

VENDETTA VICTIMS TWO LITTLE BOYS

New York Police Seek Man Who Murdered Children by Way of Reprisal.

(United Press Special Wire.)
New York, Jan. 13.—The "flying man" of the New York police department today is searching for the man who shot and killed Robert Lomas and Arthur Shibley, each 6 years of age, while the boys were coasting on a hill in Highbridge park. The police believe that upon the arrest of the murderer an inhuman plot of vengeance upon the slayers of the boys will be revealed.

Nassib Shibley was prominent in the Syrian colony here for years. He was active in the warfare that was waged for a time against the Turkish and Syrian secret societies that existed here.

Late in 1906 Nassib Shibley and his wife were found dead in their apartments. The woman had died from the effects of a poison, while her husband had been shot.

FRANCE HONORED IN HER AVIATORS

with their aeroplanes, the crying need for dirigibles, to support a fleet of heavier than air machines, is the subject of wide dissatisfaction.

In the meantime Germany is steadily and rapidly forging ahead. She has a round down splendid dirigibles already in commission.

The Spies dirigible will be 300 feet long, with a 49 foot beam. Her car will be 120 feet long and will carry two engines of 110 horsepower each. It is estimated that she will travel 48 miles an hour. The framework is of aluminum and bamboo. The gas bag will have a capacity of 8000 cubic yards.

PAULHAN'S ALTITUDE RECORD FLIGHT WAS ALMOST HIS FINISH

(United Press, Special Wire.)
Aviation Field, Los Angeles, Jan. 13.—As quiet and unassuming as though he were not one of the most talked of men in the world today, Louis Paulhan, the eagle of all bird men, was early to the field today, and hard at work getting his airplane in shape for the flight this afternoon.

To see the small Frenchman busily tinkering with his motors, snapping the wires which brace the wings, touching here, feeling there, one would never believe he was the man who drove his

biplane 6000 feet in the air, thus establishing a new record for the aerial world.

A new rule went into effect at the field today, which prohibits any aeroplane from being driven over the grandstand. The ruling was made by President Cortland Field Bishop, after he had watched Paulhan and Curtiss diving over the crowd, as he feared that some persons might be injured in the event of an accident.

This is Pasadena day, and long before noon crowds in motors, on horseback and from the trains came trooping to the grounds from "Millionaireburg."

It is confidently expected by the officials that more world's records will be broken before the close of the meet. Cortland P. Bishop, the official head of aeronautics in America, said today that the meteorological conditions here were ideal.

The committee of judges made the official announcement today that when Paulhan broke Latham's altitude record of 3280 feet by flying 5000 feet high, he was in the air 50 minutes 46 1-5 seconds. It took him 43 minutes 16 1-5 seconds to rise and 7 minutes and 30 seconds to descend. Although Paulhan did not admit it publicly, it is said by those close to him that he confessed that he narrowly escaped with his life when he broke the record. After he had pointed the aircraft downward he feared he might descend too rapidly and kept the engine running. The angle was so sharp, however, that the gasoline would not feed the engines. As a result he was compelled to glide all the way, thus literally taking his life in his hands.

Charles Hamilton, who has been keeping in the background, stated that he would fly in his Curtiss biplane this afternoon. Hamilton has had a run of bad luck. He said he expected things to begin coming his way now.

For the first time in the history of aviation, two women passengers will be carried together in an aeroplane late this afternoon, according to Paulhan. He purposes to take his wife and Mrs. Dick Ferris, wife of General Ferris of Ferris in his Farman biplane for a short flight.

Knabenshue and Beachy worked all forenoon getting their dirigibles in shape for a race this afternoon. This, like the other big events, will probably not be started until after 3:30 o'clock, when the wind is settled.

BURGLARS MURDER FAITHFUL NURSE

(United Press Special Wire.)
Millbrook, N. Y., Jan. 13.—Three burglars early today entered the home of Harriet Compton, a wealthy New York financier, and after arranging to death Sarah Brauner, a nurse, who had been left with Compton's baby daughter, stole jewelry valued at \$10,000 and escaped.

Bloodhounds were put on the robbers' trail, but after following it for several miles it was lost. Policemen and detectives are scouring the country for miles around this place, and all avenues of escape into New York are guarded.

The officers believe the robbers chloroformed the nurse, who later revived and tried to make her way to where the baby slept. She was then strangled and her body thrown into a hall.

Scores of pieces of valuable silverware, a part of Compton's magnificent collection, were stolen. This was loaded into a sleigh in which the murderers made their escape. Compton and his wife were spending the night in New York.

HALLEY'S COMET IS CAUSE OF COLD?

(Special Dispatch to The Journal.)
Walla Walla, Jan. 13.—The present spell of cold weather, which has persisted for more than six weeks, has been attributed to nearly everything possible, and now comes an old timer in the valley who says that it is due to Halley's comet.

"In 1861, says he, there was just such a spell of weather, and that was the time when Tempel's comet appeared. Swift's comet came a year later, and the weather was similar to this. There has been no such duration of cold between these periods, so it must have been the comet."

The present cold weather has lasted longer than any in years. There is sufficient snow on the ground to protect the grain, however, and farmers are worrying little about loss from that source.

STOCK SUFFERS ABOUT STEVENSON

(Special Dispatch to The Journal.)
Stevenson, Wash., Jan. 13.—Since December 9 this section has been experiencing the worst blizzard it has ever known. Youmans-Simpson company, employing 100 men, closed its plant, and three other small mills were compelled to shut down, throwing out of employment temporarily over 300.

Quite a little suffering is experienced where ranches are unable to get feed to their stock. Snow has drifted in places to the depth of 18 feet.
