By Edwin W. States, Journal Staff Correspondent. Spokane, Wash., Nov. 29.—Should the prosperous apple growers and packers of the Pacific northwest not have realized another single advantage, or another item of good from the Second National Apple show, just closed at Spokane, than the accomplishment of a simple and substantial system of grading their fruit, the vast sums of money paid out to produce the big exhibition would be well expended.

(4) "The 'choice' grade shall consist of apples sound, free from any breaks in the skin or black bruises, also free from worms or any disease which materially injures the quality of the apple." (5) "Where for any reason the grower or packer does not desire to use the 'extra fancy' or 'choice' grades, we recommend the varieties be packed in one grade termed 'orchard run'.

petitor to the Hood River apple was a Spokane Beauty, raised by F. L. Post & Sons of Chelan, Wash. While it is but 1 7/8 inches in circumference, it weighs 4 1/2 ounces and is nearer normal in size than the Oregon product.

With the score against them, the Indians begin the second half with a wiser attack. For 15 minutes the cadets held them in check. Then Chemawa recovered a short punt, which was judged by the H. M. A. backs and the Indian left halfback snatched it and raced for a touchdown.
