

MODEL DAIRY WILL SUPPLY PURE MILK

1—Interior view of barn. 2—View of milking stalls. 3—Barn and cows. 4—Dairy farm.

By M. N. D. Pure milk for Portland babies will be all ready for delivery when Portland's pure milk depot shall be ready for continuous operation. Here in a man, Edward L. Thompson, banker by profession, dairyman for love of it, who solemnly avers that he will be glad to furnish the milk at little or no profit to himself for the sake of helping a fellow citizen to have the best of the best.

hill, among the clover blossoms, then the patriotic red and white dairy buildings not far to the rear. Mr. Thompson, the banker, had turned eagerly from banking duties toward Clover Hill farm, his guest of an afternoon knew why. About a mile west of the location, the road from Deer Island village are all that form reminiscences of the city, unless it is the railroad track not far from the house. On the hillside brush was burning, in the valley a little lake was being drained, off in the distance the Columbia barely seen here and there through the trees.

And Mr. Thompson can "deliver the goods." This is the reason: Clean cows, clean dairy, clean milk—through it all the refreshing tang of lime spread white over the interior of the building, the picture of Clover Hill farm. But at that the picture is furnished only groundwork. Get first the location, 80 miles from Portland, with all out of doors for miles around, yet little nooks where the older folks could have the best kind of a picnic time. Then the brush must be cleared in the white home atop of the hill.

started last spring to develop a theory, it being that a dairy can be at once clean and profitable. He did not, therefore, buy expensive equipment (and this is a first point to be noted), but provided no article not essential to the work. He built a barn, red painted outside, whitewashed within. He caused the rows of cow stalls to be reversed in comparison with the ordinary arrangement. Cows at Clover Hill face "OUT." They can, of course, see the sky, and the view of the city is not far from the house. On the hillside brush was burning, in the valley a little lake was being drained, off in the distance the Columbia barely seen here and there through the trees.

It was very evident that this kind of a barn can be more easily kept clean than allowed to be dirty. The supposition was verified by the man in charge, George Bacon, who said heartily: "Why, it's much easier to be clean than dirty. We save money, because the cows don't get sick. Then a man has more respect for himself when he knows everything about him is clean." Clean, simple, cheap, these words should attach to the memory in recalling the description of this dairy. Nothing there was about it that any dairyman might not imitate to his advantage. And one thing contributing especially to the health of the cows is the fact that they are turned out each night after milking into a stable yard. In this way they are not headbored for long in the stanchions and they get free opportunity for exercise.

JOHNSON'S FRIENDS BACKING HIS CAUSE (Heart News by Longest Leased Wire.) Chicago, Sept. 18.—Governor Johnson has long been considered a Democratic candidate for the presidential nomination in 1912 by local party chiefs. Roger C. Sullivan, Democratic national committee chairman, said that Frederick B. Lynch of Minnesota was in his office only a few days ago and talked of plans for a Johnson campaign. Lynch was who had been in charge of the campaign in 1908 and who managed the canvass from the Chicago headquarters and in Denver.

AMUNDSEN HAS PRAISE FOR DOCTOR COOK (Heart News by Longest Leased Wire.) Christiana, Sept. 18.—"Reached North Pole 21st April, 1908." "Discovered land far to north." "Fred A. Cook." Thus read the first message about the achievement of this object told dryly and without much ado, without a flourish of trumpets. It was quite like the other messages that had been sent him before, and I think it was right that only a very few believed the news.

FORESTRY SERVICE GETS NEW STATIONS (United Press Leased Wire.) Washington, Sept. 18.—The latest phase of activity by the United States forestry service in conserving the timber resources is the establishment of new stations throughout the west for experimentation in forestry work. Two stations have already been established—one at Flagstaff, Arizona, and a second at Pine Lake, Colorado. At both places it is stated much valuable work has been done in the way of acquiring technical knowledge as to the best species of trees for reproduction in the locality. The government has an agricultural extension bureau and the new forestry stations are regarded as necessary.

"SPECIAL REVELATION" DEVELOPED

Poor Old Leslie Carter Has Broken Her Long Silence (With the Aid of a Real Press Agent)—Suffered Years in Silence.

(Heart News by Longest Leased Wire.) New York, Sept. 18.—Mrs. Leslie Carter has broken the long silence she has maintained with regard to the severing of business and social relations with David Belasco. On the eve of her departure for St. Paul, where she opens her season in "Vesta," Mrs. Carter poured out feelings which have been pent up these several years.

"If I were going to die and could say my last words by playing on David Belasco, I would not do it," declared Mrs. Carter. She supplemented this impassioned outburst against her one time friend, philosopher and guide by the further announcement that she was supremely happy in her domestic life, and that her only bills being the only ones vouchsafed her from her troubles with the silver-haired dramatist.

"Did you see a story the other day published in a newspaper to the effect that I was going to be a star in the stock company at the Belasco theatre, Los Angeles? Well, it was utterly untrue, manufactured out of whole cloth, and I wish to deny it most emphatically. This is the kind of thing that hurts me. The idea of an actress of my position on the stage playing an engagement in a stock company is absurd and that it should be printed angers me. If I were going to die and I could say my last words by playing on David Belasco's management, I would not do so. "When would I play under the management of his brother Frederic under any circumstances?"

The temperamental tragedienne thus sums up her feelings against Belasco in a manner which would have been superb on the stage. But it was not all that she had to say. She went on: "The public as yet knows nothing of the real reasons of the trouble between Mr. Belasco and myself. The true story has never been told. I have hundreds of letters, telegrams and other documents which, if published, would create a sensation. I may give them out a little later, but not now. "Why" she was asked. "Indirect gratification. "Well, I have always felt under a certain debt of gratitude to him for what he did for me in starting me on my career. He was my teacher, I am indebted to him for most of what I know of acting. "He was also the dearest friend I had in the world. "I loved him as a brother and trusted him as a father. "It is hard for a woman to turn against a man who has ever held in such esteem and affection as I once held David Belasco. I am a woman, and I suppose I have been naturally more by sentiment in my actions than any other consideration. "I have been placed in an unjust, in a false, light before the public; that I have been reported as being ungrateful to him, and I know that he did for me; that I was the cause of the trouble which arose between us, and I have never entirely broken up my connection with him. "This is not true. I have always been faithful to every obligation of an intimate friendship. I did nothing of which he had any right to take exception and I have suffered in silence these years because I have not owed Mr. Belasco a debt of gratitude. But there is a limit to what one can endure. "My! She's thankful for the one thing she has given me the greatest happiness of my life. My husband has proved himself a worthy man, and I am going to stick to him to the end. "Every woman, even if she is an actress under the management of David Belasco, has a right to happiness. How can any one think that he treated me fairly in subjecting to my making a happy marriage?"

NEW YORK MERCHANTS PROTEST RATE CASE (Special Dispatch to The Journal.) New York, Sept. 18.—The board of directors of the Merchants' association today adopted a resolution protesting against the preliminary decision of the interstate commerce commission in what is known as the Spokane rate case. In virtue of this decision the rates are reduced on certain commodities and classified from Chicago and St. Paul to Spokane, without attempting to change the relative judgment of the Spokane rate case. The New York Merchants' association declares in favor of the union of manufacturers and mercantile interests in the east for the purpose of making formal protest against the final adoption of the proposed basis.
