in section 22, or whose certificate has been revoked, shall be guilty of mis-demeanor and fined as provided for in this act: provided, that any incorpo-rated city of less than 10,000 inhabi-tants may, upon the request of its mayor, council, board of aldermen, or board of health, made to the state food and dairy commissioner, come within the provisions of section 22 of this act." Section 22 says:

Must Have License. "Every person, firm or corporation engaged in the sale of milk or cream in any city of 10,000 or more inhabitants, who keeps a cow or dows for the purpose of selling milk therefrom, therein, shall on first day of April each year, apply to the dairy and food commis-sioner, or inspectors appointed by him, for a certificate of inspection, and shall pay the sum of \$2.50 for the same; provided always, that this certificate can be revoked at any time by said commissioner or inspector when said dairy is found not to be in proper condition as to healthfulness of the cow or cows, or as to cleanliness and proper sanitary regulations of the stables, buildings or grounds in which said cows are kept. No certificate shall be issued to any person, firm or corporation, as provided in this section, where the same has been revoked, without payment of \$2.50 for the same. Each and every certificate ssued as provided in this section shall be in the name of the person, firm or corporation and shall be numbered and he number corresponding to the one on the certificate shall be placed in a conspicuous place on the wagon or vehicle used by said person, firm or corpora-

Bailey Has No Becords.

No record kept by the present state dairy and food commissioner shows where he has ever attempted enforcement of the state license law by notice to dairymen of its provisions or prosecutions of them where they failed to comply. Yet the license as a certificate of inspection is a first essential in beginning the operation of a dairy and under the law no dairy may be operated which has no license, and a number corresponding to the license number placed on the side of the vehicle used in delivering nilk.

The present commissioner stated during an interview recently and in a letter to the state board or health that prove a strong incentive to a better the city ordinance had removed from him the obligation to enforce the license "Some citi law or to be in any other way respon-nicipal stations where during the sum-sible for the condition of the dairies mer season sanitary milk may be pursible for the condition of the daries which supply milk to Portland. It is which supply milk to Portland. It is chased at cost. Dr. Golder of Roches-not, however, possible for any city ter, has emphasized the fact that, We ordinance to take precedence over a employ physicians to cure children afstatute of the state so as to render the fected by the diarrhoeal disease from of the city ordinance decrare that they of dirty milk from dirty cows.'
had no such thought in mind, and that "The interrelation of the purity of the dairy commissioner should have been constantly active in accordance with the terms of the state law.

> "'High as is the infantile mortality even now from diarrhoea and inflammation of the bowels it is far below the figures that formerly prevailed.

"The only explanation for the fall in the death from infantile diarrhoea that I have been able to discover is the enactment on March 2, 1895, of the law regulating the sale of milk in this district and the establishment of dairy and dairy farm inspection under the provisions of that law."

"The weekly report of the Cincinnati board of health for August 21, 1908,

"'As far as we know, there has been but one death among the babies whose food supply has been obtained from the milk stations. When it is taken into consideration the large number of chil-dren we have supplied, this statement is certainly a fitting commentary upon the value of a bacteria-free and chemi-cally pure milk."

Speaking of the powers of health conserving agencies Professor Fisher

"Municipal boards of health need to have more powers and greater appro-priations; less political interference and better trained health officers; more upport in public opinion.

"Municipalities need also to take measures to prevent infection being carried by files, mosquitos, other insects and vermin. They need to guard with greater care the water supply and in many cases to filter it; they should make standards for milk purity and enforce them."

BOY BURGLARS MADE HORSEBACK GETAWAY

(United Press Leased Wire.) Los Angeles, Cal., Oct. 27.—After a thrilling chase through the outskirts of Los Angeles, Emery Raboin, 17 years of age, alleged to have been one of a pair of "horseback robbers," is in the city jail. He is said by the police to have confessed nearly a doxen daring caylight robberies within the last 10 days which yielded loot to the extent of several hundred dollars. Raboin's capture followed the robbery

of the home of Mrs. E. M. Martin, near the Rosedale cemetery, in the south-east part of the city. Raboin and a youthful companion, Earl Higley, en-tered the Martin home about dusk, intimidated Mrs. Martin with a revolver and ransacked the house.

Both youths mounted horses they had left in the street and fled before a high power automobile filled with police that had been summoned from a nearby police station.
