PROPOSED TAKE IN ALL SUBURBS

Realty Board Would Prepare for Census Taking. For the purpose of taking into the city all of the outlying suburbs prior to the taking of the federal census next April, an annexation campaign will be at once launched by the Portland Realty board. This action was decided upon at a meeting of the board held at the Commercial club last night, following a talk by Census Supervisor Beach, who urged upon the board the necessity of taking such steps as will insure Portland having credit for all the population that rightfully belongs to the city.

St. Johns and outlying portions of the Mount Scott district, together with some smaller sections to the southeast are the principal areas where the population is dense enough to make it desirable to incorporate them in the city.

In his address Mr. Beach insisted that when the territory is such that it is impossible to tell when one leaves Portland proper and enters the unannexed territory, it ought to become a part of the city without delay. While not naming Seattle, Mr. Beach indicated pretty strongly that he had in mind the city on Elliott bay, when he said: "Our sister city would take in Oregon City, Vancouver, Troutdale, Fairview, Greenham and the surrounding country generally if it were situated where Portland is; and even if Portland should do this, it would still be less in area than other cities having no larger population than Portland."

Annexation is not a difficult thing to accomplish, it simply takes an affirmative vote on the part of the residents to be annexed, and then favorable action by the council. It can all be done in 30 days, and now is the time to get busy. The realty board will arrange for a trip to St. Johns in next few days, when the proposition will be put up to the residents of the Peninsula city and the Mount Scott district will also be visited with the same end in view.

We have seen many people here as are in Seattle, Mr. Beach, and the important thing is to have them become citizens of Portland before the census is taken.
