Only Five Big Ones Get Away.

It was the most comprehensive as well as peculiar system of raiding ever undertaken by the government. The order to make the arrests came over the telegraph wire from the office of Attorney General Wickersham, who, with the bureau of investigation of the bureau of justice—the newly organized secret service department, had been accumulating evidence for two months.

When word to make the raids was ticked over the wiges, the special agents with the detectives, who had been awaiting the call, went forth and swooped

Twelve Hour Day and Recognition Among the Demands Put Forward.

Matthews did not have the ready money with him, and this only served to add to his indignation. He hurried to the Palace hotel and secured the necessary amount, and returning to the dock, took his goods out of the customs warehouse.

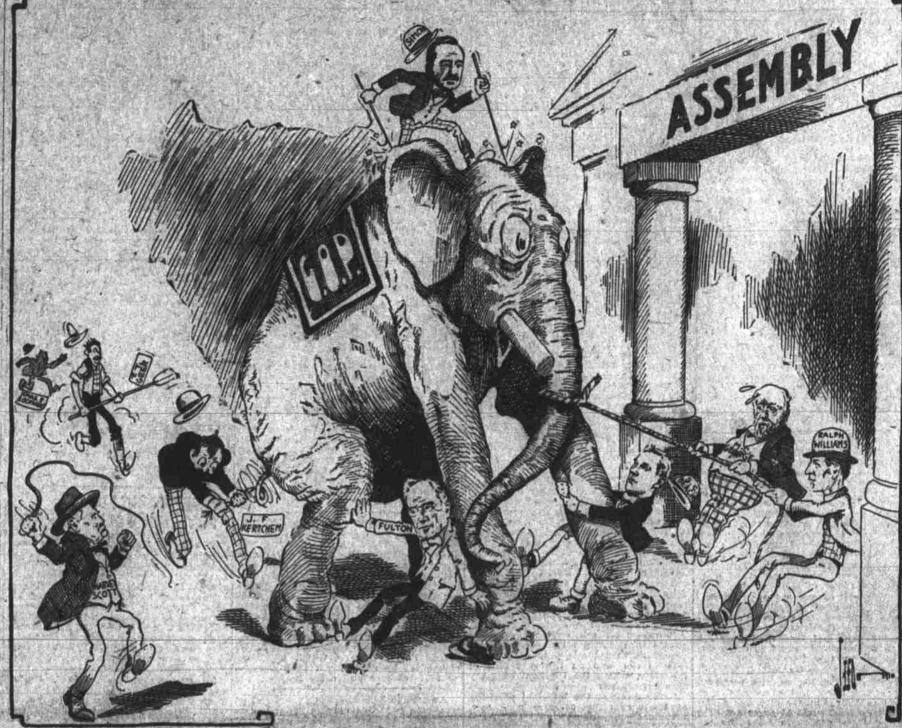

"There were many evidences of concealment," said a customs officer last night, "so we went as far as the law allowed in imposing our fines. We allowed none of the law's restrictions. Articles of art were found tucked away between skirts and lingurie at the bottom of trunks. They gave an appraisement that did not reach a fifth of the value of their goods.

"According to another authority, Mathews explained that the whole transaction was innocent and the difficulty with the customs officers arose from ignorance of the law and not a full appreciation of the value of the goods they had purchased on their trip in the far east.

The couple took apartments at the Palace, and Mrz Matthews was much gratified when the transfer company delivered her trunks, although that had been upset. Mr. and Mrz Matthews are well known in Fhiladelphia.
