REJECTIONS SPUR POTATO TRADE TO SELL AT STATION

Too Many Cars Turned Down by Buyers in the Bay City Market When Price Weaker —Onion Situation Stronger.

Portland. This is the way Portland is compelled to purchase its supplies in the Bay City, and the trade here feels that it is a rule that can be worked with success both ways, especially as Portland has not yet learned the rejection methods as have the buyers of the

It is a favorite method of the southern buyers to reject carloads of potatoes bhipped from here whenever the market in the California city is on the downward movement, or else sales are harder to make. No one here ever heard of potatoes being rejected by a San Francisco dealer when the market was advancing, and therefore it looks queer to the trade that quality is only imperfect when the price is sagging or demand at when the price is sagging or demand at

Boosters Wot Buying. Those California dealers who were boosting prices so high a short time ago in order to unload their speculative surplus are not now buying. They have more than they need. Since they have placed the price upon too high a basis the consumption has been greatly curtailed and supplies that were figured to last but 80 days upon a normal market will now hold out for 100 days. ke; will now hold out for 100 days.

There is very little buying of potatoes here at country points, although a few sales of mountain stock have been made as high as \$1 f. o. b. country points while valley stock in general ranges frem 80c to 90c. No movement at all is reported in eastern Multnomah and Clackamas, owing to the very high prices asked by producers.

Onions Are Firmer. Further strength is showing in the onion market here and prices are being held higher all around. More inquirtes have been received for Oregon onions during the past 60 hours than the entire season heretofore. This is for outside account. Both Puget sound and Cali-fornia are anxious inquirers at this time. Locally, the price of onions is still low, and some interests are still offering as low as \$1.50, while others charge \$1.75. The Consederated Onion Consederated Onio \$1.75. The Conjederated Onion Growers association charges \$1.40 f. o. b.

APPLE MARKET HAS A BETTER OUTLOOK

California Oranges Caught by Frost and This Will Help the Oregon Product.

The apple trade is showing signs of Improvement, although to date there has been no noticeable change in values. The apple market of recent weeks has been held back by the overfull offerings of oranges by California at low prices. This is a condition that is coming to an end, bringing with it the probability of a better call for apples.

A special advice from California this morning stated that a large per cent of the orange crop had been caught by the recent heavy frosts throughout the northern district. This means that that portion of the orange growth caught by the cold snap will have to be moved mprovement, although to date there

by the cold snap will have to be moved quickly in order to save it and after this surplus is cleaned up the market will stiffen in consequence of the smal-

Further rejections of Oregon potatoes by California interests indicate that the game of boost there is being played to the extreme and the trade here is becoming tired of the tactics used.

There is a growing sentiment among potato shippers of Oregon not to sell to California and especially to San Francisco, unless sales are made f. o. b. cars Portland. This is the way Portland is
