

CONCILIATION SITE FOR CREMATORY

Mayor Simon Says Fight Is Most Bitter He Ever Saw—Superintendent Daggett Explains Needs of City.

"There is no desire on the part of the insurgent councilmen to select a site for the new city crematory," said Mayor Simon this morning.

"It makes no difference to me or the board what site is chosen. If the committee should recommend the purchase of the block adjoining the city hall, and the council should approve the recommendation, we would be willing to build it there."

"We need a crematory badly, though, and if we wait for the council to make the selection we will never get it. I can understand what motive could impel the councilmen who are fighting the health board. They certainly did hard."

"The council itself designated the site of the Gull's lake burner years ago, and as the city already owned ample acreage there, the health board could have no reason for spending a large sum of money for additional ground somewhere else. Such a policy would have been anything but economical."

SUPERINTENDENT DAGGETT EXPLAINS CITY'S DIFFICULTIES

Charles L. Daggett was superintendent of the garbage crematory during Mayor Lane's administration. Long experience has made him well informed in regard to the Portland problem of garbage disposition of the city.

"No committee from the council will succeed in finding a location for an incinerator within the city limits."

"The recall would be instituted against any member who should vote to have the incinerator located in his ward."

"Garbage disposition must be reduced to system—must be taken from the city. This is the only successful plan."

"One hundred thousand tons of rotting refuse at Gull's lake will scatter disease and death in Portland with the coming of hot weather."

"It matters not in how sanitary a manner the crematory may be operated, it will reduce the value of property in its vicinity from 40 to 75 per cent. Present conditions are bad. The crematory was too small when I went there four years ago. For that reason the disease breeding dump had to be built. It was not built because it was not safe or sanitary or even decent. Another fact is that no crematory can be constructed in the city to absolutely obviate the necessity of a dump."

"There are many things collected in the city that cannot be disposed of otherwise. Rotten fruit, the weekly load of broken, jagged beer bottles from the breweries, hoop iron, baling wire, lime, plaster, brick and rubbish of many kinds cannot go into the crematory, and all must be sold wherever the cans find a reduction plant to aid us in utilizing matter."

"Only One Plant Needed."

"The council has appropriated \$120,000 for a new incinerator. The present site is worth \$40,000, totaling \$160,000. The same amount of cost applies to any east side location. If four crematories are built, as is proposed, the total will be \$640,000, yet without having provided for collection in a sanitary way, which would be at least \$200,000 annual cost to the city. Should the garbage be carried away from the city by dredges or trains by contract, the cost would be little and the plan could be gotten into operation within 40 days. Should boats be used, collections could be made at several points on both sides of the river, giving each side impartial service. Under the present system a garbage collector goes over the city wherever the cans find patrons. The system is slow, tollsome, inadequate and dangerous."

"Mr. Daggett said that he had written to many large cities to learn if their systems were like that of Portland, and he found without exception that the major part of the garbage was taken from the cities to outside points, it not being considered safe to reduce or consume it near the homes of the people."

"Boys Out on Lark."

After touring the east side for two hours last evening, Harvey and Howard Larson, 9 and 10 years old, respectively, living at 351 East Thirteenth street, went to sleep in a shanty at Ninth and Hawthorne avenues. The boys were found by Patrolman F. B. Litherland, and taken home. They said they only went out to walk around.

"Mrs. J. A. Sturtevant."

(Special Dispatch to The Journal.) Lebanon, Or., Feb. 12.—Mrs. J. A. Sturtevant died at the home of her son, Dan F. Sturtevant, at Crowfoot, Monday evening, February 7. She was about 75 years old. Three sons survive: Dan F. and Henry Sturtevant of Crowfoot, and Duane H. Sturtevant of Halsey, and several grandchildren and other relatives, at Crowfoot and at her home in Illinois. She had lived with her son for some time after coming to Oregon from Illinois upon the death of her husband. She was well known and well liked.

MURDER, FIRST DEGREE, CHARGE AGAINST GOHL

Information Is Filed in Superior Court at Montesano Accusing Grays Harbor Man of Slaying Hedberg

(Special Dispatch to The Journal.) Aberdeen, Wash., Feb. 12.—Information charging William Gohl with murder in the first degree, was filed in the superior court at Montesano today by Prosecuting Attorney William E. Campbell. It is alleged that Gohl killed Charles Hedberg on December 24, near Indian creek, or thereabouts. A long list of witnesses signed the paper. The police claim a strong case against Gohl. They say they will prove he killed Hedberg. A copy of the information was given Attorney A. M. Abel, who will defend Gohl. Abel will be given opportunity Monday to file objections to the complaint. Under the new code, the prosecuting attorney has 30 days in which to file information for murder in the first degree, so it is not expected that the defense will institute habeas corpus proceedings.

"Difficulty to Secure Jury."

Attorney Abel has not yet made up his mind whether he will ask for a change of venue. The dates for jury terms in Thurston and Lewis counties will influence his decision. He says that if there is no jury term in either of these counties for two or three months, he will not ask for the change of venue, but will go ahead, rather than keep his client in jail.

"Nurse Tells How SHE WAS INJURED"

Takes Stand in Own Behalf in Heavy Damage Suit Against Car Company.

Taking up the defense, attorneys for the Portland Railway, Light & Power company this morning introduced expert testimony in the \$100,000 damage suit brought by Ada E. Blue, the nurse who was so horribly mangled and injured Decoration day on the Sunnyside line.

"Dr. A. E. Rockey, G. B. Sabin and George F. Wilson were put on the witness stand to testify to the young woman's injuries that the automobile company's engineers, was called to testify as to the angles of the curve at which Miss Blue was thrown."

"The plaintiff's stand last night, after Miss Blue herself had testified. Witnesses for the plaintiff numbered 27. A like number probably will be called by the defense. Miss Blue told a straightforward story. She said that just before the inbound car reached Thirty-ninth street east, where she desired to get off, she found the conductor was not at his regular station. Then she discovered that the conductor was running it."

"She had no means of signaling, so she started for the front platform. Just as she reached the door the car swung around the reverse curve and she was thrown headlong, to be dragged several feet. Jurymen made a careful examination of her scalp and cuts on her face. One feature of the Blue case yesterday was the request that the jury be instructed to disregard an article appearing in one of the papers to the effect that he had admitted 'polling' the jury."

"I did not poll the jury, and neither did I make a statement to the effect that I did," said Mr. Davig. Judge Gantenbein told the jury that the article was not born out by the facts as they appeared in court, and that no evidence existed to show that Mr. Davig had even attempted to poll the jury had been introduced.

"Will Stop Fights SAYS ASSOCIATION"

"We shall not permit another prize fight in Portland if we can prevent it," declared President D. A. Pattullo of the Municipal association, this morning.

"The mayor has announced that he does not care to discuss this matter of pugilistic exhibitions further. He evidently prefers silence. So do we for the time being, because we do not care to have our opposition to the class of exhibitions that have been given in Portland to degenerate into mere bluster. We mean business. We will be heard from if the practice is continued."

"The officers who have the duty of enforcing the law, if they will, have been fully informed of conditions. If they do not care to act with all this evidence, why, we will initiate the action ourselves. To stop the practice is our desire, and we will stop it. If we can have our cause upheld by the citizens we will not care for the officials."

"Cavalry for Walla Walla."

The First United States Cavalry, which has just reached San Francisco from Manila, will leave the Bay City tomorrow for Walla Walla and will pass through Portland late Monday night. The special train will consist of six box cars, seven tourist cars, one standard steamer and a baggage car. The First is to be stationed at Walla Walla.

WOULD SAVE LINCOLN MEMORIAL

Lincoln birthplace memorial building, from a recent photograph.

Owing to the obstinacy of Speaker Cannon in not allowing a bill for the appropriation of \$50,000 for the maintenance of the Lincoln Birthplace Memorial building, this building is without means of support. It is nearly completed and the funds subscribed by the people of the country recently for the building of the memorial have amply covered this expense. The Lincoln Farm association is now planning on raising the funds for the maintenance of the building. The fund which the association wishes to raise will amount to \$50,000. This amount placed on interest it is believed will be sufficient to cover the necessary expenses of the association in providing a caretaker, and such other adopt individual and corporate contributions should be sent to the Lincoln Farm association, 74 Broadway, New York City.

The present memorial building was built through the contributions of the American people in amounts of 25 cents each. The plan adopted for the securing of the maintenance fund is to be practically the same. It will be under the direction of the trustees of the Lincoln Farm association, who are Joseph W. Folke, Clarence H. Mackay, Richard L. Jones, Robert J. Collier, Frederick E. Pierce, Horace Porter, William H. Taft, Joseph H. Choate, August Belmont, Henry Waterson, Jenkin Lloyd Jones, Samuel L. Clemens, Cardinal Gibbons, William Jennings Bryan, Edward M. Shepard, Charles E. Hughes, Charles A. Towse, Thomas Hastings, Sampel Gompers, Norman Hapgood, Oscar S. Straus, Ida M. Tarbell, William Travers Jerome, Augustus E. Wilson, Albert Shaw, Charles E. Miner, Lyman J. Gage.

ADVISES LEADERS

(Continued From Page One.)

His omission. He would have it so amended that only registered members of the committee could put its machinery in motion.

"Must Not Tamper." The Republican party must not tamper with the direct primary law, Judge Calkins warned the members of the committee. It should uphold it. The people of the state had enacted it in revolt against the old times and the old methods, and the Republicans of the state had passed those times by and outgrown them.

"The primary law commends itself as a sensible restrictive measure, Judge Calkins said, providing a general election within the party to choose candidates on the same principle as the general election proper. Judge Calkins called up the ghost of the last campaign in his discussion of the primary law and the loyalty due the nominees of the party under the law."

"Not on Common Ground." "Looking deeper than mere incidental matters, the only explanation I can give of this condition is that the party has not attempted to stand together on any common ground, but the politics of the state has degenerated into a mere scramble for office, with as many platforms as there are candidates, and the maintenance of such a condition cannot be advocated by true Republicans."

"The failure of the party to support the party organizations as they are provided by our primary law is ignoring the best provision ever devised for the conduct of parties. It is not necessary and proper method, and the only one who have some part in its management, and I attribute the present unsatisfactory condition of the party to a large extent to the fact that it, and consequently the primary law as this respect."

"Reputed Methods Dead." "But the Republican party will never go back to the old reputed methods, either in the construction or conduct of an assembly. It has passed them. It will not be an assembly that it will be to benefit any particular man or set of men. It will watch such construction and conduct with a critical eye, and today, in so far as the Republican party favors an assembly, it does so based on a demand that such an assembly be open, free and untrammelled by personal interest of its promoters and fair in its actions."

"To Form Assembly." Judge Calkins, in closing, suggested that should an assembly be taken on any basis on a precinct representative plan, each delegate being elected by the Republican voters of his precinct. Following Judge Calkins' address, it was decided that no action be taken on the election of his successor until the last thing at the afternoon session of the committee.

"Tablet for Lincoln 'Wigwam'." Chicago, Feb. 12.—A bronze tablet erected by the Chicago chapter of the Daughters of the American Revolution to mark the site of the 'wigwam' where Abraham Lincoln was nominated for president in 1860 was unveiled today with interesting ceremonies. The site is located at Lake and Market streets and is now occupied by a wholesale grocery firm. The tablet was designed by John Pauling, the sculptor, and bears the head of Lincoln in bas relief, together with suitable inscriptions.

"Fairbanks Speaks at Rome." Rome, Feb. 12.—Charles W. Fairbanks, former vice president of the United States, delivered an address today at a gathering of the American colony in Rome held in celebration of the anniversary of Lincoln's birth.

"A so-called gasoline engine of the average type might more aptly be called a hot air engine, as it uses 10,000 times the volume of air as it does gasoline."

FALLS TO DEATH

Umbrella Mender in Scuffle in Hotel When Accidentally Pushed Out.

In a scuffle on the second floor of the Holladay hotel, 274 Holladay avenue, yesterday evening at 7 o'clock, J. L. Staden, an umbrella mender, was pushed from a window and fell to his death 25 feet below. Victor Dole, one of the men in the room is accused of pushing the man. Martin Knavel, W. A. Kals and Jacob Sittell are held at the police station in connection with the fatal fall. They were in the room. The five men had been drinking in a front room. The window was up from the bottom and Staden was standing nearby. Dole and Staden became involved in a friendly scuffle, and the latter fell against the window. As he tumbled out of the window his companions attempted to grab him, but it was too late. The man fell head downward. His skull was badly crushed.

T. D. Hayworth, proprietor of the hotel, heard the man strike the sidewalk and ran out, but Staden was dead. Patrolman F. Traut placed the other men under arrest, pending investigation by the coroner. Little is known of the men. Staden came from the east six months ago, and has been rooming at the Holladay hotel the past three weeks. The other men also roomed there.

With headquarters at the Imperial University of Oregon Glee and Mandolin clubs are in Portland to meet tonight at the Bungalow. Professor I. M. Glen, dean of music, and H. M. Warren, trainer of the Mandolin club, are with the college lads.

UNIVERSITY GLEE CLUB IN PORTLAND

Last night the boys had a very successful concert in Salem. The crowd was larger than any that ever attended an Oregon Glee club concert there and was very appreciative. The Glee club's songs, "A Phantom Band," "Hark! a Trumpet Soundeth," and "My Cousin Caruso," were pronounced the best the club had ever given. The baritone solos of Professor Glen and Kenneth Fraser of Portland also took well. The "Falletto Trio," and Francis Curtis of Portland, as "Madame Yelba," fairly punctured the roof with their high falsettos and kept the audience in an uproar of laughter.

The local granges had not yet taken action, and expressing the hope that they could be prevented from taking such a stand.

The committee also seems to be in the air over the selection of a successor to Judge Calkins as chairman. J. V. Johnson of Baker county, C. G. Huntley, Clackamas; G. C. Fulton, Clatsop; W. E. Stevens, Columbia; A. S. Marsters, Coos and Douglas; M. Fitzmaurice, Gilliam; C. T. Earley, Hood River; C. N. McCreary, Jackson; H. L. Holgate, Klamath; C. S. Moore, Lake; E. O. Potter, Lane; J. N. Smith, Marion; W. W. Smeed, Morrow; W. M. Calkins, Multnomah; R. E. Williams, Polk; E. V. Littlefield, Sherman; H. T. Botts, Tillamook; Lee Moorhouse, Umatilla; Charles E. Cochran, Union; J. H. Worsley, Wasco; W. W. Steiner, Wheeler; G. S. Wright, Yamhill.

COMMONWEALTH DAY ATTRACTS VISITORS

(Special Dispatch to The Journal.) Eugene, Or., Feb. 12.—There was a large audience at this morning's session of the commonwealth conference at the University of Oregon. Visitors from nearly every section of the state are here and interest is far greater than it was last year. The subjects under discussion are of the utmost importance to the state, especially the Willamette valley.

This forenoon Hon. Austin T. Buxton, master of the State Grange, spoke on the improvement of the condition of country life in Oregon. He was followed by Richard W. Montague on "Organization and Agencies for Securing Publicity in Public Affairs in Oregon." The discussion on this topic was led by Hon. W. J. Vawter of Medford. This afternoon State Engineer John H. Lewis will talk on "Irrigation in the Willamette Valley."

John T. Whittier, consulting government engineer, spoke on "Features of the Commonwealth Policy for the Development and Conservation of the Water Resources." E. T. Allen spoke on "A Forestry Policy for Oregon."

Last evening addresses were made by Rev. Luther R. Dyott of Portland, Judge Stephen S. Lowell of Pennington, President Homer of Willamette University, and others.

"Speak Before Women's Club."

Dr. Benjamin Young and D. Solis Cohen were the speakers before the Portland Women's club yesterday at what was called "Civics Day." The relation of child, parent and state were discussed freely by both the speakers and the club members. The meeting was especially well attended.

DEAFNESS and CATARRH

SUCCESSFULLY TREATED BY "ACTINA"

Ninety-five per cent of the cases of deafness brought to our attention is the result of chronic catarrh of the throat and middle ear. The air passages become clogged by catarrhal deposits, stopping the action of the vibrating bones. If these deposits are removed relief is impossible. The inner ear cannot be reached by probing or syringing. It is the inability of the specialist to always give relief. That there is a scientific treatment for most forms of deafness is demonstrated every day by the "Actina" treatment. "Actina" passes through the Eustachian tube into the middle ear, removing the catarrhal obstructions and loosens up the bones (hammer, anvil and stirrup) in the inner ear, making them respond to the vibration of sound. "Actina" is also very successful in relieving head aches. We have known people afflicted with this distressing trouble for years to be completely relieved in a few weeks by the "Actina" treatment. It has also been very successful in the treatment of grippe, influenza, colds and other troubles that are directly or indirectly due to catarrh. "Actina" will be sent on trial, postpaid, in relieving head aches.
