TANGLEFOOT

By Miles Overholt

Toot was our president—
"We will cat it raw for breakfast and it won't cost us a cent."
Well, that's what we had next morning—mountain views of every size.
They were plump and fat and juicy, but we ate 'em with our eyes.

Then at noon a desert mirage furnished us with luncheon rare.

In the evening we had landscape and each of us took a stare.

And on Sunday Mr. Crowfoot—his front name, you know, was George—Said we'd ought to have a banquet, so we gorged ourselves on gorge.

Yep, we walked across the country till we found some mountain streams, and we dired on gorges, canyons, cataracts and sunlight gleams.

We were handleapped, however, for we couldn't eat at night,
For our food kept in the background when there wasn't any light. Why, I'm giving you no fletion, there were dark and gloomy days
When we had to cut out cating on account of fog and baze.
So we worked and dined and struggled till at last we found the vein and we sold for half a million, honest, we went near insans.

When we counted out our portions, each two hundred thousand bones.

We were tickled most to pieces, Crowfoot, me and Red-eye Jones.

When we ambled to the city, Red-eye said: "Let's go and eat:

Let's fill up on pie and sausage; come on, lads, it's Red-eye's treat."

Let us pause. I hate to tell it, but w'd
plumb forgotten how,
Anyway, we weren't hungry, 'cause, you
see, we'd sten a cow.
And a herd or two of horses, as the
train went rushing by,
And wo'd gorged ourselves with handscapes till there wasn't room for
pio.

We had eaten trains and houses, fields
of grain and hired men.
We had fed our eyes on barnyard, railroad track and hill and glen.
Though we tried to gain some hunger,
we were always doomed to fall.
For unconsciously we swallowed scenery by chunk and bale.

And that's why I'm passimistic, why I'm looking for a hearne;
That is why my money's worthless, though it overflows my purse.
No, my friend, I've been to dinner, are it from this very spot.

J. J. Hill.

From McClure's Magazine.

James J. Hill is his railroad; for 39 years be has been nothing else. Night frightened the whole household. The lid was not broken, the small amount of butter the dish contained was spattered about in every direction. Some idea of the force of the explosion may be had from the fact that a small piece of the glass pierced a solid teacup sitting near without otherwise damaging it. The destruction of the butter was as complete as though it had been was as complete as though it had been and enlarge his road and distribute its was as complete as though it had been are small amount of James J. Hill is his railroad; for 30 years be has been nothing else. Night and day he works for it, with the enthusiasm of a fanatic. He is a tremendous worker—in a very curious way—planning, all the time, how he will extend and enlarge his road and distribute its plans aloud to any listener from the barber to the Wall streat magnate. These who know him best believe that can think successfully only when he talking, and talking to an auditor. And, day after day, he goes down the line of his acquaintances, telling them of his plans, getting their opinion of them, changing and improving them as

he goes along, and finally bringing them out in an entirely different form from any he has talked about. For this reason his enemies have called him a liar. He is really an inventor, inventing and planning aloud. He is, in fact, a very fortunate man; his enthusiasm drives him to accomplish an enormous amount of work, with the greatest of pleasure, every day.
