THERE IS NOTHING comparable to the ease, grace and the freedom enjoyed by the wearer of a Warner's Corset. The new models are very long, but are so skillfully designed that they are perfectly comfortable, sitting, standing, walking or half reclining, like the damsel in the willow chair. She looks the acme of cool comfort. Her corset is as daintily fresh as her lingerie or her dimity house dress. It is as easily laundered—all she does is to detach the elastic hose-supporters before putting it with her general laundry. Every part of the corset is guaranteed rustproof—and not only rustproof, but guaranteed to wear, not to break or tear. The hose-supporters are of the best quality and have the famous Security rubber button tips. Call and inspect these corsets.

Redfern Model 85

MARKS A NEW DEVELOPMENT IN CORSET-BUILDING FOR THE AVERAGE FORM. The long, tab-like hip section, which falls between gussets of web, and from which depend supporters, permits very snug lacing and fitting. In other words, if the wearer wishes to effect slenderness, she can lace tightly from the waist down, and still have freedom through the elastic gusset. There are women of average size who have fleshy hips, and they require extra control, and a corset would be out of proportion after fitting the waist, bust, etc., if designed for the hips only. Redfern 85 is decidedly worth the consideration of women of average size. Order now.
