Is There Be a PERFECT Store — This Is Surely It

We pride ourselves on having a store that is a composite of all that's good. The general rule is that where a store is good on one thing it falls short of perfection in other respects. If its stock is fine and extensive, it usually asks high prices. If it isn't one thing it is the other, and the perfect store—the one combining the features the modern store should have—is a rare exception. We may be over-enthusiastic about this store in some things, but in claiming our prices are lowest, our stocks largest and most complete, our qualities most reliable and our conveniences and advantages greatest in this locality, we are only claiming facts. It ought to be the store where you spend your money. Our prices should convince you that here is where you should shop.
