Selaya Is Brave. While a great deal has been said against Zelaya as a man, there is one thing that can not be said against him, and which his enemies never have at-tempted to say against him, and that that he is not a brave man. Son of Rich Planter.

But Zelaya differed from these in that he began his career as the gentlemanly son of a planter. He had little else to do than ride over the vast estate belonging to his father. He was sent to school at the capital and given all the education that his masters could supply. Extravagant in his tastes, he drew on the old man's purse strings, leaving the plantation frequently for the town, where he was the leader among gathering of young men of about his own age and circumstances. For amusement they paraded the streets of the town at night, twanging the guitar strings and singing love songs to their

Not a Modern Monarch. Had Zelaya been content with this amusement he might have succeeded to the ownership of his father's estate and have passed the remainder of his days in quiet comfort, for his country was quietly, yet strongly, ruled by the con-servative President Charmora, his party having been in gower since the final de feat of the American fillbuster Walker, who had landed on the coast with his 56 immortals and fought his way to the presidency.

Zelaya told his young friends and compatriots that he did not approve the conservative rule. He said they were too far behind the times; that they favored the priests and the friars, who were back numbers, and he thought his country should keep progress with the in the army of Guatemala until the oppor-world by throwing them out. Barries' Ambition His Undoing. Barrios, the strong man of Central

America, had his life's ambition ever before him, and that was the unification of the five Central American republics. It was this ambition that led to his undoing, for one bright morning in February, 1885, a proclamation appeared nailed upon the doors of the capi-tol, and upon the doors of the cabildos, his compeer, J. Rufino Barries of Guat-emala. Castro of Venezuela, while not emala. Lieutenant in Big Army. It is said that a similar proclamation appeared on that same morning on the breakfast table of each of the presidents of each of the other four republics informing them that they had en united, or annexed, as they claimed. However, marching with Barrios at the head of that army of 29,000, the grandest army Central America had ever een, was the young lieutenant and exile, Jose Santos Zelaya. But Salvador did not propose to be either united or annexed, and Barrios, the greatest president undoubtedly whom any of But as a matter of fact, there is and althoga turbulent little republics have ways has been two well defined political those turbulent little -republics have ever known, rode to his death. Young Zelaya was not ony a stanch admirer of old Barrios, as he is affectionately remembered, but he believed in him and his methods of government. As he rode by the side of him to that fatal battlefield of Chalchuapa he expected to continue with him across Salvador and Honduras into his own country, where he would see the principle for which he had stood and for which he had been exiled, thoroughly established. But with the fall of Barrios the army which he was leading Zelaya returned to Guatemala where he received a promotion for bravery on the field, and there he continued up his commission and disappeared.

It was in the early 90's that he reappeared in his own country leading a band of insurgents against the government. He met with success from the very commencement of his campaign,

Ever Bendy Cudgel.

There is an old saying in Central America to the effect that in dealing with your inferiors you must hold out piece of bread to them in one hand while you grasp a club in the other. This is very much the principle upon which Zelaya has maintained his rule n Nicaragua. He offers his people bread with one hand, and when they are not satisfied they get the club.

When one sees the tatterdemalion oldiers of these Central American armies for the first time not only is he inclined to laugh, but he entertains grave doubts of their efficiency as soldiers, yet it is only with such soldiers as these that the satrap maintains his despotism. Strange to say that the men who make up the rank and file of these armies are not warlike,

Some say that this is because Zelaya is neither as strong a man or as clever a man as Barrios. Barrios began his rule by having a dozen disturbers of the public peace and security taken out low. Zelaya is educated, and he is very in the public plaza and shot. That ended the matter. There were no more disturbers of the public peace and security, and there were no more public executions. Despotic Political Sway.

It is frequently stated, and with a good deal of truth, that there is never more than one political party in Central America, and that is the party in power parties. They are the conservatives on one side and the liberals on the other. The reason for its being stated that

there is only one political party is the fact that which ever party is in power maintains its despotic sway to such an extent that no opposition does show tself in any form whatsoever. Sometimes there is a pretense of having an election, but such an election is than a farce, for should any misguided element of the population or section of the country be beguiled into believing that they were going to be allowed to vote sure enough and put up a candi-date in opposition to the government program. the unfortunate would surely be taken out and shot.

Spanish Blood Supreme.

The great difference between Conservatives and the Liberals is as much a family tradition as anything else. The Conservatives, as a rule, belong to the older families, the families of the purest Spanish extraction that still remains in the country. They desire to preserve their religion and re-ligious beliefs and consider the simple life of their forbears as much more Rufino Barrios, the first of the stern liberal rulers of the Porfico Diaz type, in that ultimate goal of all successful in that ultimate goal of all successful rulers in their career all respond to the ruler of Guatemaia, Caprera, who is a rare exception to them all, for he capred page of the Progregistas or Liberals. They profess to hate the clergy; they frequently desecrate the churches, and try to stamp out all religion. They are extravagant in their in everything else.

Zelaya Insanely Extravagant.

Zelaya has been the embodiment of this wild extravagance since he has been the ruler of Nicaragua, but he has managed to become immensely wealthy thereby. He has monopolized the few industries of the country or placed a tax upon them by which he alone is the beneficiary. He has controlled the customs houses, supervised and regulated the tariff, and, as a matter of fact, looked after the financial end of his business as president trick elephant, which does everything as well as that part of it necessary to from playing football to smoking the maintain his government.

Courageous as a Lion.

Zelaya's predominating characteristic is his courage. He is absolutely fearable fellows, if let alone, and their greatest desire is to be let alone. But they are not left alone. They are simply picked up, corrailed or captured as the case may be and given to under-the case may be an all given to under-the case may be all given preceptor, old Barrios of Guatemala, his one ambition has been to unite the five republics under one government, with himself, of course, at its head.
