best demand because they are best for this purpose. Canning operations will not start un-til next week. Front street houses will be open only half a day Monday be-cause of the Memorial celebration and therefore the bulk of the shipments will come forward on Tuesday unless weath-er conditions interfere. Loganberries and blackberries are coming more treely from California in points and the price is showing a lower point. Half peund boxes of Logan-berries and blackberries are selling at \$1.60 a crate of 16 boxes while the one pound boxes range up to \$1.50 for the same number. Raspberries are generally quoted around \$1.15 a crate for 16 half pound boxes.

opened with an advance caused by fill-ing some buying orders acquired over night. The house which sold out the enormous line of wheat Thursday led the buying of July and September at S the high point, July 95c and September at 93c. The market then turned weak and continued so until the close, being under pressure constantly. It was a foregone conclusion that May wheat would come down to a respectable level before one end of the month, but such a tumble in the price was bardly ex-sected. Nobody cared to step in as a form bad to worse, until July was off sood buyer of the new months at any time during the session and prices went s from bad to worse, until July was off soft at the close was alight. Weakness at Winnipeg, because of rains and promising weather outlook, weakness at Minnespolis on hedging sales against larger country offerings of wheat and the generally bearish feel-ing which pervaded the entire grain trade, encouraged selling operations and forced the break in the new crop months. For the present all adverse reports from the spring wheat country are again in order. It has the appear-ance of a generally oversold market at the finish. but indications are for showers and ris-ing temperatures. In oats, as in the other markets, the May price suffered the most. The cash market was about 1c lower. Hogs at all western points were about to per cent less than last year. Later there was a reaction. If the run of June hogs proves disappointing with light stocks it may prove a strong situation. The weakness in corn and slack consumptive demand are the bear-ish features.
