Fat Reducing Ideas Are **Proven Nature's Best**

Fat is food turned into the wrong kind of material for the body. Instead of the blood taking up the food we est and giving it to the body in the form of good and, sound flesh, nerve and bone, fat is thrown into the tissues and is packed around the organs and beneath the skin. This at last tears down all the vital forces of the system and destroys not nly manly health and comeliness, but likewise results in death. The sure way and the best way is to take a Marmola tablet after each meal. You may then est what you will, and when you will, and the stomach and digestive organs will turn the meal into the very kind of nourishment you most need. Pat is Wife Has Gone to the Country, stopped at once and the fat you have is removed in a way that nature herself suggests, at the rate of from 12 to 15 suggests, at the rate of from 12 to 15 to ourses per day, and there are no flabby rolls of skin and deep wrinkles left to remind you of the days when you were fat. Every druggist sells these tablets, which are made after the famous Marmola Prescription. They are harmless but thousands prove that they do reduce fat just as we say they do. If you can't buy them from your druggist or you do prater, send 15 cin. the price of 5 casa, to The Marmela Company.
