard, he had the errant pocketbook in the teeth and was preparing to dive below the surface again to find the owner when a second yell informed him that that was all.

Seattle, Aug. 7.—Locked in a room with a flug grown bear for what seemed to Mrs. Lewis R. Titus of Ballard an incredibly long time, she is now wondering which of the two was the most frightened, as her hair is turning gray from the experience.

The strange circumstance was brought about by W. J. McLaughlin's bear which was raised on a bottle and has become a great pet, getting loose and wandering about Ballard. In the excitement the doors and Mrs. Titus found herself the doors and Mrs. Titus found herself about bear prisoners together. Mrs. Titus took one side of the kitchen and the bear prisoners together. Railroads Into Coeur d'Alene Prepare to Handle Vast Throngs for Land Drawings Which Commence Tomorrow.

### Coeur d'Alene. Home

(Special Disputch to The Journal.) Spokane, Wash, August 7,-Hundreds of people are returning tonight from the exposition in order to be on hand at the land drawing which begins at Coeur d'Alene Monday and contipues throughout the week. The railroads are preparing for another rush like that of the registration applicants. Many from the east are disappointed with the nature of the land, having come out in the belief that most of the reservations were prairie lands, instead of hills and rock and timber.

Few easterners know the value of timber and see none in stone land. The report that several thousand acres of surveyed unclaimed land in Stevens county are waiting homesteading, without cost, is luring many who will go there if they fail to draw in the reservations. It is believed it will take at least six days to draw out the Spekane, Flathead and Coeur d'Alene lands,

Justice Mills replied:

"Take all the time you desire, Mr. Morschauser. I think it is helpful to me in this case."

No time was wasted by Jerome. His was a clear-cut argument on the evidence as presented and Thaw's showing on the stand. Morschauser adhered to the same line until his conclusion, to which he gave a touch of the dramatic that threw the spectators into tears and brought tears to the eyes of Justice Mills. General Marshall Says Oregon Should Force Congress to Provide All Funds for Celilo and Columbia Jetty at Once.

> What General Marshall Says. If congress be urged and per-

suaded to appropriate the entire amount required, the Celilo canal project can be completed within three years, whereas under existing conditions, it will take from 15 to 20 years, according to Brigadier General William Marshall, chief of engineers, United States army.

The engineers have no author ity to recommend or suggest ap propriations, hence it is up to the people of Portland and the great Inland Empire to urge up on their representatives in congress to secure quicker action. The same condition exists in regard to the jetty at the mouth of the Columbia river.

General Marshall is thorough ly in sympathy with these projects and expressed himself last night as hoping to live long enough to see them through. But it is up to the people to

"No matter what the cost may the channel between Portland and the sea should be deepened sufficiently to accommodate the largest vessels afloat and it cannot be done too quickly," said Brigadier General William L. Marshall Brigadier General William L. Marshall last night in an interview with a Journal representative at the Hotel Portland. "And to regulate railroad rates, the Cellio canal project should be completed at as early a day as possible."

Brigadier General Marshall, chief of the engineering corps of the United States army, had just returned from a tour of inspection of the upper river and the Cellic canal project in company with Major James F. McIndoe, engineer in charge of the government work in this district, and felt somewhat disappointed at the fact that greater appropriations have not been made so the work could be rushed along at a more satisfactory rate.

General Marshall was a member of the board that surveyed the canal in 1893, and piaced the estimate of cost.

"At that time," he said, "it was thought the project would be completed within six years, but money has been coming slowly and many delays have been due thereto. Instead of letting one small contract for a portion of the work as is being done I would like to see contracts let for work all along the line, and then it would not take long to get the canal completed and open to navigation clear through from Portland to the head of navigation on the upper river."

General Marshall was also a member of the board that surveyed and laid out the jetty project at the mouth of the Columbia river in 1892, and today he will leave in company with Major McIndoe on the tender Columbine to in-Made Pirst Survey.
