In other lines there is only a limited call— as is usual just before the year turns— although at this time prices are being maintained as well as when business was lively. maintained as well as when husiness was lively. Selected lambs are now quoted at \$6.25, or an advance of 25c over former prices. Sale at this price was made dur-ing the day, although the stock had not been weighed up in time for publication in today's Journal. The entire sheep and lamb market is stronger than ever before, and present indications are for an advance of about 25c all through that line. No Mogs in During the Day.

Getting Ready for Flour Rise.

According to advices received from other points of the northwest, a genral advance will be made in the price of patent flour after the year turns. There is some talk of local mills putting up the price before that but nothing was done in the matter this morning. The advance of 10c in ex-ports yesterday had a stimulating ef-fect upon the entire market. While higher prices are being quoted at interior points for hay, no change is shown in this market today. Heavy construction work by railroads at inter-ior points has caused much hay to roll in that direction and country markets of patent flour after the year turns.
