That Postal Deficit

Postmaster-General Hitchcock reports that the Post-Office Department loses \$64,000,000 a year in the business of carrying second-class mail (magazines and periodicals).

There is not a deficit of \$17,000,000, as the department alleges, but actually a surplus of more than \$10,000,000, when the specific loss on free rural delivery is taken into consideration, and the department's figures of \$64,000,000 loss on second-class matter are wrong by more than \$60,000,000.

THE SATURDAY EVENING POST

for February 12th devotes its editorial page to this subject, showing the injustice of the recommendation to raise the rate on all magazines and periodicals—but not on daily papers or the country weeklies.

One fact: In the year ended June 30th, 1908, the weight of second-class matter compared to 1907 decreased 18,000,000 pounds. The postal expenditures increased \$18,000,000. There is something in it besides second-class matter.

Look for a dozen more facts in this week's (date of February 12th) number of THE SATURDAY EVENING POST.
