

RUSSIAN DANCERS GIVE REMARKABLE EXHIBITION OF ART

Interesting Story Told in Music and Movements, Not a Word Being Spoken During Performance.

By J. F. S. Everybody who could raise the price... Last night's program was in three parts—the first, the "Legend of Asylade," a ballet...

when in motion, M. Mordkin, the premier danseur, is her equal in grace, quite possibly her superior, and is astonishingly beautiful in some of his dances—particularly that of the bow and arrows.

Following the Asylade came nine numbers that not only gave Pavlova and Mordkin opportunity to show their art individually but also showed some exceptionally diverting folk dances by the members of the ballet. These latter included both Polish and Russian dances.

ASK CONTRIBUTIONS FOR OLD PEOPLE'S HOME

The Old People's Home on Sandy road, is about completed and the society hopes that friends will remember it and will either furnish rooms or contribute towards the furnishing, for it will be impossible to open the home for the reception of guests until it is made habitable.

Klock Company Incorporated. The Klock Produce company has been incorporated by T. B. Klock, J. A. McLeod and W. P. Wilson, the capital stock being \$50,000.

COME TO OREGON FOR POINTERS

Michigan and Wisconsin Timber Owners Studying Best Way to Guard Forests.

Michigan and Wisconsin timber owners have turned to Oregon and Washington for pointers on how to successfully guard against and fight forest fires. This is rather surprising in view of the fact that those states have had the attention of the timber men and loggers many years before the North Pacific forests were touched by the axe.

At a meeting held recently in Marquette, Mich., steps were taken for the protection against forest fires and several speakers pointed to the effective work done here and in the state of Washington since protection against forest fires was taken up in a systematic manner. The current number of the American Lumberman in reporting the meeting, quotes Thomas B. Wyman, forester of the Cleveland-Cliffs Iron company, as having said:

by the associations in this state and in Washington. E. T. Allen, forester of the Western Forestry & Conservation association, with headquarters in this city, has been invited to read a paper at a meeting to be held in St. Paul December 3 and 4, for the purpose of further discussion of this subject, but he will be unable to attend because of having to attend a meeting of his association at Spokane on those dates. However, Mr. Allen will send a paper to be read.

RAISE COWS THAT ANSWER TWO PURPOSES

M. S. Shrock, deputy dairy and food commissioner, returned yesterday from Wallowa county, where with Paul V. Maris, deputy of commissioner's office, he held three dairy meetings in Enterprise, Spokane on those dates. However, Mr. Shrock will send a paper to be read.

Apple Show Officers Indorsed. (Special Dispatch to The Journal.) Spokane, Wash., Nov. 19.—E. F. Carter, Van Diesel, second vice president and chairman of the board of trustees of the third national apple show, has announced that Howard Elliott, president, and Ben H. Elio, secretary and manager of the organization, will be invited to continue in their present offices for another year, at the annual meeting in January, adding also that Spokane will have the fourth annual competitive exposition in 1911.

Six Inches of Snow at Dayton, Wash. (Special Dispatch to The Journal.) Dayton, Wash., Nov. 19.—More than six inches of snow has fallen here since last night, and although it is the first sign of winter this year, few storms have been so severe since in the very middle of the cold season. Farm work is practically over for the year and the orchard owners are hurrying to gather the last of the apple crop, with extra help. Old settlers predict a severe winter.

DORSEY B. SMITH AND BRIDE RETURN TO CITY

Dorsey B. Smith, manager of the Pacific Travel bureau, returned this morning accompanied by his bride from a tour of Mexico. Mr. and Mrs. Smith left Mexico City the very afternoon the students' demonstration began, not because they were afraid of staying, but because they had made preparations to start for dear old Oregon at that very time.

From Mexico City the itinerary took them to Guadalajara, and there, too, it so happened that just as the newly weds had stepped on board the train signs of the uprising against the "Gringos" began to show. And as they approached the American boundary the demonstrations followed close on their heels, but never near enough to touch them.

Mr. Smith says that J. Scott Brooke and his bride, who had just started out on their wedding trip, were caught in the midst of the trouble, for they reached the hotel in Mexico City where Mr. and Mrs. Smith had been staying just as they took their departure. "The uprising of the students was caused by the lynching of a Mexican in Texas about the time that memorial services were held in honor of the dead who had fallen in the battle against the Americans," said Mr. Smith, "and it did not take much to incite trouble. Down with the Gringos, was the cry, and it really looked serious, but we were fortunate in getting away before the demonstration had assumed serious proportions."

Assessment Shows Hood's Growth. (Special Dispatch to The Journal.) Hood River, Or., Nov. 19.—The equalized assessment for Hood River county this year amounts to \$5,824,326. This is considerably over \$1,000,000 more than the assessment amounted to last year. Of this amount the city had approximately \$1,200,000 valuation. It is estimated that the increased valuation next year as a result of the additional bearing orchards will raise the total valuation to \$12,000,000.

LISTEN! We're Not Selling Stock to Develop a Gold and Silver Mine

We did this before we placed a share of this treasury stock upon the market—developed it to a point that disclosed ore deposits—ACTUAL ORE IN SIGHT—great enough to pay back to shareholders their money a HUNDRED TIMES OVER.

We're Selling Stock to Raise Money to Buy a Concentrating Mill & Machine Drills to Equip the Mine

Our booklet, free to all, tells the reason we insist upon this machinery. We could go ahead and mine right NOW—our men are at work every day—and we could ship to the smelter, but WE WILL NOT DO IT! Again, our free booklet gives the reason. We have a MIGHTY mine, and we're going to mine it RIGHT!

WE'RE GOING TO MAKE OUR PEOPLE 200 PER CENT, AND WE BELIEVE 500

On all the money they invest in Swastika stock, and we shall not open our mouths in astonishment if the profit goes up to 1000 per cent. There is no fool business, no game and no "chipmunk" digging in this mine. Our stockholders may depend upon at least 200 PER CENT PER ANNUM ON THEIR MONEY, unless something should arise which no man dreams of now.

The person who doesn't know anything about it—who never has had a day's practical experience in actual mining—who doesn't know the difference between REAL mining and the conduct of the faker who sells shares but owns no mine—who has bought such stock and soured on everything but hard knocks at starvation wages—who wouldn't take an option on a corner lot in Paradise if offered him by an angel—too stupid to learn that mining has made more men rich than any other occupation—who lives in gloom and desolation all his days—THIS man will doubt the statement—is not likely to credit the prediction that once its equipment is complete and all its ten claims at Lakeview and its lime quarry on Lake Pend d'Oreille are in operation, The Swastika Mining & Developing Company will

famous Bunker Hill & Sullivan could pay on its THREE MILLION DOLLARS. Scores of persons do not understand the importance of low capitalization, and it actually often happens that BIG capitalization is deemed superior to a small one, because there seems to be a glow of importance attached to the higher figures. No greater mistake ever was made, unless it be that of surmising the HIGH-grade gold mine superior to the low-grade one, with its millions of tons of ore, as that of the Homestake or the Treadwell. HIGH capitalization does not make the mine. It is the ore which does that. And the QUANTITY of the ore is of the UTMOST importance. Small streaks of rich rock are a fine thing when backed up by profitable ore surrounding them, but the property the SKILLED mining man is after is the BIG BODY that, like the Treadwell, Homestake and Bunker Hill & Sullivan, is ALL ore—the same today, tomorrow, next month, next year, the next 20 to 50 years—the income from them never varying and never ceasing—as dependable as TIME itself.

to install, running each of the 313 working days of the year, and only \$15 ore, we could pay 50 per cent per annum on our entire capitalization; but as it is not expected it will be necessary to sell, at most, more than two-thirds of our stock, the dividends, with the same class of ore, \$15, the mill performing the same service, would go to a little more than 65 per cent.

RUNNING ON 78 ORE, AS ABOVE, PROFITS ON \$500,000 WOULD BE 250 PER CENT, BUT WITH ONE-THIRD UNSOLD OVER 400 PER CENT.

Let the reader figure this for himself. A 50-ton mill would work up 15,650 tons of ore in a year of 313 working days, and at \$78 per ton this would yield \$1,230,700, whereas 225 per cent on \$500,000 would amount to but \$1,125,000. But, as stated, we are confident we shall not sell more than two-thirds of our stock, or, in round numbers, \$333,000. In that event 400 per cent would amount to only \$1,082,250, which would leave \$148,450 as a sort of a surplus fund to draw upon, in case anything happened that the mill might be shut down a day or so for repairs. All these profits are predicated on the output of only the TWO claims we are working now, and only a small 50-ton mill. Double the capacity of the mill and we would have double these dividends; make it four times larger and the per cent of profit would be 1600 per annum, instead of the 200 we have been predicting. At this rate, \$100 invested in 1000 shares of Swastika stock would pay the holder ONE THOUSAND SIX HUNDRED DOLLARS EACH YEAR, or a trifle more than \$5.10 for every working day of the year, including holidays, but NOT Sundays.

THIS DESCRIBES THE SWASTIKA GOLD, SILVER AND LEAD MINES.

They are not short-lived affairs. We have cut the ledge TWELVE HUNDRED FEET up the mountain, at SIX HUNDRED FEET and at THE BASE. This on only TWO of the Ten claims. How deep it goes we do not know, but we are assured by persons who have mined in Idaho for years that we may rely upon even richer ore the further down we go, and a smelter test made at Tacoma shows the average of that we have now to be \$78.43 to the ton. With the 50-ton mill we are now selling stock

We Have No Knowledge of Any Other Business on This Green Earth that on a \$100 Investment Will Pay Its Owner \$5 Per Day AND THESE SHARES CAN BE BOUGHT AT 10 CENTS EACH, ON INSTALLMENTS, TOO, AND ON TERMS SO EASY EVEN A PEANUT VENDER COULD PAY FOR 1000.

Our free booklet is nicely illustrated and it tells all about the mine. Mail US your address and we will mail YOU a copy.

HERE'S WHAT TWELVE PEOPLE SAY CONCERNING THE SWASTIKA

This is to certify that we, the undersigned stockholders of the Swastika Mining & Development Co., Ltd., have personally visited and inspected the property, located five miles from Lakeview, Idaho, that we are well pleased with it and our investment; that we believe, when equipped with necessary machinery such as concentrator, machine drills, etc., it will prove itself a most valuable property and a large dividend payer. We heartily recommend its shares as, in our estimation, an investment which will pay exceedingly generous profits to their owners. We consider the Swastika wisely and economically managed, that its affairs are in honest and competent

hands, and we know that it is in no way tainted with what is commonly known as "wildcatism," but is a substantial and deserving mining enterprise. (Signed.) J. L. WELLS, J. L. Wells & Co., 636 Chamber of Commerce, Portland, Or. H. T. WINTERS, the Chronicle, San Francisco, Cal. H. B. KELLY, 2251 Welton street, Denver, Colo. HUGO REIFSCHNEIDER, S. P. R. R. Co., Union Depot, Portland, Or.

CAN THERE BE ANY STRONGER EVIDENCE OF THE VALUE OF THE SWASTIKA? WE'D LIKE TO KNOW IT IF THERE CAN.

OUR EASY TERMS OF PAYMENT

Scores of people have asked the Swastika directors to give them a better chance to procure stock than 25 per cent cash and 25 per cent per month, declaring they cannot afford to buy on these terms. To grant this favor to one and not to another would not be fair, so it has been decided to treat all alike, and hereafter shares may be had by paying 10 per cent when order is booked, and 10 per cent per month, except that 100 shares and less will be cash, and 200 shares \$10 down and \$10 in 30 days. Here are the new terms of payment: For 100 shares, \$10 cash; 200 shares, \$10 cash and \$10 in 30 days; 300 shares, \$10 cash and \$5 per month; 400 shares, \$10 cash and \$5 per month; 500 shares, \$10 cash and \$5 per month; 600 shares, \$10 cash and \$7.50 per month; 700 shares, \$10 cash and \$7.50 per month; 800 shares, \$10 cash and \$7.50 per month; 900 shares, \$10 cash and \$7.50 per month; 1000 shares, \$10 cash and \$10 per month; 2000 shares, \$20 cash and \$20 per month, etc. In case any purchaser places an order and later discovers that for some unforeseen reason he cannot complete his contract, he will receive stock at 10c per share for all moneys paid the company. Swastika stock is not assessable.
