Low Stage of Water on River steamer Golden Gate. Salled at 7 a. m., Gives Major Opportunity to Work.

Taking advantage of the present stage of low water in the Snake river, Major Jay J. Morrow, United States engineer officer in charge of the Second district, is making an inspection of the river in

The purpose of the inspection being made by Major Morrow is to look over the river in order to find out where to expend this year's appropriation to the best advantage. He started his trip in the vicinity of Riparia or Palouse Rapids, and will make the entire trip to the mouth of the Snake, near Umatilla Rapids, in a skiff, accompanied probably by Captain Bowman, master of the dredge Wallowa.

The present stage of the water in the Snake river, from Lewiston to the mouth of the river overages about half a foot below the zero mark, which was placed by the United States weather bureau officials at the lowest point ever known by rivermen of that section when the gauges were put in. It is expected that this low stage will be of material benefit to the major in making his inspection, as he will be better able to see what places are most

in need of attention. The appropriation for the work on the Snake this year is \$25,000, and at the present time one drill scow and the dredge Wallowa are at work improving the channel. The river is now at the lowest stage that it has ever been since the gauges were put in, and it is impossible for the work to be carried on in some places.

The Wallowa is now at Palouse Rapids, where she is Tasting out submerged reefs, and the drill scow is at Tree Rapids engaged in similar

On the Columbia river the dredge Umstilla is engaged in building wing dams at Homily Rapids. The dams are being built there while the water is high, and as soon as it falls to a point where this work cannot be carried on she will take up the matter of improving the channel. Another drift scow is at work on the Columbia at Umatilla Rapids, blasting out reefs. The improvements being made by the dredge Umatilla, and the drill scow at Umatilla Rapids are being made under a different appropriation than those on

It is expected that Major Morrow will return from his inspection to-

When You Think

Of the pain which many women experience with every month it makes the gentleness and kindness always associsted with womanhood seem to be almost a miracle. While in general no woman rebels against what she regards as a natural necessity there is no woman who would not gladly be free from this recurring period of pain.

Dr. Pierce's Favorite Prescription makes weak women strong and sick women well, and gives them freedom from pain. It establishes regularity, subdues inflammation, heals ulceration and cures to-

CURES

Contagious Blood Poison is the most powerful and destructive of all blood disorders. It corrupts and vitiates the entire circulation and manifests itself in the most hateful and loathsome symptoms, such as ulcerated mouth and throat, copper-colored spots, and even sores and ulcers on different parts of the body. The poison causes the hair and eyebrows to fall out. and sometimes the finger nails come off and the entire glandular system is attacked. No medicine can cure Contagious Blood Poison which does not rid the circulation of every particle of the insidious virus. The least taint left in the blood will break out afresh, when treatment is left off. S.S.S. is the real and certain cure; it goes into the blood and by removing every particle of the poison, and adding rich, healthy qualities to the circulation, forever cures this powerful disease. All who suffer with Contagious Blood Poison may cure themselves in the privacy of their own homes by using S. S. S., and following instructions contained in our Home Treatment Book, which which we will send, together with any medical advice desired, THE SWIFT SPECIFIC CO., ATLANTA, GA. free to all who write.

There is not another physician or specialist anywhere who treats men's ailments as I treat them. This is a fact that should be duly considered by those who have repeatedly been disappointed in their efforts to obtain a cure. In no other Branch of practice has medical science so lagged, and the forms of treatment now commonly employed among the profession are largely based upon theories that have been handed down through generations of doctors. An evidence of this is the prevalent inability to successfully cope with several of those ailments peculiar to men.
