SOCIAL CLASSES ARE INEVITABLE

Such Is Sociological Creed of Dr. David Starr Jordan.

Blood will tell--but environment counts more. Classes are inevitable and the extremes of aristocracy and plebeianism with the middle classes for a balancing center will endure as long as the nature of men vary. This is part of the sociological creed of Dr. David Starr Jordan, president of Leland Stanford University, who was a guest at the Hotel Portland yesterday. "Character and the attitude reached by the individual is dependent on the life plan and on the effort made to attain the ideal which every thinking man holds. This I use partly as an argument

A SQUARE DEAL AND SQUARE MEAL

Here's a square deal for the people who can't eat a square meal without after pain and distress. Go to Woodard, Clarke & Co. today and get a 50 cent box of Mi-o-na tablets; the great prescription for indigestion and stomach troubles. Take one, or if you're suffering in intense, two tablets with or after meals and at the end of 10 days if you can't eat a square meal without distress go to Woodard, Clarke & Co. and get your money back. That's where the square deal comes in. But Mi-o-na is really a stomach unbuilder of great merit; every day the makers receive more than a dozen letters from grateful people which state that after losing hope Mi-o-na cured. The quick and positive action of Mi-o-na on the stomach in case of gas, water-brash, sour stomach and heart-burn is worth a lot of money to any sufferer. E. D. Howe, Gardner, Mass., says: "I suffered from severe pains in my stomach. I tried different remedies without relief; after using two boxes of Mi-o-na I found myself completely cured." Mi-o-na is sold by leading druggists.

WYOMEI

Course catalog or money back. Just breathe life. Complete outfit, including catalog \$1. Extra bottles 50c. Druggists.

FOR A COLLEGE EDUCATION FOR THE YOUNG MAN OR THE YOUNG WOMAN.

"Culture will determine almost certainly the recognition accorded one mind by other minds. Every life, then, should have its plan, its succeeding stages of progress and one of the essentials to achievement which may truly be denominated worth while, is the college training. Environment and training make the classes, and it is a good thing that we have them. Those who are low in the sphere of social culture have the incentive to advancement of those who have really attained. But I will never be the one to say that a foolish show made by the aid of unearned wealth constitutes the elevation of which I speak." Dr. Jordan is almost as much interested in a study of the life of water creatures as he is in sociology. He has just completed a tour of the north Pacific coast. He believes he has learned the habits of sockeye salmon. The eggs are hatched in the headwaters of the river, and the little fish drift with the current to the sea, then they remain off shore feeding on minute larvae until they have become matured, when they start again up stream. But in this opposition to views held by many salmon experts, sockeyes are not so well adapted to the Columbia as they are to the Fraser river. Dr. Jordan expects to prepare a work of considerable length dealing with the habits of the salmon and the care which must be taken to prevent their extinction.

PRESIDIO OFFICERS TAKING TEST RIDE

(United Press Leased Wire.) San Francisco, Aug. 17.--The annual 90 mile ride known as the Roosevelt test for horsemanship is now under way and a part of the officers of the United States Army stationed at the Presidio are doing the second 30 miles of the distance, riding from Burlingame and Palo Alto and return today. The test began yesterday. The officers rode from San Francisco to Burlingame, where they pitched camp last night. Tomorrow they will ride the last 30 miles and return to the Presidio. Thursday afternoon the second division of officers will start out. They will cover the same route.

CARNEGIE LIBRARY IN COUNTY KERRY

(United Press Leased Wire.) Pittsburg, Aug. 17.--Word has been received by the trustees of the Carnegie Institute here that Andrew Carnegie has given \$15,000 for the erection of a library in Tralee, County Kerry, Ireland. Although the many benefactions the ironmaster has conferred upon his native land of Scotland have developed many requests in Ireland, this is the first time he has interested himself in Ireland's public affairs. The gift, it is said, was not dependent upon citizens subscribing a like amount. An endowment fund also will be established.

AS HOBOS GIRLS FLEE FROM HOME

Tired of Parental Control Three Montana Lassies Go Out in World.

(Special Dispatch to The Journal.) Butte, Mont., Aug. 17.--It remained for three Butte girls named Wanslow, aged 16, 18 and 12 years, respectively, to adopt the hobo method of boarding boxes as a means of getting away from parental care. The father of the young ladies notified the sheriff's office yesterday that his daughters had beaten their way to Dillon in a boxcar, and asked that they be apprehended. The girls were captured and locked in jail at Dillon. The girls were well known in this city, and have good reputations among their friends. Butte officers have gone after the wayfaring girls.

OFFICER OF SCHOONER DROWNED AT WILLAPA

(Special Dispatch to The Journal.) Raymond, Wash., Aug. 17.--John Baker, first mate on the schooner Albert Meyer, fell overboard while the vessel was being towed in over the Willapa bar yesterday and was drowned. Baker was working in the fore port rigging when he was lost his hold and fell. The sea was smooth, but Baker could not swim and was unable to reach a life preserver thrown within six feet of him. He rose to the surface but once after striking the water. The vessel was swung around and a boat hurriedly lowered, but his body was not recovered. Baker was about 55 years old and a native of Canada. Captain Theodore Peterson is in command of the Albert Meyer.

PIONEERS GIVE FARM TO DIVINITY SCHOOL

(Special Dispatch to The Journal.) Athens, Ga., Aug. 17.--P. E. Colborn, one of the best known pioneer farmers of this section, has given his farm of 220 acres of Athens wheat land worth probably \$25,000, to the Divinity school, on condition that the school shall pay to Mr. Colborn and his wife as long as they live 2 per cent interest on \$24,000 annually. The aged couple have no immediate heirs. They will soon go to California to reside permanently.

NEBRASKA PRIMARY ON LIQUOR QUESTION

Lincoln, Neb., Aug. 17.--Keen interest is manifested in the state wide primary in Nebraska today, following the platform conventions held by the several parties three weeks ago. Because of the lack of contests for the prominent places on the Republican ticket, the public interest centers chiefly in the Democratic nominations. The two leading candidates for the Democratic nomination for governor are James C. Dahlman, mayor of Omaha, and C. Lobeck, former comptroller of the same city. While the Democratic as well as the Republican platforms remained silent on the liquor question, the candidates realize that the liquor issue is to be the chief one of the coming campaign, and both the Democratic and Republican platforms have declared their stand. Mayor Dahlman has announced his candidacy on a high license ticket, while Mr. Lobeck has declared himself in favor of county option.

FAST TOURNAMENT AT BREAKERS COURTS

(Special Dispatch to The Journal.) Breakers, Wash., Aug. 17.--The annual Breakers invitation tennis tournament opened here this morning under the most favorable conditions. The weather is perfect and the courts are in fine condition. The play started promptly at 9 o'clock. In the opening matches Bennett defeated McAlpin 2-6, 6-3, 6-2; Merceveau defeated Alexander 11-9, 10-8; Ehrman defeated Freeman 6-4, 6-3; Rohr defeated Warner 6-2, 6-2; Wakeman defeated Dunn 6-3, 6-4; Mrs. Northrup defeated Miss Gossard 6-1. The hardest fought contest was that between Merceveau and Alexander, both of whom were in the final round. The playing in general though, has been very fast.

INCENDIARY FIRE NEAR MONROE

(Special Dispatch to The Journal.) Monroe, La., Aug. 17.--Fire yesterday morning entirely destroyed the ranch barn of J. Benson Starr, near town. Thirty tons of hay, a supply of feed and farm implements were destroyed. The fire started at daybreak and was plainly the work of an incendiary. The loss is about \$2500.

SOUTH CAROLINA MAY GO DRY

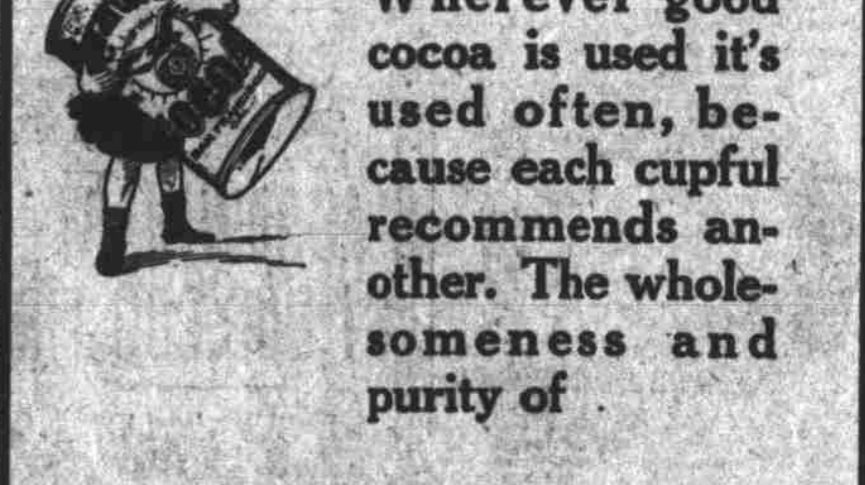

Question Today Is on the Reopening of the County Dispensaries.

Columbia, S. C., Aug. 17.--This state, which has been half "dry" ever since 31 of its 42 counties voted to close the county dispensaries, and which has had the unusual experience of being completely dry for the last two weeks, may become permanently dry, if the 21 counties voting on the prohibition question today should decide against the reopening of the liquor stores under county supervision. Today's election is not a general election, and the result in each county will affect that county alone, and have no effect whatever upon any other county. The opponents of prohibition are hopeful that many of the counties voting on the prohibition question today will decide against prohibition, preferring to return to the county dispensary system, an outgrowth of the state dispensary system inaugurated by former governor, now Senator Tillman, shortly after his election to the governorship. The friends of prohibition on the other hand, hope that a large majority of the counties taking part in today's election will join the ranks of the dry counties, thus eliminating permanently the dispensary system, which has been such a thorn in the flesh of the prohibitionists.

RAIN AT MONROE

(Special Dispatch to The Journal.) Monroe, La., Aug. 17.--A light shower fell here Saturday and caused a little ripple of uneasiness among farmers. It had been dry so long that a few had overlooked the fact that they still lived in Oregon. Extra teams were hurried to shelter. The yield has been pressed into service and grain not been up to expectations.

Wherever good cocoa is used it's used often, because each cupful recommends another. The wholesomeness and purity of

Ghirardelli's COCOA

recommends it to those who discriminate in the selection of their beverages. **Cocoa Fact No. 6**

When cocoa was introduced into Central America by the Indians and found there when America was discovered, the seeds were valued so highly that they were sent into Mexico and used for money.
