

### WALLOWA COUNTY SHEEPMEN WANT RANGE IN FOREST

Woolgrowers Say They Were Injured When Lines Were Changed—Opposed to Any Reduction of Boundaries.

(Special Dispatch to The Journal.)  
Wallowa, Or., March 10.—Wallowa sheepmen are bitterly opposed to the proposed reduction of the boundaries of the Wallowa national forest. In a meeting of the Wallowa Woolgrowers' association ringing resolutions were adopted which support the policy of the forest service, and show that if there has been discrimination it has been against the stockmen of Wallowa county. The sheepmen of Union and Baker counties have complained of the shortage of pasture and got an allowance of territory off the Wallowa allotment. The resolutions show:  
"That at a meeting of the stockmen who used the Wallowa reserve held in Wallowa, November 15, 1905, a committee of sheepmen was selected by the users of the reserve consisting of eight members, four of whom were from the Wallowa side of the forest and four from the Baker and Union side. This committee was selected for the purpose of dividing and allotting the range in the forest and recommending such division and allotment to the forest officials."  
**Range Divided by Stockmen.**  
"That it was represented to this committee that for the year 1905, Baker and Union county growers had 216,000 head of sheep on the range, and that Wallowa county growers had 150,000 head on the range. Upon this showing for 1905 the committee recommended for 1906 that Baker and Union county growers be allotted range for 160,000 and Wallowa county growers be allowed range for 125,000 head of sheep."  
"That in 1905 Baker and Union county combined had only 114,233 head of sheep associated, and in 1906, 130,671 head, and Baker and Union county growers applied for range on Wallowa reserve for 1906 for only 88,574 head, whereas Wallowa county had 178,112 head of sheep on the assessment roll for the year 1905, and 171,968 head on the roll for 1906. The Wallowa growers petitioned for range for 101,119 sheep."  
**Wallowa Lost Range.**  
"This would have naturally called for a recommendation that Baker and Union county growers be given allotment for 100,000 head, and Wallowa county growers have range for 132,000, or Wallowa county would be entitled to have range for 32,000 head more sheep than the growers of Baker and Union counties combined. Since 1906 the number of sheep in Wallowa county has been decreased by being deprived of range by change of division line by at least 23,000 head, while the number in Baker and Union counties had increased by 7,148 as shown by assessment rolls of those counties."  
**Sheep Pinched Out.**  
"It is clear that Wallowa county growers have been wrongfully injured, and have just cause for complaint, while Baker and Union county growers have secured unearned rights far beyond what was rightfully due them before the grazing season of 1907 began. Supervisor O'Brien, at the request of the users of the south side of the reserve moved the original line north, in some instances as far as ten miles, taking away from Wallowa county growers grass sufficient to support 11 or 12 bands of sheep through the summer grazing season."  
**Demand Original Division.**  
"In view of the fact that there are

### SNOWSLIDE LEAVES TERRIBLE DEVASTATION

Burke, Idaho, overwhelmed by snowslide February 28. Houses crushed and buried under the great pile of snow shown in the picture. Six people were killed.

With dogged heroism and little complaint, the survivors of the Burke and Mace fasho, snowslides are digging their possessions and their friends out of the debris of the buried towns. Injured to hardship, led by experience into the habit of taking things as they come, Attorney George S. Shepherd says he heard little comment from the people who are left when he went to Burke to bring back the body of his brother Dave, who was killed in the avalanche.  
"It was a sorrowful sight," said Mr. Shepherd. "In the path of the slide all things were doomed. Houses had been swept away, great trees, more than two feet thick were snapped off short as if they had been straws. Telephone poles were broken, wires torn down, high power lines furnishing electricity for the mines destroyed."  
"Rains falling after heavy snows caused the slide. Burke, I found at the bottom of West Hecla gulch. A little bit of snow crust dislodged from a crag 500 feet above had started the avalanche. At the bottom of the gulch and 600 feet from the path of the slide a house was drawn by the suction of the slide off its foundations and against another house several feet distant. The people in the house, miraculously, were unhurt. Several miners were sleeping in a cabin. The slide struck the cabin and destroyed it. All but the room in which the men were sleeping. The mass had gained such momentum that it was thrown 300 feet high on the opposite side of the canyon. Matured trees were whirled with it like matches, but one little sapling almost in the path of the slide was not harmed. Such are the freakish actions of a snowslide."  
"The first slide came at 11 o'clock on that fatal Sunday night. It was at Mace. My brother and A. D. Richott and James Rogers went down and worked for hours at the rescue. They came home to Richott's house, wet, exhausted with their labor. They had but gotten their clothing changed when the Burke slide came at 4:30 a. m. They had no chance."  
"The snow at Mace was piled 40 to 50 feet deep. At Burke it was not so deep. But the railroad track was deeply buried. I had less difficulty in reaching Burke and getting away, however, than I had expected."

### THIS MAN SENDS MACHINE THROUGH AIR IN NEW WAY

At All Events, He Will if His Theory Works Out; Believes Airships Should Go Endwise, Not Sidewise.

(United Press Special Wire.)  
Victoria, B. C., March 10.—Zepplin, Curtiss, the Wright brothers and Blériot will very soon be totally eclipsed when Victoria's flying man takes his machine out, about 60 days hence. A ship that cannot collapse, that can fly in a gale, that can be built to carry 50 men and that can make a speed of 100 miles an hour is the latest Victoria invention. The inventor is W. W. Gibson.  
The new Gibson ship is made to fly end-on, instead of sidewise like all the others. It is an aeroplane with two long planes and a powerful engine and is capable of all sorts of development. In the opinion of the inventor it will be the style of ship used in future both for carrying one or two men and for transporting as many as 50 at one time. It will be capable of making long flights and doing so in perfect safety. Gibson has the framework of the ship partly ready and the engines are complete and one set of propellers has been attached. The planes, however, the most important part of the new invention, are locked away out of the way of prying eyes.  
Gibson has not the slightest doubt of the success of his ship. He has made a number of models, the first being only about a foot in length, but the latest were five feet long and all worked perfectly. They were noncollapsible, and if turned over by main force immediately righted themselves.

### ASHLAND ELKS ELECT OFFICERS

(Special Dispatch to The Journal.)  
Ashland, Or., March 10.—Ashland lodge, Benevolent and Protective Order of Elks, held its annual election Saturday. The officers for the ensuing year are: Alexander Livingston, exalted ruler; George W. Owen, esteemed leading knight; F. G. Swedenburg, esteemed loyal knight; H. H. Gillette, esteemed lecturing knight; H. C. Spary, secretary; F. Frost, treasurer; J. A. Bailey, tiller; trustee, G. A. Kroblanch; C. H. Vaguel, C. H. Pierson.  
The lodge is in a flourishing condition, with a membership of 442. The \$50,000 temple will be ready for dedication some time in May, and preparations for the big event are already under way.  
"More good roads is what we need. Douglas county soil is unequalled and our climate is unequalled," says the Roseburg Review.

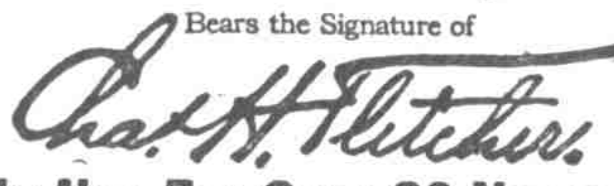

### Children Cry for Fletcher's CASTORIA

The Kind You Have Always Bought has borne the signature of Chas. H. Fletcher, and has been made under his personal supervision for over 30 years. Allow no one to deceive you in this. Counterfeits, Imitations and "Just-as-good" are but Experiments and endanger the health of Children—Experience against Experiment.

#### What is CASTORIA

Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrups. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It destroys Worms and allays Feverishness. It cures Diarrhea and Wind Colic. It relieves Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

The Kind You Have Always Bought Bears the Signature of

In Use For Over 30 Years  
THE CENTAUR COMPANY, 77 MURRAY STREET, NEW YORK CITY.

### PURE MILK LAW FOE OF TYPHOID

State Board of Health Commends Portland's New Statute.  
Commendation of the pure milk ordinance recently adopted by the city occupies a large part of the state board of health's report, which has just been issued by the secretary, Dr. Calvin S. White. Confirmation of statements made concerning the evil condition of the dairies is also included in the report, part of which says:  
"The ordinance is the result of the combined efforts of the city and state boards of health, assisted by the bureau of animal industry. Investigations by these boards revealed the fact that in the immediate vicinity of Portland nearly every dairy was sadly lacking in sanitation, and many of them were filthy beyond description. As a result of these investigations the city council passed an ordinance, the essential features of which are worthy of adoption in every city of the state desirous of securing clean milk."  
**Combine to Enforce Law.**  
The method of enforcing government, state and city authorities in an effort to enforce pure milk laws is commended. The ordinance is printed in full. Concerning typhoid fever in Oregon, the report says:  
"During the month of November, 192 cases of typhoid fever with 25 deaths were reported, and during December 219 cases with 26 deaths, a total of 441 cases with 51 deaths. During this same period 79 deaths occurred from tuberculosis and 24 from all other infectious diseases. Thus there were one-third more deaths from typhoid fever than from all other acute infectious diseases combined during the month."  
**Typhoid Problem Hard to Solve.**  
"Not only in our state, but in every state, the solution of the typhoid fever problem is one beset with the utmost difficulty, since the disease is transmitted generally by two of the most important food demands, water and milk. Unless handled with absolute cleanliness from the moment it is produced until it is consumed, milk can be and frequently is an avenue of infection. At times infection originates from typhoid fever in the family or employees of the dairyman, or it may originate from impure water used in cleaning utensils. If bottles are furnished to patrons having typhoid fever, the source of infection may come from careless handling and cleaning of them."  
"It is certain, however, in this state at least, that the water supply is the chief source of dissemination of the typhoid fever organisms. There is ample proof in the fact that cities and towns with a protected water supply suffer very little from the ravages of the disease. An unprotected water supply may not only infect the individual directly through drinking the water, but also infects other articles used in the household, especially those that are washed in water and eaten uncooked."

### NORTH COAST BEGINS FIGHT FOR ROUTE

(Special Dispatch to The Journal.)  
Kennewick, Wash., March 10.—Enjoined by Superior Judge O. R. Holcombe from continuing its line along Front street in this city, the North Coast Railroad company has filed condemnation proceedings against the Charles H. Collins company upon whose petition the injunction was granted. This suit, it is understood, is the beginning of condemnation proceedings that will be brought against the abutting property owners of Front street.

## An Edison Phonograph will surprise you

The first time you hear it you will be surprised at its goodness. Everybody is—particularly the first time you hear the Edison Phonograph play an Amberol Record. People who have heard Phonographs talked about, or who have heard them at a distance on the street, or who have heard some other make of sound-reproducing machine, do not realize the remarkable goodness of the Edison Phonograph.  
This is partly due to the wonderful sapphire point which does not scratch or make any sound, and partly due to the wonderful Amberol Records which are so smooth and clear that they can reproduce the finest violin melody with all its natural sweetness.  
This is the same instrument which plays and sings those musical comedy songs which everybody whistles.  
The Edison Phonograph does everything and does it well. Is there any reason why you should not have one?  
Edison Phonographs - \$12.50 to \$200 Edison Amberol Records (play twice as long) etc. Edison Standard Records - 85c Edison Grand Opera Records - 75c and \$1  
There are Edison dealers everywhere. Go to the nearest and hear the Edison Phonograph play both Edison Standard and Amberol Records. Get complete catalogs from your dealer or from us.  
National Phonograph Co., 75 Lakeside Avenue, Orange, N. J.  
THE EDISON BUSINESS PHONOGRAPH saves the time of high-salaried men and increases their letter-writing capacity.

### PRUNE GROWERS TO MEET AT DAYTON

(Special Dispatch to The Journal.)  
Dayton, Wash., March 10.—Apple growers of this section are planning to hold their first out of door public demonstration of pruning and spraying. Dayton gets the meeting, which will be held this month under the auspices of the newly organized Columbia County Horticultural society. Plans are being made to accommodate 150 fruit growers, and District Inspector Charles L. Whitney of Walla Walla will superintend the meeting, which may last for two days.
