Weather Conditions.

Portland, Or., Dec. 8.—A low pressure area of moderate strength is central over British Columbia. It will cause moderately high winds this afternoon and tonight along the coast and on navigable inland waters. Warnings for the disturbance were ordered displayed at Blaine, Bellingham and Anacortes at 7:15 a. m., and they will be extended to coast stations and to other inland stations later should the storm prove to be severe enough to warrant them. During the last 24 hours light rain has fallen in western Oregon and in western and northern Washington. The rains have extended south into California as far as Sacramento. The two eastern storms have united and formed a single disturbance which is central this morning north of Quebec. Unusually low temperatures continue in the Mississippi valley and in the south Atlantic and east Gulf states. On the Pacific slope the temperatures as a rule are slightly above normal.

EDWARD A. BEALL, District Forecaster.

Although there are now two classes here at the time, two more are to be organized, one to meet at 41 Yamhill at the home of Mrs. M. Miller, and one in the Chinese quarters. Classes will also be organized in southern Oregon. E. E. Gerlinger and R. D. Merchant, who are the most active local members, will have charge of the details for the entertainment of delegates to the national convention of Esperantists that is to be held in Portland next July. In addition to the new classes these plans were discussed at the last evening's meeting. Regular meetings on the first Wednesday of every month are to be held hereafter.
