## MEET TO PRAISE AND ADVERTISE THE LOWLY BRICK

Five Conventions in the Interest of Clay Workers in Session - Brickmakers Find Need of Publicity.

By Frederic J. Haskin.

Washington, Feb. 9.-Pittsburg will have five conventions this week, all of which will be in the interest of the manafacture of clay products. The National Brick Manufacturers' association will meet in its twenty-fourth annual con-vention; the National Clay Machine-makers' association will hold its seventeenth annual meeting; the American Ceramic society will come together for its tweifth annual session; the National Paving Brick Manufacturers will gather for their fifth annual conference, and the National Clay Products association, the latest recruit to organized activities, will meet in its second annual convention. Between the five organizations which maintain fraternal relations, little will be left uncovered in the clay manufacturing world. Every phase of the subject will be discussed. Must Advertise Brick.

First and foremost in the minds of the brickmakers is the problem of keeping brick in the foreground of public favor. The growing popularity of con-crete has been exerting an adverse influ-ence on the demand for brick, and the use of asphalt and wood paving blocks for street paving has been no less hurttheir publicity against concrete.

The trade journals of the clay indus-try are bold in their fight against concrete. When a concrete bridge collapses, as happened at Peoria, Ill., some someone, as happened in Washington a and another rate for another kind. tion of concrete sewer, as happened in comings of Asphalt" are used in the trade papers. When a Baltimore fire or interstate commerce commission could a San Francisco earthquake makes a not see how it cost more to haul one record against concrete construction, the kind than another, so it decided in favor brickmaker writes a story of the in- of the brick manufacturers. The reefficiency of concrete and perpetrates sult will be the saving of 4 cents a 100 a pun by heading it "Some Concrete

And on the Other Hand.

But not all of the campaign is devoted to attacking other building materials; a proper effort being made to promote brick. When the new brick automobile track at Indianapolis was opened, many pictures of it were published in the trade journals, with the comment that though the drivers were benumbed by cold, the track had proved itself the fastest in the world. Pictures of brick castles that were built hundreds of the United States were burned in a Virginia but the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in a Virginia burned in the United States were burned in the United S ago are published to show the durability of brick. Prizes were offered for well designed brick houses, and a of these designs has now been shed. Every brickmaker is urged to send a book of these designs to the prospective builder in the hope that her will decide that his building material shall be brick. The claim is made that a house costing \$10,000 as a frame house will cost \$10.750 if made of concrete and \$11,000 if built with brick.

The waning popularity of brick for

construction purposes is attributed by the brickmaker more to the high wages demanded by the brickiayer than to any other cause. An effort is being made to evolve a plan which will eliminate the hod carriers, and it is said that this ancient and honorable son of toil will soon have his place taken by a hoisting machine and fountain trowel.

Ceramic Science. The American Ceramic society is the broadest organization of the five which will meet in Pittsburg. The average person thinks that ceramics is the soience of china painting and ornamental pottery, and he is warranted in this conclusion because everywhere that fashionable society is to be found one encounters a Keramic klub, made up of china painters and admirers of hand china painters and admirers of hand painted and ornamented ware. But the American Ceramic society protests against this limited use of the word, and asserts that instead of being merely the unuseful science of fancy china and pottery, ceramics includes the making of all kinds of ware from silicates. Whether it be an ugly brick worth less than a single penny, a beautiful terra cotta design worth hundreds of dollars, or a magnificent vase worth thousands, they are all, produced through the science of ceramics.

This society thinks there is not enough research going on for the up-building of its science. It believes there is yet many opportunities for profitable research, and is aiming to stimulate such investigations as promise to increase the usefulness of ceramics. For generations the trade secret was guarded parefully, but under the labors of the American Ceramic society the barrier to progress that resulted from the guarding of these secrets has been broken down, and now the whole ceramic world depends upon universal up-to-date meth-ods rather than individual secrecy to keep it abreast the tide of competition.

Toads in Books. One sometimen reads of the finding of toads encased in solid stone. It is a mystery how they got there, and more particularly how they managed to resist the tremendous pressure to which they were subjected. A remarkable experiment of this kind was made recently at a brick machine plant at Bucyrus At the instance of a society of physical research, a toad was encased in a piece of clay, which was placed in a brick-making machine and subjected to the remarkable pressure of 11,000 pounds to the square inch. When the brick was taken out and opened it was found that his toadship was still very much alive and none the worse for the tremendous squeezing. He was able immediately thereafter to pose for his photograph, sitting contentedly on top of the brick in which he had been en-cased. What was it that enabled him to resist such a pressure?

Largest Chimney in World. The largest chimney in the world is made of brick. It stands at Great Falls. Mont., and was built for a big smelting company. It is 500 feet high—as high as the windows of the Washington monument. For the first 25 feet the chimney is octagonal in shape and thereafter circular. Its inside diameter is 75 feet at the base, tapering to 50

full to the brick business. So serious feet at the top. It is connected with the United States, and all building has the situation become that the brick-furnaces by a tunnel 1800 feet long, there are extremely stringent. The refeet at the top. It is connected with the United States, and all building laws The bricks were made especially for it suit is that while in the United States of publicity in favor of brick; nor have if they had been common bricks nearly the annual fire tax amounts to about they let it rest there—they are using a concept and baye been required. The \$2.50 per capita, in Europe it is held 6,000,000 would have been required. The \$2,50 per capita, in Europe it is held weight of the chimney is equivalent to that of a battleship like the Virginia.

How Railroads View Brick. One of the most interesting cases months ago, pictures of the collapse are that has come before the interstate compublished, with such inscriptions as merce commission in recent years was "Sacred to the memory of defective con-brought there by the brick manufactur-crete." When the wall of a house in ers of Cleveland, Ohio. The railroads course of construction falls and kills made one rate for one kind of brick year or so ago, illustrations of the dam- brick manufacturers claimed that a aged house are shown under such in-scriptions as "Stained with human making, and that it costs no more to blood," When sewer gas destroys a sec-tiaul a vitrified or a pressed brick than making, and that it costs no more to haul a vitrified or a pressed brick than It does to transport one of the common a Wisconsin town, the camera tells the everyday variety. The railroads antale of "The Fallure of Concrete in swered that their rates were made in Sewer Construction." When a piece of apphalt pavement gives out for one reason or another, pictures of "The Shorttion than the rate on common kind. The pounds on the shipment of brick from Cleveland to New York.

. Pirst Brick in 1612. The annual output of common brick in the United States amounts approximately to 10,000,000,000. In addition to these there are made 500,000,000 front brick, 900,000,000 vitrified paving brick. and others in proportion. The total clay products made in the United States ginia kith in 1612, and some of these are still in use. Before this time all such building material was imported

old houses still standing that have im-ported brick in them. The geological survey has made a careful test of all the building materials now in use in the United States and has decided that no other material has the fire resisting qualities of brick. In Europe a vastly larger proportion of buildings are of brick than in the

from England, and there are dozens of

down to 33 cents per capita. Emperor William owns a pottery which nets him \$50,000 a year, and many of the German buildings are decorated with terra cotts pieces from his plant. He himself has some 40 homes, hunting lodges and estates, and is a great believer in brick as a building material,

Advertising Pays. Statistics show that brick publicity beginning to pay. In New York is beginning to pay. there were approximately one-fourth more brick houses built last year than the year before, and the value represented by them increased in like ratio,

to be made of brick of uniform such and color, with the smallest possible mortar joints. Now the tendency in the finer types of buildings is to have the bricks of irregular sizes and shapes. A western house was built recently so that by the difference in the color of the brick a beautiful tree was portrayed in one of the walls, while in another an old-time court scene was represented. If this becomes a universal fashion the ouses of the future may have as much art on the outside as on the inside

### TASTE FOR SWEETS CAUSES BOY'S DEATH

Dayton, Wash., Feb. 8 .- Childish curiosity, coupled with a taste for aweets, caused the death of Robbie Thorpe, the 2-year-old son of James Thorpe, a prominent Turner rancher. While the infant's mother was at work in an adjoining room, the child came upon a bottle of laudanum and drank the aweet contents. He went into his mother's bedroom and his mother heard the fall of a body and rushing into the room found the boy lying on the floor. Mrs. Thorpe could not awaken him, and she ent for help.

The child was beyond belp when the physician arrived from Dayton. polsonous draught was taken at 3 o'clock and the child died at 4 the next

"Blind Man Eloquent" 85 Years Old. Bellefontaine, O., Feb. 9.-Judge William H. West, popularly known as the "blind man eloquent," was \$5 years old today. Judge West formerly was one of the best known public men of Ohio, He wrote the first Republican editorial ever published in this state, and served in the legislature, as attorney general and on the bench. He is best remembered by the country at large for his loquent speech placing Blaine's name before the Republican national convention in 1884. He is the only surviving member of the Ohio delegation which supported Abraham Lincoln for presi-

South Dakota Grain Men Meet. Sloux Falls, S. D., Feb. 9.—Grain men from all parts of the state are in at-tendance at the third annual convention of the Farmers' Grain Dealers association of South Dakota, which opened here today for a two days' session. Some of the members of the organization came from other states, as distant as Minnesota and Iowa. This applies to flat buildings as well is strictly a farmers' affair, formed for

Do you cough so hard that, seemingly, you are tearing your throat and lungs to pieces? Have you shortness of breath, and rattling and wheezing in the chest? Take care! Get Dr. Bull's Cough Syrup at once, before too late. It will cure the cough, and soothe the racked throat and lungs.

Cough Syrup Mrs. Katherine Blanck, 129 E, 9th St; Flat 2, Cincinnati, Ostates: "I caught cold which settled in my chest, and also threatened my lungs and caused me to cough very much, etc. By taking Dr. Bull's Cough Syrup I was assured of a good restful night; and, three bottles of the Syrup cured me of a very troublesome cough and cold,"

## **Colonist** Rates

and the Great Northwest

The management of the Oregon Railroad & Navigation Co. and Southern Pacific Co. (Oregon Lines) takes great pleasure in announcing that the low rates from eastern cities, which have done so much in past seasons to stimulate travel to and settlement in Oregon, will prevail again this spring DAILY from March 1 to April 15, inclusive.

## People of Oregon

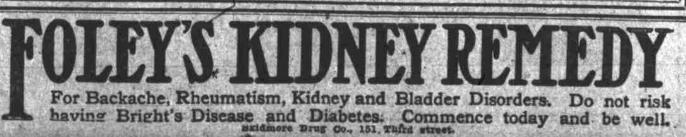

The railroads have done their part; now it's up to you. The colonist rate is the greatest of all homebuilders. Do all you can to let eastern people know about it, and encourage them to come here, where land is cheap and homebuilding easy and attractive.

FARES CAN BE PREPAID at home if desired. Any agent of the roads named is authorized to receive the required deposit and telegraph ticket to any point in the east.

REMEMBER THE RATES-From Chicago \$33, from St. Louis \$32, from Omaha and Kansas City \$25. This reduction is proportionate from all other cities.

WM. McMURRAY, General Passenger Agent, Portland, Or.

SILVER FILLINGS ......50¢ BRIDGE WORK Which works perfectly and chews your food as well as the natural teeth. A well-made bridge is one of the greatest blessings it is possible for a skilled dentist to provide his patient. A wellplaced bridge lasts a lifetime and never causes annoyance of any kind. Call and have us give your teeth a free examination and get our estimate on your dental work. If you are nervous or have heart trouble, the Electro Painless System will do the work when others fail. All work warranted for ten years. **Electro Painless Dentists** 303% Washington St., Corner Fifth Across From the Perkins Hotel. Office Open Evenings and Sundays. Lady Assistant in Attendance.
