Most people believe that the only way to cure Most people believe that the only way to cure disorders, chronic disorders or pain of any kind is to swallow a lot of drugs. When you find yourself ailing in any way you run to the drug store and get a bottle of some

patent medicine or have your doctor write out a prescription for probably the same stuff under another name. What good does it do to you? Just stimulates, like whiskey. Couldn't do more than that, for recent exposures have proven that nearly all the drugs you buy are a combination of a lot of alcohol and a little poison. You know alcohol is what makes whiskey such a stimulant. The other poisons that you get in drugs are too numerous to mention. The poisons that are used most frequently are morphine, cocaine, mercury, arsenic and potash. They wreck the nerves and stomach and cause liver, kidney and bowel troubles.

Drugs will kill pain all right by stupefying the nerves, but wait until the effect has passed off; the pain returns worse than ever. Then you have to take the drugs again and continue to take it until nature is kind enough to remove the
