

**PROHIBITIONISTS
IN BIG PARADE**

Demonstration to Be Made Tomorrow Afternoon in Streets of the City.

Planning on a parade that will stretch from 100 to 125 blocks in length, the prohibition forces in the present campaign have their hands full arranging details and planning out interesting features for tomorrow's procession.

It is the object of the committee having the arrangements in charge to avoid all personalities or any figures in bad repute that may be suggested for the parade, although the various churches are largely responsible for what may appear on the floats arranged by them.

The line of march for the parade, which is to begin at 3 o'clock tomorrow afternoon, is as follows, the only possible change being that it may turn at Seventh and Alder instead of at Sixth and Alder:

Division No. 1—Forms on Yamhill street, between Fifth and Park; marshal, W. J. R. B. G. A. R.; mounted police; Grand Army; drum corps; grand marshal and Miss Marie C. Bish; Grand Army; Ministerial association.

Division No. 3—Forms on Madison street, between Fifth and Park streets; marshal, R. R. Steedland; the Congregational churches; the St. Johns section; the Oregon Sunday School association.

Division No. 4—Forms on Madison street between Park and Twelfth streets; Marshal, J. Allen Black; the Presbyterian churches, including the R. P. and U. P. branches of the church; the Salvation Army; the Salvation Army band, first section.

Division No. 5—Forms on Main street between Park and Twelfth streets; Marshal, G. Evert Baker; the Christian churches; the American Volunteers; the Arleta section.

Honolulu's Wondrous Museums

The Aquariums at Waikiki and Bishop's at Honolulu the Most Prominent.

What a world of attractions Honolulu has to offer its visitors. They are numerous and as varied as can be. If you grow tired of mountain scenery, active and extinct volcanoes, drives through picturesque valleys and palm lined avenues, you can rest yourself by visiting the museums.

Unquestionably the most interesting of these is the wonderful aquarium at Waikiki. Of the display of fish gathered Dr. David Starr Jordan, president of Leland Stanford Jr. university, one of the world's authorities on fish, said: "No aquarium can boast a collection of fish more unique in form or colorings, although some have a greater number."

In color and form these are the most beautiful creatures of the sea that were ever known. The weirdness of their coloring is fascinating. Such designs of color have never been seen anywhere except in comic opera costume. Imagine fish scarlet, blue, orange, silver, purple, brown, black and yellow all in curious designs. Some of the fish have long plumes. Some are translucent and you can see their bones. Some have eyes on their backs. Some have eyes that shine like a cat's in the dark. You can watch them play and swim by the hour. Such brilliant coloring in animal life can be seen nowhere else in the world; nothing more delicate in life can be observed elsewhere.

That aquarium is an institution of wondrous beauty. It is all Hawaiian and it shows the life of the sea out there and matches that of the land with a peculiar delicacy.

Another noted museum in Honolulu is that known as "Bishop's." In this museum there has been brought together one of the most interesting and valuable collections of Polynesian and Micronesian curiosities and relics extant. The Hawaiian section is of course first, but many valuable ethnological curios have been acquired during frequent expeditions to the South Seas and represent various forms of life and the habits and customs of the people of all the now important island groups. The Bishop Museum, as well as the aquarium, will richly repay the expenditure of almost any amount of time within their walls, and the scientist and student will find in both a mine of information.

The "Aloha" Excursionists who will leave Portland, February 1, on the S. S. Queen, will have ample time to visit the many points of interest in and about Honolulu, for the ship lays at anchor there seven days during the life of the Floral Festival, the climax of which is the big floral parade on Washington's birthday, February 22. Inquiries for particulars regarding the excursion are coming in rapidly, so much so that it looks as if, at least, one half of the limited number the excursion will carry will be from outside of Portland.

The farm labor bureau of the Jewish Agricultural and Industrial Aid society in New York has recently completed the third year of its work. The bureau not only finds labor for Jewish immigrants who are willing to work on farms, but encourages them after they have gained sufficient experience to establish themselves upon farms of their own. It is evident that there is a large field for this particular philanthropic activity.
