

### NEW SUBJECT TO BE ADDED

#### Y. M. C. A. Will Teach Wireless Telegraphy in Future.

Always first in taking up new lines of education, the Portland Young Men's Christian association is preparing to give a course in wireless telegraphy, a subject that has never before been taught in any western institution. Already the Y. M. C. A. building, Sixth and Taylor streets, has been equipped with a complete wireless outfit and the study of "wireless" telegraphy is to begin December 11.

The masts for the new station have been erected on the roof of the Y. M. C. A. building and it has been found that messages can be transmitted to and received from all cities on the Pacific coast. There is a double set of receiving instruments, so that communications caught in the air can be taken in all connected rooms of the building.

The new plant consists of a two-kilowatt transformer, delivering 40,000 volts, a condenser, variable induction coils, circuit breakers, volt-meters and wave detectors. It is one of the most complete and costly stations in the Northwest.

Otto P. Guldmaster has been engaged by the Y. M. C. A. to take charge of the new work. He is a graduate of the Berlin Polytechnic school and an experienced operator of wireless instruments. Mr. Guldmaster has prepared the following series of 12 lectures, which will be given on Saturday nights, beginning December 11:

"Principles of Electrical Phenomena," "Electrical Units," "Principles of Alternating Currents," "Transformers and Induction Coils," "Transmitting Instruments," "Receiving Instruments," "Oscillation Wave Detectors," "Laboratory Work" (three lectures), "Various Systems of Telegraphy," "Wireless Telephony."

#### DAIRY INSPECTOR IS BUSY AT ROSEBURG

(Special Dispatch to The Journal.) Roseburg, Or., Dec. 4.—J. I. Springstead, a local dairyman, was arrested yesterday upon complaint of W. R. Catlett, a pure food inspector, charged with selling milk "containing less than 2.5 per cent of butter fat" or in other words, milk that had been skimmed. His case has not yet come up for trial. This is the first case of this kind to develop in this county.

#### Portland Attorney Chosen.

(Salem Bureau of The Journal.) Salem, Or., Dec. 4.—C. E. McCulloch, a Portland attorney, was yesterday appointed by Governor Benson a member of the Oregon commission on uniform laws. This commission is appointed to cooperate with the American Bar association for the purpose of securing uniform laws as far as possible throughout the United States. The other members of the commission, who were appointed by Governor Chamberlain, are H. H. Emmons and W. S. Fowler, also of Portland.

### Revival Services Attract Interest

Rev. R. J. Parrott and Mrs. Parrott, Revivalists.

Interesting revival services are now under way at the Alberta United Brethren church, East Twenty-seventh and Summer streets. They began November 28, and will continue until the evening of December 12.

The meetings are under the charge of Rev. R. J. Parrott, of Elkhart, Ind., who is assisted by Mrs. Parrott, one of the well-known gospel singers of the country. Great interest has been shown in the meetings since their commencement and good congregations greet the two gospel workers whenever the meetings are opened each evening.

Mr. Parrott and his wife are well known in the United Brethren denomination, having been in the evangelistic work for the past 24 years. They are working under the auspices of the Home Mission society of the church, and Rev. Mr. Parrott is noted as a most effective speaker and earnest worker, while Mrs. Parrott has sung her way into the hearts of congregations extending from coast to coast.

This is the first trip ever taken by the two church workers through the west, and they are both charmed with their reception here, with the country and with the success which is meeting their efforts. The meetings will be continued until the evening of December 12 and it is expected that the Alberta church will be greatly strengthened by their work.

#### WOMAN MURDERED FOR SAKE OF COIN

(United Press Leased Wire.) Hampstead, L. I., Dec. 4.—The dead body of Mrs. Julia A. Wallace, wife of a farmer at Munson, parts of her clothing missing and that which remained covered with ice, was found lying by a roadside near here today. Mrs. Wallace usually carried beneath her skirts a bag containing about \$400. This money was missing and the police believe she was murdered and then robbed.

The ice on the body, the police say, indicates the woman was beaten and thrown half dead into a nearby pond. The shock of the cold water, they believe, revived her and she dragged herself to the roadside where she died. Mrs. Wallace left home last night. Her body was discovered when a search was instituted today. Her arms and shoulders show numerous bruises, while the side of her head was laid open, presumably by a blow from a heavy implement.

#### Land Soils for \$90 per Acre.

(Special Dispatch to The Journal.) Dayton, Wash., Dec. 4.—Mrs. Laura Matkins has sold 160 acres of wheat land near Covello to S. Bloomfield at \$90 per acre. This is one of the highest values received here for wheat land.

### PAY HUNTERS TO DESTROY VERMIN

#### Government Sets Aside Fund for District Including Oregon.

District 6 of the National Forest Service, comprising the states of Oregon and Washington, and Alaska, has just been allotted \$150,000 for the purpose of hiring professional hunters to destroy predatory wild animals upon the national forests. This amount has been apportioned among the Willamette, Whitman, Malheur, Fremont, Umatilla and Deschutes national forests in Oregon, and the Wenatchee and Wapinitia national forests in Washington.

The primary object in the employment of professional hunters is the protection of stock grazing under permit, but at the same time they aid in the protection of game animals, such as deer, elk and mountain sheep, as well as all the game birds, cougar, lynx and other predatory animals abound, thrive and multiply on most of the national forests, and are today a great menace to the growth of game herds.

Owing to the peculiar physical nature of the national forests the cougar and lynx are more destructive to game than are hunters, and when there are no hunters to keep down these predatory animals the slaughter of game animals is very severe. The elk and mountain sheep are rapidly becoming extinct, unless steps are taken at once to protect them in a few years many of these rare game animals will remain. In some localities few of the elk calves born ever grow to maturity, owing to the cougars.

Why the aged ex-banker sat down to his meals, a deputy sat with him; when he went to buy Christmas presents for relatives the deputies stood at his side. They will breakfast with him tomorrow, and will sit in his parlor, one on each side of him, when he goes to mass. The surveillance will continue until the supreme court of the United States passes upon his petition for a writ of habeas corpus and supersedeas. If the writ issues the case will be disposed of in at least two years. If the court refuses to interfere, Walsh must go to the penitentiary at once.

### JOHN R. WALSH BREAKING DOWN

#### Former Multi-Millionaire Cannot Stand Strain of Federal Shadowing.

(United Press Leased Wire.)

Chicago, Dec. 4.—John R. Walsh, formerly multi-millionaire, now prisoner of the federal court, and in special custody of deputy United States marshals, is breaking down under the strain of being constantly shadowed by federal officers.

After a day of surveillance Walsh retired early tonight. A deputy marshal stood outside the door of his bedroom and another slept in a room adjoining with the door between the two rooms open. Walsh did not make a move today that a deputy was not standing at his elbow. They allowed him the widest freedom possible, but not once did they let him get out of their sight or hearing.

When the aged ex-banker sat down to his meals, a deputy sat with him; when he went to buy Christmas presents for relatives the deputies stood at his side.

Enlarge Power Plant. (Special Dispatch to The Journal.) Spokane, Wash., Dec. 4.—The capacity of the Nine Mile power plant on the Spokane river, nine miles below Spokane, is to be doubled to 70,000 horsepower. The contract for \$110,000 worth of new machinery has been let to the Westinghouse people. The plant furnishes power for the Traction company of city street cars and for the inland empire system of suburban electric lines.

#### 350 Dentists in Oregon.

(Salem Bureau of The Journal.) Salem, Or., Dec. 4.—According to the annual report of the state dental examiners made to the governor today by Secretary H. H. Olinger of this city, there are about 350 practicing dentists in Oregon. Six prosecutions are under way for violations of the dental laws, mainly for practicing without a license from the state board. About 60 applicants were examined and admitted to practice in this state during the year just closed.

- Good Rubber Plates, each \$5.00
- Best Red Rubber Plates, each \$7.50
- Celluloid Plates, each \$10.00
- Painless Extracting (local anesthetic) 50c
- Painless Extracting (with somniform) \$1.00

#### Reliable Painless Dental Work Cannot Be Done for Less Money

### Bridge Work

OUR LABORATORY IS THE BEST EQUIPPED IN THE CITY TO HANDLE BRIDGE WORK

Modern Dentistry At moderate prices. You can't get better dental work done anywhere.

There are many kinds and forms of Dental Bridge Work, each of which has specialized merit. We produce in single-piece castings any bridge of gold or gold and porcelain or gold and platinum combined. We also make bridges of platinum and porcelain, as the case in hand may require. We manufacture backs for removable bridge facings, we color and shape artificial enamel for bridges, and we contour and build teeth to conform to the peculiar needs of any given case.

Bridge work, to be right in every detail and possess the quality of permanence, must be exact in its mechanical construction, so that the stress of mastication, when applied, will fall equally upon all the anchor teeth or abutments. Failures in bridge work are due to unsanitary construction, to actual "don't care" carelessness or to honest ignorance.

#### Making Artificial Teeth

Is a leading feature of our business, and we believe it cannot be surpassed in the point of its completeness. We operate our own laboratory, and as making artificial teeth is a specialty in dentistry, we are in a position to make this offer and guarantee satisfaction.

#### Do You Wear Artificial Teeth?

Dr. W. A. Wise gives the plate work his special attention and can guarantee the best possible results. There is a great difference in plates, and unless they fit perfectly are a constant source of annoyance. If you need a plate, we will extract useless teeth or decayed stumps without causing you the slightest pain, and supply a plate on the same day if necessary. Remember, you cannot be too particular about your plate; the best is a comfort—the other kind almost worse than nothing.

#### GUARANTEE MEANS ALL IT SAYS

The Wise Dental Co. is an Oregon corporation, capitalized at \$50,000, doing business strictly on business principles and according to law. With this financial responsibility backing our guarantee, we must do good work, and our guarantee is as good as a bond. The incorporation assures you that the Wise Dental Co. is a perpetual institution and that they will be here to do your work at any time in the future, just as today. We keep a strict record of all our work and by whom done. These records can always be referred to by any one interested, at any time, now or in the future.

Our aim is to make the company perpetual, and those having a guarantee from this concern can have the assurance that it will be made good at any time.

#### BUILD BIG DAM ON CRAIG MOUNTAIN

(Special Dispatch to The Journal.)

Leviston, Idaho, Dec. 4.—The big concrete dam of the Craig Mountain Lumber company, which is being built for the reservoir at Winchester will be completed about January 1. The dam when completed will cost about \$25,000, and will be one of the most improved and strongest dams that could possibly be constructed. The dam is being built of concrete and earth, the core being entirely of concrete, with a width of six feet on top and 218 feet long. Around the cement core will be a fill of earth which will be rip-rapped, assuring permanent solidity.

#### This Date in History.

1782—Martin Van Buren, eighth president of the United States, born at Kinderhook, N. Y. Died at Lindenwood, N. Y., July 24, 1862.

1802—John Scott Horner, fifth territorial governor of Michigan, born in Warrington, Va. Died in Ripon, Wis., February 2, 1882.

1804—The South Carolina legislature rejected by a single vote a bill prohibiting the importation of slaves.

1846—Dedication of St. Mary's cathedral in Chicago.

1850—Louis Kossuth, the Hungarian patriot, arrived in New York.

1853—Steamship Humboldt wrecked near Halifax.

1876—Over 350 lives lost in the burning of the Brooklyn theatre.

1881—Dom Pedro, ex-emperor of Brazil, died in Paris. Born in Rio Janeiro, December 2, 1825.

1892—Sir J. A. Chapleau appointed lieutenant governor of Quebec.

#### Sir Henry W. Lucy's Birthday.

Sir Henry W. Lucy, the famous writer for the English comic weekly, Punch, was born in Great Britain, December 5, 1845. He started in life as a merchant's apprentice, but at 19 became a reporter, and after studying languages and literature in Paris, found a place in London in 1870. He was first of the Daily Mail, but in 1873 he became the chief parliamentary reporter for the Daily News, a place he has held ever since, except in 1886-7, when for a year he was editor of that newspaper. He took it over to the support of Gladstone's home rule policy, and many readers were lost, with the result that he went back to his former work. Besides writing Toby, M. P., Sir Henry has written many books on parliament, an intimate study of Mr. Gladstone, and some novels. In the course of his extensive travels he has found occasion to visit South Africa, Canada, Australia, the West Indies and the United States.
